

hello! thanks so much for choosing our inflatable sleep bumper! we put a lot of time, effort, and (ironically) caffeine into this one, and are quite proud of what we accomplished. hopefully your sleep bumpers make safe-sleeping (whether at home or while traveling) just a little easier for you and your child.

hiccapop® prides itself on stellar customer service. so if you ever have a question about anything, just drop us a note and one of our team members will quickly get back to you with an answer.

now onto our favorite part...
our shameless plug for reviews!

for us, amazon reviews are as important to our success as a good night's sleep is to a new parent, because they help spread good hiccavibes across America. so if you could please take a minute to review your sleep bumpers, we'd sure appreciate it. and to make it really easy (which is important when kissing up like this), all you have to do is go to amazon.com/ryp to leave your review.

product instructions

we realize that instructions (even ours) are generally boring, but they are required by Big Brother. hopefully you'll find something useful. here we go:

installation and use instructions:

your bumper arrives ready-to-go; unroll it, inflate it and zip it up. that's it! we even use a patented valve for quicker inflation/deflation. just make sure you firmly re-insert the plug after inflating. now you can install it.

ok, this seems obvious, but install this **under** the fitted bottom sheet - near the edge of the bed. smoothly spread out the safety-flap over the mattress and tuck in the bottom sheet. your child's weight on this flap helps to hold the bumper in place during sleep.

install the top sheet and you are ready to go.

note: if using for home/grandma's, use a deep-fitted bottom sheet because it will give you a little more room for the bumper. hotels generally already provide such sheets.

care instructions:

storing: deflate, roll tightly, and place in travel bag.

washing: remove bumper from cover and wash cover just as you would any other garment.

WARNING

SUFFOCATION AND STRANGULATION HAZARD. Gaps in and around bed rails have entrapped young children and killed infants. NEVER use with children younger than 2 years old. Use ONLY with older children who can get in and out of adult bed without help. NEVER use in place of crib. NEVER use unless bed rail is tight against mattress, without gaps, and at least 9 in. from headboard and footboard. Do not fill gaps with pillows, blankets, or other items that can suffocate children. NEVER use on toddler bed, bunk bed, water bed, or bed with inflatable mattress. Use ONLY on adult bed. Discontinue use if damaged, broken, or if parts are missing.
