Please read these instructions fully before using this product.

SAFETY INFORMATION

Please use your UberBoost in accordance with all the instructions and guidance listed in the instruction book and labels on the product.

⚠ WARNING!

- Leave the UberBoost restrained and secured while it is in your car, even if it is unoccupied. In a crash, an unrestrained child booster seat may injure other occupants.
- Warning! Use only the vehicle's lap and shoulder belt system when restraining the child in this booster seat.
- This restraint is not certified for aircraft use because we have not designed nor tested it for such usage.
- Failure to follow the instructions provided in this manual and on the booster seat can result in serious injury or death to a child during a sudden stop or crash.

It's important to register your UberBoost!

Child restraints could be recalled for safety reasons. You must register this restraint to be reached in a recall.

To register your UberBoost by mail: send your name, address, email address if available, and the restraint's model number and manufacturing date to:

KEEZIO GROUP, LLC
PO BOX 590
ALAMO, CA 94507
or call 1-833-442-2276

For recall information, call the U.S. Government's Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153), or go to www.NHTSA.gov.

UberBoost

inflatable car seat booster

INSTRUCTION MANUAL

Use only with children who weigh between 40 and 110 lb (18.2 and 49.9 kg) and whose height is between 43 and 62 in (110 and 157 cm).

4.25 inches tall

Where to Use Your UberBoost

This product can be used in all standard cars. **DO NOT USE IN A REAR-FACING FASHION.** This unit is only to be used in front-facing applications. Use only with type II seat belts, which are seat belts that have both a lap AND torso component. UberBoost should not be used with a type I (lap-only) seat belt.

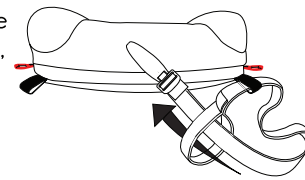

STEP 1

Unzip the cover of your UberBoost to find the air valve. Fully inflate so the air bladder is firm. Close the air valve and zip the seat cover closed.

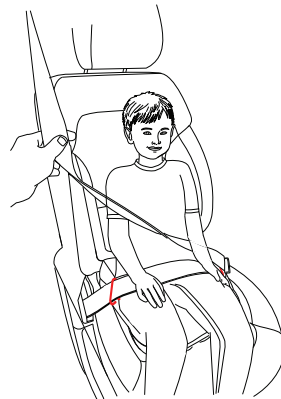

STEP 1 1/2

If using the shoulder belt adjuster (because you want to prevent the belt from hitting your child's face), ensure a tight slip knot is created around one of the back loops. Use the right loop for children seated on the right side of the car, and the left loop for the left side of the car.

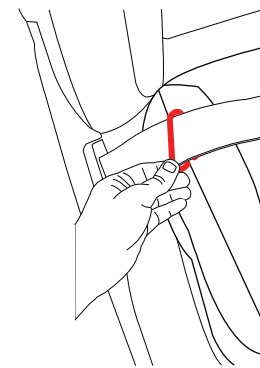

STEP 2

Place your UberBoost on your car seat. Then place your child on the UberBoost.

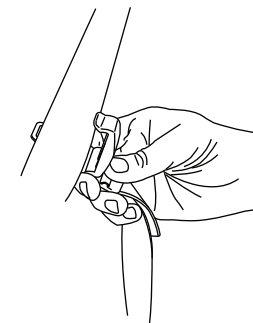

STEP 3

Feed the lap belt through the guides on the left and right of the UberBoost.

STEP 3 1/2

If using the shoulder belt adjustment, the drawing to the right shows how the plastic buckle fits with the seat belt. Firmly snap the buckle closed to secure the seat belt.

STEP 3 3/4

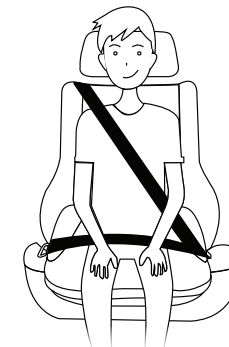

The belt/clip adjuster is used to adjust the shoulder belt away from your child's face and neck, and onto the shoulder. Simply adjust the belt/clip downward (using the adjustment strap) until it looks like the illustration shown on the right. Play with it... it's simple.

STEP 4

When installed correctly, your seated child should look like the diagram on the right.

According to accident statistics, children are safer when properly restrained in the rear seating positions than in the front seating positions.
