4800 lm, sold individually

PRODUCT OVERVIEW

Heise's Blackout Series high output cube LED lights are small but powerful for better coverage at night. These next-generation lights have refined frames and cleaner lines for a sleek yet minimalistic look. The upgraded optics have changed from a direct to an indirect placement allowing more control of the location and pattern of the beam. This allows the lights to be tailored to the vehicle, its entire lighting system, and for the driver's lighting coverage needs. Each set is rated IP67 and includes a dual light wiring harness (HE-DLWH1) for installation. Flush mount options are also available and sold individually (without harness).

- Input voltage: 12-24v
- Color temperature: 5700k
- Housing material: die-cast aluminum
- Color: black
- Lens material: polycarbonate
- Electronics: integrated-epoxy encapsulated
- Hardware: stainless 316
- Operating temperature: -40° F to +140° F
- Protection: reverse polarity
- IP rating: IP67
