Indicator	*Alternating red and blue: Bluetooth pairing status *Blue slow flashing: successful connection, waiting for playback status *Steady red light: charging. *Steady green light: fully charged *Blue light flashing: data transmission mode *Green light flashing: MP3 mode waiting to be played *Blue light breathing: Bluetooth gaming low latency mode

Principles of bone cinduction

Most of the sound we hear is the result of sound waves passing through our eardrum to make it vibrate so that the sound waves can be conducted to the internal auditory canal.
The other way is that the sound waves are directly conducted to the internal auditory canal through the vibration of the bone instead of eardrum. This is another way of people hearing their own sound and this sound conduction is called bone conduction.

Precautions

How to wear
Hang the headphone behind your neck with both speakers clinging to your cheekbones. After that, adjust it until you feel comfortable.

COOYEE

Attentions:
 • Please wear the bone-conduction speakers of the headphone at your cheekbones before your ears and do not put them in your ears.
 • Listening to music for an excessive long time mayake you feel uncomfortable, please try to use a medium volume instead of a big one.
 • No matter how the volume is, please do not make it prevent you from hearing the surrounding sounds. Please take care when using the headphone.
 • Do not throw, press the headphone or put it in the water.
 • The headphone should keep away from fire, water and high voltage devices.
 • It is not for children's use as it contains small parts.
 • Please do not treat it as domestic waste. Instead, send it to your electrical and electronic recycling station.
 • If there is any injury or property loss due to violation of the above contents, we will not bear any responsibility.
