

thanks so much for choosing our wipe warmer - originally voted one of California's most useless baby items. we could not be more proud of the controversy it's generated. enjoy!

hiccapop prides itself on stellar customer service. so if you ever have a question, please drop us a line and one of our team members will promptly take care of you. and don't forget to register at [hiccapop.com](http://hiccapop.com) for your free lifetime guarantee.

now onto our favorite part...  
our shameless plug for reviews!

for us, amazon reviews are as important to our success as a good night's sleep is to a new parent, because they help spread good hiccavibes across America. so if you could please take a minute to review your wipe warmer, we'd sure appreciate it. and to make it really easy (which is important when kissing up like this), all you have to do is go to [amazon.com/ryp](http://amazon.com/ryp) to leave your review.

**#hiccahint 1:** don't expect "hot" wipes like you get from virgin air first class. that wouldn't make sense, because it would turn your wipes into tortilla chips. instead, our warmer gets juuust warm enough to take the "jolt" out of a cold baby wipe.

instructions (even ours) are generally boring, but please read them and just maybe you will find something useful. here it goes...

1. we suggest using "continuous feed" wipes because they pull the next wipe to the top. otherwise you'll constantly be fishing for wipes with your fingers.
2. load up 50-80 wipes and gently push the top wipe through the rubber opening in the main lid and lock the two slide locks.
3. after plugging in the adapter. let the wipes warm for a few hours, and then you are good to go. but just don't be surprised when your baby looks up the first time and says: "wow... thanks!"
4. don't forget that your wipe warmer works with both 120 & 240 voltages. this means you can take your wipe warmer anywhere in the world and it will work.
5. to use the nighttime changing light, press the red button. the light automatically shuts off within 10 minutes.

**#hiccahint 2:** when filling your warmer, pour a half cup of water over the wipes to prevent them from drying out too quickly. also, try adding some drops of lavender essential oil to the water. it smells great and calms babies. and did we mention "smells great"?

HP-WWCL

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**WARNING:** Changes or modifications of this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This Class B digital apparatus complies with Canadian ICES-003.

- This card is 130 mm wide x 257 mm tall
- mod. 071024
