Ooma Telo[®] Air Package Contents

Getting Started

Installing Ooma is easy! In fact, most users are up and calling in less than 15 minutes. This guide will walk you through setting up your Ooma Telo and introduce the basics of using your Ooma service.

Have a Question or Need Assistance?

Here is where you can look for help:

Knowledge base: www.ooma.com/support
User manuals: www.ooma.com/userguide
Community forum: www.ooma.com/forums
Live Customer Care: 1-888-711-6662 (US)
1-866-929-6662 (Canada)

Go to **Step 1**

Step 1 Activate Online

Begin by activating your Ooma Telo device online. Locate the seven-digit activation code printed on the bottom of the Telo.

Next, navigate a web browser to:

<http://www.ooma.com/activate>

The activation wizard will guide you through the process. You'll receive an email confirmation once your device is activated.

Next, decide how you want to connect your Telo to your router. There are two options:

Connect via Ethernet

This is the easiest way to get started, but means that your Ooma Telo must be installed next to your router. You can always go wireless later.

Connect via Wi-Fi[®]

The Ooma Wireless Adapter gives you the freedom to install the Telo anywhere in your home that has access to your wireless network.

Go to **Step 2: OPTION A**

Go to **Step 2: OPTION B**

Step 4 Power On

Plug in your Ooma Telo

Plug the provided AC adapter **b** into the **POWER** port. It is normal for the lights on the Telo to blink for a couple of minutes while it boots up.

Go to **Step 5**

Step 2: OPTION A Connect via Ethernet

Connect the Ooma Telo to your Router

Using the included Ethernet cable **a**, connect the **INTERNET** port of the Telo to an open Ethernet port on your router.

Note: If you use Ethernet to connect your Telo, we recommend you begin with this set up. Alternative options are shown on the back side of this guide.

Go to **Step 3**

Step 5 Configure Wireless Network (Wi-Fi only)

Connect a computer to your Ooma Telo

You'll need a computer to complete your wireless setup. Use the included Ethernet cable **a** and connect a computer to the **HOME** port of the Telo.

Configure wireless settings

Browse to setup.ooma.com. Click on the **Wireless** tab on the left. Follow the directions on the screen to link the Telo to your home Wi-Fi network. You'll need your wireless network name and password to connect.

Step 2: OPTION B Connect via Wi-Fi

Install the Ooma Wireless Adapter

Plug the adapter **c** into the USB port on the back of the Telo. Rotate it upward for optimal reception.

Note: Your home router must support Wi-Fi to use the Ooma Wireless Adapter.

Go to **Step 3**

Congratulations, You're Done!

The Telo is ready to be used once the logo lights up blue. Pick up the phone and listen for the Ooma dialtone to confirm that your set up is complete.

If you connected a computer to the Telo in **Step 5** you may not plug it now.

If your Telo needs a software upgrade, the Ooma logo will blink purple while it is downloading the newest version. This may take 5-10 minutes.

Do not unplug the Telo while it is upgrading. It will automatically reboot after the upgrade is done.

Place your first phone call

Pick up the phone you connected to the Ooma Telo and dial just like you always do. Call a friend or family member and experience firsthand the quality of Ooma PureVoice[™] technology. While you are at it, you might want to tell them about Ooma!

Set up your voicemail

Pick up the phone connected to the Ooma Telo and press the **[V]** key on the Telo.

The system will walk you through configuring your account and recording a personal greeting.

Check out My Ooma

Access your online control panel at my.ooma.com. Here you'll unlock the capabilities of your system:

- Check voicemail and call logs
- Configure preferences and set up advanced features
- Update your 911 address
- Purchase additional services and add-ons

And much more! The first time you log in, our Setup Wizard will help you configure our most popular features.

Step 3 Connect Your Phone

Plug your phone into the Ooma Telo

Using your existing phone cable, plug your corded phone or cordless phone base station into the **PHONE** port of the Telo.

Go to **Step 4**

What's Next?

Transfer your phone number

In most areas, you can port your existing number to Ooma for a one-time fee. You must maintain your current phone service until the porting process is completed, which usually takes about 3-4 weeks. To check availability, to learn more, or to get started, please visit: my.ooma.com/port

Explore Ooma Premier[™]

Ooma Premier is a bundle of enhanced calling features that will get your home phone service firing on all cylinders. Test drive more than 25 premium features during your trial period.

See the *Ooma Premier* section for an overview of our most popular features. To learn more about all the features and benefits included in Ooma Premier, go to: my.ooma.com/premier

More information on the other side

Alternative Setup Options

The Ooma Telo is flexible enough to work in almost any home network and with a variety of devices. Review the following options to see if any of them apply to your situation.

Option A Install Telo between modem and router

Installing the Telo between your modem and router will result in the best voice quality. This setup allows Ooma to prioritize your phone calls over other network traffic. Don't worry, this won't slow down your Internet connection.

- 1 Locate the Ethernet cable that connects your modem to your router. Unplug the modem end of the cable and plug it into the **HOME** port of the Telo.
- 2 Use the included Ethernet cable and connect the **INTERNET** port of the Telo to your modem.
- 3 Reboot your modem and router.

Option B Install Telo between modem and PC

If you only have one computer and it is connected directly to your modem, follow these instructions:

- 1 Locate the Ethernet cable that connects your modem to your computer. Unplug the modem end of the cable and plug it into the **HOME** port of the Telo.
- 2 Use the included Ethernet cable and connect the **INTERNET** port of the Telo to your modem.
- 3 Reboot your modem and computer.

Connecting fax machines and other devices

A standard phone splitter can be used to connect more than one device to the **PHONE** port.

Devices such as fax machines, digital video recorders (DVR) or set-top boxes (STB) use a phone line to make data calls. To complete these types of calls, you must dial **[2][9][3]** prior to the destination phone number. A successful data transfer mainly depends on the speed and quality of your Internet connection.

To learn more, visit: www.ooma.com/fax

Connecting your phone jacks

You can link the Ooma Telo to all the phone jacks in your home, allowing you to connect phones in multiple rooms.

Note: The **PHONE** port on the back of your Ooma Telo is not designed or certified for connecting to your phone company's wiring, whether through the phone jacks in your home or otherwise. In order to avoid an increased risk of fire and/or electrical shock, you must first completely and physically disconnect the telephone company's wiring outside of your house from the phone wiring that is inside of your house, **before** you plug your Ooma Telo into your phone jacks. Please visit www.ooma.com/homedistribution before you proceed with connecting your Telo to your phone jacks in this manner.

Add-Ons for Ooma Telo

Ooma HD2 Handset

Unlock the full power of your Ooma Telo. The HD2 Handset lets you enjoy:

- Two-inch color screen with picture caller-ID and Facebook profile pictures
- Sync your contacts from Outlook, Mac Address Book, Google, Yahoo, and other sites
- Supports High-Definition Voice calls to bring you an amazingly lifelike sound quality
- Full integration with Ooma Premier features such as the Instant Second Line™, Voicemail Monitoring and Do Not Disturb mode
- Convenient access to voicemail and other enhanced features, right in your hand
- Speakerphone mode and a headphone jack

Ooma Linx

Need to connect a fax machine or a second phone? The Linx allows you to:

- Wirelessly and securely extend the Ooma service to other parts of your home
- Compatible with standard home telephones and telephony devices
- Full integration with Ooma Premier features such as the Instant Second Line™, Personal Numbers and Private Devices
- Connect fax machines and other telephony devices via clear channel mode

To learn more about these accessories for the Ooma Telo, visit: my.ooma.com/products

Troubleshooting

- Logo is blinking red**
 A blinking red logo indicates that your Ooma Telo is not operational. It is normal for the logo to blink red for a couple of minutes during boot up. Otherwise, check the following to make sure everything is set up correctly:
 - Verify that you have activated your device as described in Step 1. If you plugged in your device before going through the activation process, try rebooting it now.
 - For Ethernet installations: Check that your network cables are plugged in securely. Verify that the **INTERNET** port is connected to your router (or modem). The LED at the bottom right of the connector will be lit green if the cable is connected properly.
 - For Wi-Fi installations: Try moving the Telo closer to your Wi-Fi router and repeating the directions in Step 2 to refresh your wireless setup. If you are unable to connect over Wi-Fi, follow the directions in Step 2: **OPTION A** to connect your Telo to your router using Ethernet instead.
 - Check that your Internet connection is working. Try connecting a computer to the **HOME** port and browse to my.ooma.com. You should see the login screen for My Ooma. If not, troubleshoot your Internet connection.
 - Try rebooting your Telo, modem, and router by pulling out the power and plugging them back in.
- Logo does not light up**
 Check that the AC adapter is plugged in and power is being supplied to the device.
- You don't hear the Ooma dialtone**
 If the Ooma logo is blue but you don't hear a dialtone, check that your phone is correctly plugged into the **PHONE** port.
- Incoming calls do not ring your home phone**
 When Do Not Disturb is turned on, the Ooma logo will light up purple and all incoming calls will go directly to voicemail without ringing your phones. To turn off the feature, press and hold the **[2][9][3]** button or dial **[2][9][3]** from your phone.
- You are unable to hear your messages**
 Check that the speaker hasn't been turned off. Increase the volume level by pressing **[2]**. The device will say what volume it has been set to.
- Voice constantly breaks up**
 Voice quality is dependent on the speed and quality of your Internet connection. For best results, Ooma recommends that you hardwire your Telo between the modem and router as shown in *Alternative Setup Option A*. This configuration allows phone calls to be intelligently prioritized over other network traffic. You can optimize how Ooma allocates bandwidth by connecting a computer to the **HOME** port, browsing to setup.ooma.com, then clicking on the **Advanced** tab.

Ooma Usage Guide

Basic Operation

Making and receiving calls

To place a call, pick up a phone connected to your Ooma Telo and dial a phone number.

To answer a call, pick up the phone when it rings as you normally would.

Call-waiting

Switch to a second incoming call by pressing the **Flash** key on your telephone handset. The current call will automatically be put on hold. To switch back, press the **Flash** key again.

Blocking caller-ID

Disable your caller-ID on outgoing calls by dialing **[2][9][3]** before you dial out. To disable caller-ID for all calls, visit: my.ooma.com/privacy

911 emergency calling

In case of an emergency, dial **[9][1][1]** to reach first responders. For your safety, always keep your address up-to-date at: my.ooma.com/address

International and other calling services

A calling plan or prepaid balance is required to call outside the country. Visit my.ooma.com/prepaid to get started. Then dial **[2][9][3]** followed by the country code and phone number. Your remaining time will be announced before the call completes.

Note: A prepaid balance is required for 411 calls.

Ooma Premier™

Your Ooma Telo comes with a free trial of Ooma Premier, a bundle of over 25 premium calling features. Check out some of our most popular features below!

Making two calls at once

Press the **Flash** key on your handset, and you'll get a new Ooma dialtone.

Forwarding your voicemail

Forward your voicemail to email so you can listen to messages from your smartphone or computer. To set this up, go to: my.ooma.com/voicemail

Staying connected on the go

Afraid to miss a call? Set up your Ooma Telo to forward calls to your cell phone. Choose to forward all calls, only when your Internet is down, or to ring your home phone and cell phone at the same time. Set this up any time at: my.ooma.com/calling

Blocking telemarketers

Personal and community blacklists have been designed to help you filter out telemarketers and other unwanted callers. To start blocking callers, visit: my.ooma.com/blacklists

Choosing a virtual number

Select a number from almost any calling area for a home office or to make it easy for friends and family in another state to reach you. Get started at: my.ooma.com/numbers

Voicemail

Setting up

Pick up your phone and press the **[2]** key on the Ooma Telo. The system will walk you through setting up your PIN and recording a personal greeting.

Playing messages at home

When you have new messages, the **[2]** key will blink.

Press the **[2]** key to listen to your voicemail through the speaker. You can also listen to messages through your phone. Simply dial your own phone number and follow the voice prompts.

Checking voicemail remotely

There are three ways to check voicemail remotely:

[2] Phone: Dial your Ooma number. When the call rolls to voicemail, press the **[2]** key and enter your PIN.

[2] Online: Listen to and manage your voicemail on the web at: my.ooma.com/Inbox

[2] Email: Forward your voicemail as an MP3 file to your email or mobile phone (requires Ooma Premier). Set up forwarding at: my.ooma.com/voicemail

Set up forwarding at: my.ooma.com/voicemail

Changing voicemail settings

Pick up the phone connected to your Ooma Telo and press the **[2]** key.

From the main menu, select option 2: "Change your settings," then follow the instructions.
