product instructions

attn: "big bro" requires these - rest assured that we have kept them as brief as possible:

your new crib mattress comes compressed, but it will expand once the vacuum seal is broken. just unroll it, remove all the packaging, let it sit for an hour or so (probably less), and you'll be good to go!

the following should be obvious (because of the badges we've sewn onto the cover): the **firm side** of the crib mattress is for children that are 0 to 9 months old, while the **soft side** is for children 9+ months old.

cleaning:

your cover is 100% waterproof-lined jacquard (the name of the 19th century french inventor of the overpriced "jacquard" weaving process). if it ever gets soiled, just remove it and machine wash it. it also wipes down with a damp cloth if things aren't too messy.

hiccaboast:

while all crib mattresses (including ours) are required to be fire resistant, not all crib mattresses are free of fiberglass. we're proud to say that our crib mattress is **100% fiberglass free** - we think this is safer, and therefore the right thing to do.

final word:

we are a design company first and foremost, and we hope our new crib mattress reflects that. so, if you like our stuff, **please** spread the word to your friends.

⚠ WARNING

SIDS AND SUFFOCATION HAZARDS

Always place baby on back to sleep to reduce the risks of SIDS and suffocation.

Babies have suffocated:

- on pillows, comforters, and extra padding
- in gaps between a wrong-sized mattress, or extra padding, and side walls of product.

NEVER add soft bedding, padding, or an extra mattress.

USE ONLY one mattress at a time.

DO NOT cover the faces or heads of babies with a blanket or over-bundle them. Overheating can increase the risk of SIDS.

Always check mattress fit every time you change the sheets, by pushing mattress tight to one corner. Look for any gaps between the mattress and the side walls. If a gap is larger than 1½ in. (3.8 cm), the mattress does not fit—*do not* use it.

DO NOT use this mattress in a crib having interior dimensions that exceed 28⅝ by 53 in. (73 cm by 135 cm) as measured from the innermost surfaces of the crib.

USE ONLY sheets and mattress pads designed specifically for crib mattresses.
