

hello! first of all, thanks so much for trying hiccapop! we know there are lots of travel beds out there in all price ranges, and that we are pricier than many. however, hiccapop is truly a cut above the rest because we design all of our own products, control our own manufacturing, and build all of our products to last.

hiccapop prides itself on stellar customer service. if you ever have a question about anything, just drop us a note and one of our team members will quickly get back to you with an answer. also, don't forget to register your hiccapop travel bed at hiccapop.com/register.

now onto our favorite part...
our shameless plug for reviews!

for us, amazon reviews are as important to our success as a good night's sleep is to a new parent, because they help spread good hiccavibes across America. so if you could please take a minute to review your travel bed, we'd sure appreciate it. and to make it really easy (which is important when kissing up like this), all you have to do is go to amazon.com/ryp to leave your review.

product instructions

we decided to keep the instructions here short: lay out, blow up, and sleep. easy! if you're looking for more detailed instructions, we've printed them right on the bed itself (so they never get lost).

if you need to clean your travel bed, all you need to do is wipe it down with a damp cloth.

hiccatip #1: while our mattress fits all standard crib sheets, a sleeping bag is always a fun and hassle-free choice for kids.

hiccatip #2: even though we've used the thickest vinyl of any travel bed on the market, try to keep sharp objects (like scissors, pencils, etc.) away from your travel bed, as they don't mix well. if you run into a small puncture though, don't worry; we've enclosed a patch kit to get you back up and running. enjoy!

Big Brother requires that we include the following:

⚠ WARNING

Infants have suffocated on inflatable mattresses. Never place infants aged 0-18 months to sleep on this inflatable mattress. Infants can suffocate on an under inflated or deflated mattress, on the bedding, by co-sleeping with another child, and by entrapment between the mattress and bed frame or between the mattress and a vertical surface. Provide at least 12 inches of space between mattress and all walls/dressers/vertical objects to avoid entrapment. Always keep mattress fully inflated when in use.
