1.4. Emergency telephone number

Emergency number

: +86-(0)532-83889090

SECTION 2: Hazard(s) identification

2.1. Classification of the substance or mixture

GHS-US classification

Flammable gases, Category 1 Gases under pressure : Liquefied gas Extremely flammable gas. Contains gas under pressure; may explode if heated.

GHS Label elements, including precautionary statements 2.2. **GHS-US** labelling Hazard pictograms (GHS-US) Signal word (GHS-US) : Danger Hazard statements (GHS-US) Extremely flammable gas. · Contains gas under pressure; may explode if heated. MAY DISPLACE OXYGEN AND CAUSE RAPID SUFFOCATION. MAY CAUSE FROSTBITE. MAY FORM EXPLOSIVE MIXTURES WITH AIR. : Do not handle until all safety precautions have been read and understood. Precautionary statements (GHS-US) Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not get in eyes, on skin, or on clothing. Use only outdoors or in a well-ventilated area. Store in a well-ventilated place. Leaking gas fire: Do not extinguish, unless leak can be stopped safely. Eliminate all ignition sources if safe to do so. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Get medical advice/attention. IF ON SKIN: Thaw frosted parts with lukewarm water. Do not rub affected area. Get immediate medical advice/attention. DO NOT REMOVE THIS PRODUCT LABEL (or equivalent wording). Protect from sunlight when ambient temperature exceeds 52 °C (125 °F). Use a back flow preventive device in the piping. Close valve after each use and when empty. Never put cylinders into unventilated areas of passenger vehicles. Read and follow the Safety Data Sheet (SDS) before use.

Difluoromethane (R32) Safety Data Sheet

Try to stop release.	
6.3. Methods and material for containme	ent and cleaning up
Methods and material for containment and cleaning up	: Keep area evacuated and free from ignition sources until any spilled liquid has evaporated (ground free from frost).
6.4. Reference to other sections	
See also sections 8 and 13.	
SECTION 7: Handling and storage	
7.1. Precautions for safe handling	
	Protect cylinders from physical damage; do not drag, roll, slide or drop. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. If user experiences any difficulty operating cylinder valve discontinue use and contact supplier. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Keep container valve outlets clean and free from contaminants particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to transfer gases from one cylinder/container to another. Never use direct flame or electrical heating devices to raise the pressure of a container. Do not remove or deface labels provided by the supplier for the identification of the cylinder contents. Suck back of water into the container must be prevented. Open valve slowly to avoid pressure shock.
Sate use of the product	Assess the risk of potentially explosive atmospheres and the need for explosion-proof equipment. Purge air from system before introducing gas. Take precautionary measures against static discharge. Keep away from ignition sources (including static discharges). Consider the use of only non-sparking tools. Ensure equipment is adequately earthed. The product must be handled in accordance with good industrial hygiene and safety procedures. Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations. Ensure the complete gas system was (or is regularily) checked for leaks before use. Do not smoke while handling product. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Avoid suck back of water, acid and alkalis. Do not breathe gas. Avoid release of product into atmosphere.
7.2. Conditions for safe storage, includi	ing any incompatibilities
conditions for safe storage, including any incompatibilities	 Segregate from oxidant gases and other oxidants in store. All electrical equipment in the storage areas should be compatible with the risk of a potentially explosive atmosphere. Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over. Stored containers should be periodically checked for general condition and leakage. Keep container below 50°C in a well ventilated place. Store containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials.

RECTION OF EV	noouro controlal	noroonal	protoction
SECTION O. EX	posure controis/	personal	protection

Control parameters 8.1.

No additional information available

8.2.	Appropriate engineering controls		
Appropriate engineering controls		Provide adequate general and local exhaust ventilation. Product to be handled in system. Gas detectors should be used when flammable gases/vapours may be Consider the use of a work permit system e.g. for maintenance activities. System pressure should be regularily checked for leakages. Ensure exposure is below o exposure limits (where available).	a closed eleased. is under ccupational
January	/ 3, 2022	EN (English)	3/8

Safety Data Sheet

A risk assessment should be conducted and documented in each work area to assess the risks relater to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered: PPE compliant to the recommended EN/ISO standards should be selected.

Hand protection:

Wear cold insulating gloves when transfilling or breaking transfer connections. Standard EN 511 - Cold insulating gloves. Wear working gloves when handling gas containers. Standard EN 388 - Protective gloves against mechanical risk.

Eye protection:

Wear goggles when transfilling or breaking transfer connections. Standard EN 166 - Personal eye-protection - specifications

Respiratory protection:

Gas filters may be used if all surrounding conditions e.g. type and concentration of the contaminant(s) and duration of use are known. Use gas filters with full face mask, where exposure limits may be exceeded for a short-term period, e.g. connecting or disconnecting containers. Gas filters do not protect against oxygen deficiency. Standard EN 14387 - Gas filter(s), combined filter(s) and standard EN136, full face masks.

Thermal hazard protection:

None in addition to the above sections.

Other information:

Consider the use of flame resistant anti-static safety clothing. Standard EN ISO 14116 - Limited flame spread materials. Standard EN 1149-5 - Protective clothing: Electrostatic properties. Wear safety shoes while handling containers. Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

SECTION 9: Physical and chemica	properties
9.1. Information on basic physical and	I chemical properties
Physical state	: Gas
Colour	: Colourless.
Odour	: Ethereal. Poor warning properties at low concentrations.
Odour threshold	: Odour threshold is subjective and inadequate to warn of overexposure.
рН	: Not applicable for gases and gas mixtures.
Melting point	: -136 °C
Freezing point	: -136 °C
Boiling point	: -51.7 °C
Critical temperature	: 78.5 °C
Critical pressure	: 5830 kPa
Flash point	: Not applicable for gases and gas mixtures.
Relative evaporation rate (butylacetate=1)	: No data available
Relative evaporation rate (ether=1)	: Not applicable for gases and gas mixtures.
Flammability (solid, gas)	: Extremely flammable gas.
Vapour pressure	: 13.8 bar(a)
Vapour pressure at 50 °C	: 31.4 bar(a)
Relative vapour density at 20 °C	: Not applicable.
Relative density	: 1.1
Molecular mass	: 52 g/mol
Relative gas density	: 1.8
Solubility	: Water: 280000 mg/l
Log Pow	: 0.2 Not applicable for gas mixtures.
Auto-ignition temperature	: 648 °C
Decomposition temperature	: Not applicable.
Viscosity, kinematic	: No data available

Difluoromethane (R32) Safety Data Sheet

Viscosity, dynamic	: No reliable data avarable
Explosive limits	: 13 - 33vol %
Explosive properties	: Not applicable.
Oxidising properties	: Not applicable.
9.2. Other information	
Gas group	: Press. Gas (Liq.)
Additional information	: Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

10.1. Reactivity

No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemic	al stability		
Stable under norm	al conditions.		
10.3. Possibi	lity of hazardous reactions		
Can form explosive	e mixture with air. May react vi	iole	ently with oxidants.
10.4. Conditio	ons to avoid		
Keep away from h	eat/sparks/open flames/hot su	rfa	ces. – No smoking. Avoid moisture in installation systems.
10.5. Incomp	atible materials		
Air, Oxidisers. Moi	sture. For additional information	on d	on compatibility refer to ISO 11114.
10.6. Hazardo	ous decomposition products	;	
Under normal con	ditions of storage and use, haz	zaro	dous decomposition products should not be produced.
SECTION 11:	Toxicological informat	io	n
11.1. Informa	tion on toxicological effects		
Acute toxicity (oral)	:	Not classified
Acute toxicity (der	mal)	:	Not classified
Acute toxicity (inha	alation)	:	Not classified
Skin corrosion/irrit	ation	:	Not classified
			pH: Not applicable for gases and gas mixtures.
Serious eye dama	ge/irritation	:	Not classified
			pH: Not applicable for gases and gas mixtures.
Respiratory or skir	sensitisation	:	Not classified
Germ cell mutager	nicity	:	Not classified
Carcinogenicity		:	Not classified
Reproductive toxic	itv	:	Not classified

Reproductive toxicity	: Not classified
STOT-single exposure	: Not classified
STOT-repeated exposure	: Not classified
Aspiration hazard	: Not classified
Viscosity, kinematic	: No data available
Most important symptoms and effects, both acute and delayed	: Refer to section 11.

: Classification criteria are not met.
1507 mg/l
142 mg/l
652 mg/l

Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

12.2. Persistence and degradability			
Difluoromethane (R32) (75-10-5)	AKA		
Persistence and degradability	Not readily biodegradable.		
12.3. Bioaccumulative potential			
Difluoromethane (R32) (75-10-5)			
Log Pow	0.2		
Log Kow	Not applicable for gas mixtures.		
Bioaccumulative potential	Not expected to bioaccumulate due to the low log Kow (log kow < 4). Refer to section 9.		
12.4. Mobility in soil	22 2 C 0 2 6 3 6 3		
Difluoromethane (R32) (75-10-5)			
Ecology - soil	Because of its high volatility, the product is unlikely to cause ground or water pollution. Partition into soil is unlikely.		
12.5. Other adverse effects			
Other adverse effects	No known effects from this product.		
Effect on the ozone layer	: None.		
Global warming potential [CO2=1]	675		
Effect on global warming	Contains fluorinated greenhouse gases. When discharged in large quantities may contribute to the greenhouse effect. For quantities refer to cylinder label.		

SECTION 13: Disposal consi	derations
13.1. Disposal methods	
Waste treatment methods	: Contact supplier if guidance is required. Do not discharge into areas where there is a risk of forming an explosive mixture with air. Waste gas should be flared through a suitable burner with flash back arrestor. Ensure that the emission levels from local regulations or operating permits are not exceeded. Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at http://www.eiga.eu for more guidance on suitable disposal methods. Refer to supplier's waste gas recovery programme. Toxic and corrosive gases formed during combustion should be scrubbed before discharge to atmosphere. Discharge to atmosphere in large quantities should be avoided. Do not discharge into any place where its accumulation could be dangerous. Return unused product in original cylinder to supplier.
Additional information	 External treatment and disposal of waste should comply with applicable local and/or national regulations.
List of hazardous waste codes (from Commission Decision 2001/118/EC)	: 14 06 01 *: Chlorofluorocarbons, HCFC, HFC.

SECTION 14: Transport information

Department of Transportation (DOT)

In accordance with DOT

Transport document description
UN-No.(DOT)
Proper Shipping Name (DOT)
Class (DOT)
Hazard labels (DOT)

DOT Packaging Non Bulk (49 CFR 173.xxx) DOT Special Provisions (49 CFR 172.102)

- : UN3252 Difluoromethane, 2.1
- : UN3252
- : Difluoromethane
- : 2.1 Class 2.1 Flammable gas 49 CFR 173.115
- : 2.1 Flammable gas

DOT Packaging Bulk (49 CFR 173.xxx)

: 302

: 314;315

: T50 - When portable tank instruction T50 is referenced in Column (7) of the 172.101 Table, the applicable liquefied compressed gases are authorized to be transported in portable tanks in accordance with the requirements of 173.313 of this subchapter.

Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

DOT Packaging Exceptions (49 CFR 173.xxx)	:	306
DOT Quantity Limitations Passenger aircraft/rail (49 CFR 173.27)	:	Forbidden
DOT Quantity Limitations Cargo aircraft only (49 CFR 175.75)	:	150 kg
DOT Vessel Stowage Location	:	D - The material must be stewed 'on declary' on a cargo vessel and on a passenger vessel carrying a number of passengers united to not more than the larger of 25 passengers or one passenger per each 3 m of orefail vessel length, but the naterial is prohibited on passenger vessels in which the limiting number of passengers is exceeded.
DOT Vessel Stowage Other	:	40 - Stow "clear of living quarters"
Emergency Response Guide (ERG) Number	:	115
Other information	:	No supplementary information available.
Special transport precautions	:	Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: - Ensure there is adequate ventilation Ensure that containers are firmly secured Ensure cylinder valve is closed and not leaking Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
Transportation of Dangerous Goods		
Not applicable
