# Introduction

## ⚠ WARNING

See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

Always consult your physician before you begin or modify any exercise program.

## Getting Started

When using your watch the first time, you should complete these tasks to set it up and get to know the basic features.

- 1 Hold **CTRL** to turn on the watch ([Buttons, page 1](#)).
- 2 Follow the on-screen instructions to complete the initial setup.  
During the initial setup, you can pair your phone with your watch to receive notifications, sync your activities, and more ([Pairing Your Phone, page 65](#)).
- 3 Charge the watch ([Charging the Watch, page 87](#)).
- 4 Start an activity ([Starting an Activity, page 3](#)).

## Buttons

|                                 |   |
|---------------------------------|---|
| <p>①<br/>LIGHT<br/>CTRL</p>     | <ul style="list-style-type: none"> <li>• Press to turn on the device.</li> <li>• Press to illuminate the screen.</li> <li>• Quickly press twice to turn on or off the flashlight (<i>Using the Torch, page 50</i>).</li> <li>• Hold for two seconds view the controls menu (<i>Controls, page 47</i>).</li> <li>• Hold for five seconds to request assistance (<i>Requesting Assistance, page 76</i>).</li> </ul> |
| <p>②<br/>UP<br/>MENU</p>        | <ul style="list-style-type: none"> <li>• Press to scroll through the glance loop and menus.</li> <li>• From the watch face, hold to access the main menu.</li> <li>• Hold to access a contextual menu, if one is available in that part of the user interface.</li> </ul>   |
| <p>③<br/>DOWN<br/>ABC</p>       | <ul style="list-style-type: none"> <li>• Press to scroll through the glance loop and menus (<i>Viewing the Glance Loop, page 38</i>).</li> <li>• Hold to view the altimeter, barometer, and compass (ABC) screen.</li> </ul>  |
| <p>④<br/>GPS<br/>START/STOP</p> | <ul style="list-style-type: none"> <li>• Press to choose an option in a menu.</li> <li>• From the watch face, press to open the apps and activities menu (<i>Activities and Apps, page 2</i>).</li> <li>• Press to view the activity list and start or stop an activity (<i>Starting an Activity, page 3</i>).</li> <li>• Hold to view GPS coordinates and save your location.</li> </ul>                         |
| <p>⑤<br/>BACK<br/>SET</p>       | <ul style="list-style-type: none"> <li>• Press to return to the previous screen.</li> <li>• During an activity, press to record a lap, rest, or advance to the next workout step.</li> <li>• Hold to view the clock menu (<i>Clocks, page 29</i>).</li> </ul>   |

## Activities and Apps

Your watch can be used for indoor, outdoor, athletic, and fitness activities. When you start an activity, the watch displays and records sensor data. You can create custom activities or new activities based on default activities (*Creating a Custom Activity, page 24*). When you finish your activities, you can save and share them with the Garmin Connect™ community.

You can also add Connect IQ™ activities and apps to your watch using the Connect IQ app (*Connect IQ Features, page 69*).

For more information about activity tracking and fitness metric accuracy, go to [garmin.com/ataccuracy](https://garmin.com/ataccuracy).

## Activities and Apps List

From the watch face, press GPS and press DOWN to scroll through the activities and apps list. Your favorite activities list appears at the top of the list ([Customizing Activities and Apps, page 23](#)).

**NOTE:** Some activities appear in more than one category.

| Category      | Activities  |
|---------------|---|
| Outdoor       | Archery, Bouldering, Climb, Expedition, Fish, Golf, Hike, Horseback, Hunt, Walk   |
| Running       | Indoor Track, Run, Track Run, Trail Run, Treadmill, Obstacle Racing, Virtual Run  |
| Cycling       | Bike, Bike Commute, Bike Indoor, Bike Tour, BMX, Cyclocross, eBike, eMTB, Gravel Bike, MTB, Road Bike   |
| Swimming      | Open Water, Pool Swim, Swimrun, Triathlon   |
| Gym           | Boxing, Cardio, Climb Indoor, Elliptical, Floor Climb, HIIT, Mixed Martial Arts, Pilates, Row Indoor, Stair Stepper, Strength, Yoga   |
| Winter Sports | Backcountry Ski, Backcountry Snowboard, Ice Skating, Ski, Snowboard, Snowshoe, XC Classic Ski, XC Skate Ski   |
| Water Sports  | Boat, Kayak, Kiteboard, Row, SUP, Surf, Whitewater, Windsurf  |
| Team Sports   | American Football, Baseball, Basketball, Cricket, Field Hockey, Ice Hockey, Lacrosse, Rugby, Soccer/Football, Softball, Volleyball, Ultimate Disc   |
| Racket Sports | Badminton, Padel, Pickleball, Platform Tennis, Racquetball, Squash, Table Tennis, Tennis  |
| Motorsports   | ATV, Motocross, Motorcycle, Overland, Snowmobile  |
| Other         | Breathwork, Gaming, Navigate, Other, Tactical, Track Me   |
| Apps          | ABC, Broadcast Heart Rate, Calendar, Clocks, Garmin Share, Health Snapshot™, History, Messenger, Moon Phase, Music, Notifications, Project Wpt., Pulse Oximeter, Reference Point, Saved, Settings, Sunrise & Sunset, Tides, Wallet, Weather, Workouts |

## Starting an Activity

When you start an activity, GPS turns on automatically (if required).

- 1 From the watch face, press **GPS**.
- 2 If this is the first time you are starting an activity, select the checkbox next to each activity to add to your favorites, and select **Done**.
- 3 Select an option:
  - Select an activity from your favorites.
  - Select  and select an activity from the extended activity list.
- 4 If the activity requires GPS signals, go outside to an area with a clear view of the sky, and wait until the watch is ready.

The watch is ready after it establishes your heart rate, acquires GPS signals (if required), and connects to your wireless sensors (if required).
- 5 Press **GPS** to start the activity timer.

The watch records activity data only while the activity timer is running.

## Tips for Recording Activities

- Charge the watch before starting an activity ([Charging the Watch, page 87](#)).
- Press **SET** to record laps, start a new set or pose, or advance to the next workout step.
- Press **UP** or **DOWN** to view additional data screens.
- Hold **MENU**, and select **Power Mode** to use a power mode to extend battery life ([Customizing Power Modes, page 83](#)).

## Stopping an Activity

- 1 Press **GPS**.
- 2 Select an option:
  - To resume your activity, select **Resume**.
  - To save the activity and view the details, select **Save**, press **GPS**, and select an option.
  - To suspend your activity and resume it at a later time, select **Resume Later**.
  - To mark a lap, select **Lap**.  
You can select  to discard a lap for certain activities.
  - To navigate back to the starting point of your activity along the path you traveled, select **Back to Start > TracBack**.  
**NOTE:** This feature is available only for activities that use GPS.
  - To navigate back to the starting point of your activity by the most direct path, select **Back to Start > Straight Line**.  
**NOTE:** This feature is available only for activities that use GPS.
  - To measure the difference between your heart rate at the end of the activity and your heart rate two minutes later, select **Recovery HR**, and wait while the timer counts down ([Recovery Heart Rate, page 45](#)).
  - To discard the activity, select **Discard**.  
**NOTE:** After stopping the activity, the watch saves it automatically after 30 minutes.

## Outdoor Activities

### Golfing

#### Playing Golf

Before you play a course for the first time, you must download it from the Garmin Connect app ([Garmin Connect, page 67](#)). Courses downloaded from the Garmin Connect app are updated automatically.

Before you play golf, you should charge the device ([Charging the Watch, page 87](#)).

- 1 From the watch face, press **GPS**.
- 2 Select **Golf**.
- 3 Go outside, and wait while the device locates satellites.
- 4 Select a course from the list of available courses.
- 5 Select  to keep score.
- 6 Select a tee box.
- 7 Press **UP** or **DOWN** to scroll through the holes.  
The device automatically transitions when you move to the next hole.
- 8 After you complete your round, press **GPS**, and select **End Round**.

## Viewing Hazards

You can view distances to hazards along the fairway for par 4 and 5 holes. Hazards that affect shot selection are displayed individually or in groups to help you determine the distance to layup or carry.

- 1 From the hole information screen, press **GPS**.
- 2 Select **Hazards**.

- The distances to the front ① and back ② of the nearest hazard appear on the screen.
- The hazard type ③ is listed at the top of the screen.
- The green is represented as a half circle ④ at the top of the screen. The line below the green represents the center of the fairway.
- Hazards ⑤ are indicated by a letter signifying the order of the hazards on the hole, and are shown below the green in approximate locations relative to the fairway.

- 3 Press **UP** or **DOWN** to view other hazards for the current hole.

## Golf Menu

During a round, you can press **GPS** to access additional features in the golf menu.

**End Round:** Ends the current round.

**View Green:** Shows the green for the current hole.

**Hazards:** Shows the hazards for the current hole ([Viewing Hazards, page 5](#)).

**Measure Shot:** Shows the distance of your previous shot recorded with the Garmin AutoShot™ feature ([Viewing Measured Shots, page 6](#)). You can also manually record a shot ([Manually Measuring a Shot, page 6](#)).

**Layups:** Shows the layups for the current hole.

**Scorecard:** Opens the scorecard for the round ([Keeping Score, page 6](#)).

**Odometer:** Shows the recorded time, distance, and steps traveled. This automatically starts and stops when you start or end a round.

**Club Stats:** Shows your statistics with each golf club, such as distance and accuracy information. Appears when you pair compatible Approach® CT10 club tracking sensors or enable the Club Prompt setting.

**Sunrise & Sunset:** Shows the sunrise, sunset, and twilight times for the current day.

**Settings:** Customizes the golf activity settings ([Activities and App Settings, page 25](#)).

## Moving the Flag

You can take a closer look at the green and move the pin location.

- 1 From the hole information screen, press **GPS**.
- 2 Select **Move Flag**.
- 3 Press **UP** or **DOWN** to move the pin location.
- 4 Press **GPS**.

The distances on the hole information screen are updated to show the new pin location. The pin location is saved for only the current round.

## Viewing Measured Shots

Before the device can automatically detect and measure shots, you must enable scoring.

Your device features automatic shot detection and recording. Each time you take a shot along the fairway, the device records your shot distance so you can view it later.

**TIP:** Automatic shot detection works best when you wear the device on your leading wrist and make good contact with the ball. Putts are not detected.

- 1 While playing golf, press **GPS**.
- 2 Select **Measure Shot**.

Your last shot distance appears.

**NOTE:** The distance automatically resets when you hit the ball again, putt on the green, or move to the next hole.

- 3 Press **DOWN**.
- 4 Select **Previous Shots** to view all recorded shot distances.

## Manually Measuring a Shot

You can manually add a shot if the watch doesn't detect it. You must add the shot from the location of the missed shot.

- 1 Take a shot and watch where your ball lands.
- 2 From the hole information screen, press **GPS**.
- 3 Select **Measure Shot**.
- 4 Press **DOWN**.
- 5 Select **Add Shot** > .
- 6 If necessary, enter the club you used for the shot.
- 7 Walk or drive to your ball.

The next time you take a shot, the watch automatically records your last shot distance. If necessary, you can manually add another shot.

## Keeping Score

- 1 From the hole information screen, press **GPS**.
- 2 Select **Scorecard**.  
The scorecard appears when you are on the green.
- 3 Press **UP** or **DOWN** to scroll through the holes.
- 4 Press **GPS** to select a hole.
- 5 Press **UP** or **DOWN** to set the score.  
Your total score is updated.

## Recording Statistics

Before you can record statistics, you must enable statistics tracking ([Activities and App Settings, page 25](#)).

- 1 From the scorecard, select a hole.
- 2 Enter the total number of strokes taken, including putts, and press **GPS**.
- 3 Set the number of putts taken, and press **GPS**.  
**NOTE:** The number of putts taken is used for statistics tracking only and does not increase your score.
- 4 If necessary, select an option:  
**NOTE:** If you are on a par 3 hole, fairway information does not appear.
  - If your ball hit the fairway, select **In Fairway**.
  - If your ball missed the fairway, select **Missed Right** or **Missed Left**.
- 5 If necessary, enter the number of penalty strokes.

## Scoring Settings

During a round, press GPS, and select **Settings > Scoring**.

**Scoring Method:** Changes the method the device uses to keep score.

**Handicap Scoring:** Enables handicap scoring.

**Set Handicap:** Sets your handicap when handicap scoring is enabled.

**Show Score:** Displays your total score for the round at the top of the scorecard ([Keeping Score, page 6](#)).

**Stat Tracking:** Enables statistics tracking for the number of putts, greens in regulation, and fairways hit while playing golf.

**Penalties:** Enables penalty stroke tracking while playing golf ([Recording Statistics, page 7](#)).

**Prompt:** Enables the prompt at the start of a round asking if you want to keep score.

## About Stableford Scoring

When you select the Stableford scoring method ([Activities and App Settings, page 25](#)), points are awarded based on the number of strokes taken relative to par. At the end of a round, the highest score wins. The device awards points as specified by the United States Golf Association.

The scorecard for a Stableford scored game shows points instead of strokes.

| Points | Strokes Taken Relative to Par |
|--------|-------------------------------|
| 0      | 2 or more over                |
| 1      | 1 over                        |
| 2      | Par                           |
| 3      | 1 under                       |
| 4      | 2 under                       |
| 5      | 3 under                       |

## Big Numbers Mode

You can change the size of the numbers on the hole information screen.

- 1 During a round, press **GPS**.
- 2 Select **Settings > Big Numbers**.  
The distances to the front, middle, and back of the green appear in large font on the hole information screen.
- 3 Press **UP** or **DOWN** to view additional data, including the PlaysLike distance to the middle of the green, wind speed and direction, and your handicap rating.

## Recording a Bouldering Activity

You can record routes during a bouldering activity. A route is a climbing path along a boulder or small rock formation.

- 1 From the watch face, press **GPS**.
- 2 Select **Bouldering**.
- 3 Select a grading system.  
**NOTE:** The next time you start a bouldering activity, the watch uses this grading system. You can hold **MENU**, select the activity settings, and select **Grading System** to change the system.
- 4 Select the difficulty level for the route.
- 5 Press **GPS** to start the route timer.
- 6 Start your first route.
- 7 Press **SET** to finish the route.
- 8 Select an option:
  - To save a successful route, select **Completed**.
  - To save an unsuccessful route, select **Attempted**.
  - To delete the route, select **Discard**.
- 9 When you are done resting, press **SET** to start your next route.
- 10 Repeat this process for each route until your activity is complete.
- 11 After your last route, press **GPS** to stop the route timer.
- 12 Select **Save**.

## Starting an Expedition

You can use the **Expedition** activity to prolong the battery life while recording a multi-day activity.

- 1 From the watch face, press **GPS**.
- 2 Select **Expedition**.
- 3 Press **GPS** to start the activity timer.  
The device enters low power mode and collects GPS track points once an hour. To maximize battery life, the device turns off all sensors and accessories, including the connection to your smartphone.

## Recording a Track Point Manually

During an expedition, track points are recorded automatically based on the selected recording interval. You can manually record a track point at any time.

- 1 During an expedition, press **GPS**.
- 2 Select **Add Point**.

## Viewing Track Points

- 1 During an expedition, press **GPS**.
- 2 Select **View Points**.
- 3 Select a track point from the list.
- 4 Select an option:
  - To start navigating to the track point, select **Go To**.
  - To view detailed information about the track point, select **Details**.

## Going Fishing

- 1 From the watch face, press **GPS**.
- 2 Select **Fish**.
- 3 Press **GPS**.
- 4 Press **GPS**, and select an option:
  - To add the catch to your fish count and save the location, select **Log Catch**.
  - To save your current location, select **Save Location**.
  - To set an interval timer, end time, or end time reminder for the activity, select **Fish Timers**.
  - To navigate back to the starting point of your activity, select **Back to Start**, and select an option.
  - To view your saved locations, select **Saved Locations**.
  - To navigate to a destination, select **Navigation**, and select an option.
  - To edit the activity settings, select **Settings**, and select an option ([Activities and App Settings, page 25](#)).
- 5 After you complete your activity, press **GPS**, and select **End Fish**.

## Going Hunting

You can save locations relevant to your hunt and view a map of saved locations. During a hunting activity, the device uses a GNSS mode that conserves battery life.

- 1 From the watch face, press **GPS**.
- 2 Select **Hunt**.
- 3 Press **GPS**, and select **Start Hunt**.
- 4 Press **GPS**, and select an option:
  - To navigate back to the starting point of your activity, select **Back to Start**, and select an option.
  - To save your current location, select **Save Location**.
  - To view locations saved during this hunt activity, select **Hunt Locations**.
  - To view all previously saved locations, select **Saved Locations**.
  - To navigate to a destination, select **Navigation**, and select an option.
- 5 After you complete your hunt, press **GPS**, and select **End Hunt**.

## Running

### Going for a Track Run

Before you go for a track run, make sure you are running on a standard-shape, 400 m track.

You can use the track run activity to record your outdoor track data, including distance in meters and lap splits.

- 1 Stand on the outdoor track.
- 2 From the watch face, press **GPS**.
- 3 Select **Track Run**.
- 4 Wait while the watch locates satellites.
- 5 If you are running in lane 1, skip to step 11.
- 6 Press **MENU**.
- 7 Select the activity settings.
- 8 Select **Lane Number**.
- 9 Select a lane number.
- 10 Press **BACK** twice to return to the activity timer.
- 11 Press **GPS**.
- 12 Run around the track.
- 13 After you complete your activity, press **GPS**, and select **Save**.

## Tips for Recording a Track Run

- Wait until the watch acquires satellite signals before starting a track run.
- During your first run on an unfamiliar track, run four laps to calibrate your track distance. You should run slightly past your starting point to complete the lap.
- Run each lap in the same lane.  
**NOTE:** The default Auto Lap® distance is 1600 m, or four laps around the track.
- If you are running in a lane other than lane 1, set the lane number in the activity settings.

## Going for a Virtual Run

You can pair your watch with a compatible third-party app to transmit pace, heart rate, or cadence data.

- 1 From the watch face, press **GPS**.
- 2 Select **Virtual Run**.
- 3 On your tablet, laptop, or phone, open the Zwift™ app or another virtual training app.
- 4 Follow the on-screen instructions to start a running activity and pair the devices.
- 5 Press **GPS** to start the activity timer.
- 6 After you complete your activity, press **GPS**, and select **Save**.

## Calibrating the Treadmill Distance

To record more accurate distances for your treadmill runs, you can calibrate the treadmill distance after you run at least 2.4 km (1.5 mi.) on a treadmill. If you use different treadmills, you can manually calibrate the treadmill distance on each treadmill or after each run.

- 1 Start a treadmill activity (*Starting an Activity, page 3*).
- 2 Run on the treadmill until your watch records at least 2.4 km (1.5 mi.).
- 3 After you finish the activity, press **GPS** to stop the activity timer.
- 4 Select an option:
  - To calibrate the treadmill distance the first time, select **Save**.  
The device prompts you to complete the treadmill calibration.
  - To manually calibrate the treadmill distance after the first-time calibration, select **Calibrate & Save** > ✓.
- 5 Check the treadmill display for the distance traveled, and enter the distance on your watch.

## Recording an Obstacle Racing Activity

When you participate in an obstacle course race, you can use the Obstacle Racing activity to record your time on each obstacle and your time running between obstacles.

- 1 From the watch face, press **GPS**.
- 2 Select **Obstacle Racing**.
- 3 Press **GPS** to start the activity timer.
- 4 Press **SET** to manually mark the beginning and end of each obstacle.  
**NOTE:** You can configure the **Obstacle Tracking** setting to save obstacle locations from your first loop of the course. On repeat loops of the course, the watch uses the saved locations to switch between obstacle and running intervals.
- 5 After you complete your activity, press **GPS**, and select **Save**.

## PacePro™ Training

Many runners like to wear a pace band during a race to help achieve their race goal. The PacePro feature allows you to create a custom pace band based on distance and pace or distance and time. You can also create a pace band for a known course to optimize your pace effort based on elevation changes.

You can create a PacePro plan using the Garmin Connect app. You can preview the splits and elevation plot before you run the course.

## Downloading a PacePro Plan from Garmin Connect

Before you can download a PacePro plan from Garmin Connect, you must have a Garmin Connect account ([Garmin Connect](#), page 67).

- 1 Select an option:
  - Open the Garmin Connect app, and select **•••**.
  - Go to [connect.garmin.com](https://connect.garmin.com).
- 2 Select **Training & Planning > PacePro Pacing Strategies**.
- 3 Follow the on-screen instructions to create and save a PacePro plan.
- 4 Select  or **Send to Device**.

## Starting a PacePro Plan

Before you can start a PacePro plan, you must download a plan from your Garmin Connect account.

- 1 From the watch face, press **GPS**.
- 2 Select an outdoor running activity.
- 3 Hold **MENU**.
- 4 Select **Training > PacePro Plans**.
- 5 Select a plan.
- 6 Press **GPS**.

**TIP:** You can preview the splits, elevation plot, and the map before you accept the PacePro plan.
- 7 Select **Accept Plan** to start the plan.
- 8 If necessary, select  to enable course navigation.
- 9 Press **GPS** to start the activity timer.

|   |  |
|---|--|
| ① | Target split pace                                |
| ② | Current split pace                               |
| ③ | Completion progress for the split                |
| ④ | Distance remaining in the split                  |
| ⑤ | Overall time ahead of or behind your target time |

**TIP:** You can hold **MENU**, and select **Stop PacePro >**  to stop the PacePro plan. The activity timer continues running.

# Swimming

## NOTICE

The device is intended for surface swimming. Scuba diving with the device may damage the product and will void the warranty.

**NOTE:** The watch has wrist-based heart rate enabled for swim activities.

## Swim Terminology

**Length:** One trip down the pool.

**Interval:** One or more consecutive lengths. A new interval starts after a rest.

**Stroke:** A stroke is counted every time your arm wearing the watch completes a full cycle.

**Swolf:** Your swolf score is the sum of the time for one pool length and the number of strokes for that length. For example, 30 seconds plus 15 strokes equals a swolf score of 45. For open water swimming, swolf is calculated over 25 meters. Swolf is a measurement of swimming efficiency and, like golf, a lower score is better.

## Stroke Types

Stroke type identification is available only for pool swimming. Your stroke type is identified at the end of a length. Stroke types appear in your swimming history and in your Garmin Connect account. You can also select stroke type as a custom data field ([Customizing the Data Screens, page 24](#)).

|        |  |
|--------|--|
| Free   | Freestyle  |
| Back   | Backstroke   |
| Breast | Breaststroke   |
| Fly    | Butterfly  |
| Mixed  | More than one stroke type in an interval   |
| Drill  | Used with drill logging ( <a href="#">Training with the Drill Log, page 13</a> ) |

## Tips for Swimming Activities

- Press **SET** to record an interval during open water swimming.
- Before starting a pool swimming activity, follow the on-screen instructions to select your pool size or enter a custom size.

The watch measures and records distance by completed pool lengths. The pool size must be correct to display accurate distance. The next time you start a pool swimming activity, the watch uses this pool size. You can hold **MENU**, select the activity settings, and select **Pool Size** to change the size.
- For accurate results, swim the entire pool length, and use one stroke type for the entire length. Pause the activity timer when resting.
- Press **SET** to record a rest during pool swimming ([Auto Rest and Manual Rest, page 13](#)).

The watch automatically records swim intervals and lengths for pool swimming.
- To help the watch count your lengths, use a strong push off the wall and glide before your first stroke.
- When doing drills, you must either pause the activity timer or use the drill logging feature ([Training with the Drill Log, page 13](#)).

## Auto Rest and Manual Rest

**NOTE:** Swim data is not recorded during a rest. To view other data screens, you can press UP or DOWN.

The auto rest feature is available only for pool swimming. Your watch automatically detects when you are resting, and the rest screen appears. If you rest for more than 15 seconds, the watch automatically creates a rest interval. When you resume swimming, the watch automatically starts a new swim interval. You can turn on the auto rest feature in the activity options (*Activities and App Settings, page 25*).

**TIP:** For best results using the auto rest feature, minimize your arm motions while resting.

During a pool or open water swim activity, you can manually mark a rest interval by pressing SET.

## Training with the Drill Log

The drill log feature is available only for pool swimming. You can use the drill log feature to manually record kick sets, one-arm swimming, or any type of swimming that is not one of the four major strokes.

- 1 During your pool swim activity, press **UP** or **DOWN** to view the drill log screen.
- 2 Press **SET** to start the drill timer.
- 3 After you complete a drill interval, press **SET**.  
The drill timer stops, but the activity timer continues to record the entire swim session.
- 4 Select a distance for the completed drill.  
Distance increments are based on the pool size selected for the activity profile.
- 5 Select an option:
  - To start another drill interval, press **SET**.
  - To start a swim interval, press **UP** or **DOWN** to return to the swim training screens.

## Cycling

### Using an Indoor Trainer

Before you can use a compatible indoor trainer, you must pair the trainer with your watch using ANT+® technology (*Pairing Your Wireless Sensors, page 60*).

You can use your watch with an indoor trainer to simulate resistance while following a course, ride, or workout. While using an indoor trainer, GPS is turned off automatically.

- 1 From the watch face, press **GPS**.
- 2 Select **Bike Indoor**.
- 3 Hold **MENU**.
- 4 Select **Smart Trainer Options**.
- 5 Select an option:
  - Select **Free Ride** to go for a ride.
  - Select **Follow Workout** to follow a saved workout (*Workouts, page 18*).
  - Select **Follow Course** to follow a saved course (*Courses, page 80*).
  - Select **Set Power** to set the target power value.
  - Select **Set Grade** to set the simulated grade value.
  - Select **Set Resistance** to set the resistance force applied by the trainer.
- 6 Press **GPS** to start the activity timer.  
The trainer increases or decreases resistance based on the elevation information in the course or ride.

## Multisport

Triathletes, duathletes, and other multisport competitors can take advantage of the multisport activities, such as Triathlon or Swimrun. During a multisport activity, you can transition between activities and continue to view your total time. For example, you can switch from biking to running and view your total time for biking and running throughout the multisport activity.

You can customize a multisport activity, or you can use the default triathlon activity set up for a standard triathlon.

## Triathlon Training

When you participate in a triathlon, you can use the triathlon activity to quickly transition to each sport segment, to time each segment, and to save the activity.

1 From the watch face, press **GPS**.

2 Select **Triathlon**.

3 Press **GPS** to start the activity timer.

4 Press **SET** at the beginning and end of each transition.

The transition feature is on by default, and the transition time is recorded separately from the activity time. The transition feature can be turned on or off in the triathlon activity settings. If transitions are turned off, press SET to change sports.

5 After you complete your activity, press **GPS**, and select **Save**.

## Creating a Multisport Activity

1 From the watch face, press **GPS**.

2 Select **Add > Multisport**.

3 Select a multisport activity type, or enter a custom name.

Duplicate activity names include a number. For example, Triathlon(2).

4 Select two or more activities.

5 Select an option:

- Select an option to customize specific activity settings. For example, you can select whether to include transitions.
- Select **Done** to save and use the multisport activity.

6 Select  to add the activity to your list of favorites.

## Gym Activities

The watch can be used for training indoors, such as running on an indoor track or using a stationary bike or indoor trainer. GPS is turned off for indoor activities ([Activities and App Settings, page 25](#)).

When running or walking with GPS turned off, speed and distance are calculated using the accelerometer in the watch. The accelerometer is self-calibrating. The accuracy of the speed and distance data improves after a few outdoor runs or walks using GPS.

**TIP:** Holding the handrails of the treadmill reduces accuracy.

When cycling with GPS turned off, speed and distance data are not available unless you have an optional sensor that sends speed and distance data to the watch, such as a speed or cadence sensor.

## Recording a Strength Training Activity

You can record sets during a strength training activity. A set is multiple repetitions (reps) of a single move.

- 1 From the watch face, press **GPS**.
- 2 Select **Strength**.
- 3 Select a workout (*Following a Workout From Garmin Connect, page 19*).
- 4 Select **Details** to view a list of workout steps (optional).
- 5 Select **✓**.
- 6 Press **GPS**, and select **Start Workout** to start the set timer.
- 7 Start your first set.

The watch counts your reps. Your rep count appears when you complete at least four reps.

**TIP:** The watch can only count reps of a single move for each set. When you want to change moves, you should finish the set and start a new one.

- 8 Press **SET** to finish the set and move to the next exercise, if available.  
The watch displays the total reps for the set. After several seconds, the rest timer appears.
- 9 If necessary, press **UP** or **DOWN** to edit the number of reps.  
**TIP:** You can also add the weight used for the set.
- 10 When you are done resting, press **SET** to start your next set.
- 11 Repeat for each strength training set until your activity is complete.
- 12 After your last set, press **GPS**, and select **Stop Workout** to stop the set timer.
- 13 Select **Save**.

## Recording a HIIT Activity

You can use specialized timers to record a high-intensity interval training (HIIT) activity.

- 1 From the watch face, press **GPS**.
- 2 Select **HIIT**.
- 3 Select an option:
  - Select **Free** to record an open, unstructured HIIT activity.
  - Select **HIIT Timers > AMRAP** to record as many rounds as possible during a set time period.
  - Select **HIIT Timers > EMOM** to record a set number of moves every minute on the minute.
  - Select **HIIT Timers > Tabata** to alternate between 20-second intervals of maximum effort with 10 seconds of rest.
  - Select **HIIT Timers > Custom** to set your move time, rest time, number of moves, and number of rounds.
  - Select **Workouts** to follow a saved workout.
- 4 If necessary, follow the on-screen instructions.
- 5 Press **GPS** to start your first round.  
The watch displays a countdown timer and your current heart rate.
- 6 If necessary, press **SET** to manually move to the next round or rest.
- 7 After you finish the activity, press **GPS** to stop the activity timer.
- 8 Select **Save**.

## Recording an Indoor Climbing Activity

You can record routes during an indoor climbing activity. A route is a climbing path along an indoor rock wall.

- 1 From the watch face, press **GPS**.
- 2 Select **Climb Indoor**.
- 3 Select  to record route statistics.
- 4 Select a grading system.  
**NOTE:** The next time you start an indoor climbing activity, the device uses this grading system. You can hold **MENU**, select the activity settings, and select **Grading System** to change the system.
- 5 Select the difficulty level for the route.
- 6 Press **GPS**.
- 7 Start your first route.  
**NOTE:** When the route timer is running, the device automatically locks the buttons to prevent accidental button presses. You can hold any button to unlock the watch.
- 8 When you finish the route, descend to the ground.  
The rest timer starts automatically when you are on the ground.  
**NOTE:** If necessary, you can press **SET** to finish the route.
- 9 Select an option:
  - To save a successful route, select **Completed**.
  - To save an unsuccessful route, select **Attempted**.
  - To delete the route, select **Discard**.
- 10 Enter the number of falls for the route.
- 11 When you are done resting, press **SET** and begin your next route.
- 12 Repeat this process for each route until your activity is complete.
- 13 Press **GPS**.
- 14 Select **Save**.

## Winter Sports

### Viewing Your Ski Runs

Your watch records the details of each downhill skiing or snowboarding run using the auto run feature. This feature is turned on by default for downhill skiing and snowboarding. It automatically records new ski runs when you start moving down hill.

- 1 Start a skiing or snowboarding activity.
- 2 Hold **MENU**.
- 3 Select **View Runs**.
- 4 Press **UP** and **DOWN** to view details of your last run, your current run, and your total runs.  
The run screens include time, distance traveled, maximum speed, average speed, and total descent.

## Recording a Backcountry Skiing or Snowboarding Activity

The backcountry skiing or snowboarding activity lets you switch between climbing and descending tracking modes so you can accurately track your statistics. You can customize the Mode Tracking setting to automatically or manually switch tracking modes ([Activities and App Settings, page 25](#)).

- 1 From the watch face, press **GPS**.
- 2 Select an option:
  - Select **Backcountry Ski**.
  - Select **Backcountry Snowboard**.
- 3 Select an option:
  - If you are starting your activity on a climb, select **Climbing**.
  - If you are starting your activity moving downhill, select **Descending**.
- 4 Press **GPS** to start the activity timer.
- 5 If necessary, press **SET** to switch between climbing and descending tracking modes.
- 6 After you complete your activity, press **GPS**, and select **Save**.

## Water Sports

### Surfing

You can use the surfing activity to record your surfing sessions. After your session, you can view the number of waves, longest wave, and maximum speed.

- 1 From the watch face, press **GPS**.
- 2 Select **Surf**.
- 3 Wait on the beach until your watch acquires GPS signals.
- 4 Press **GPS** to start the activity timer.
- 5 After you complete your activity, press **GPS** to stop the activity timer.
- 6 Select **Save** to review the summary of your surfing session.

### Viewing Your Water Sport Runs

Your watch records the details of each water sport run using the auto run feature. This feature automatically records new runs based on your movement. The activity timer pauses when you stop moving. The activity timer starts automatically when your movement speed increases. You can view run details from the paused screen or while the activity timer is running.

**NOTE:** This feature is not available for all water sport activity types.

- 1 Start a water sport activity.
- 2 Hold **MENU**.
- 3 Select **View Runs**.
- 4 Press **UP** and **DOWN** to view details of your last run, your current run, and your total runs.  
The run screens include time, distance traveled, maximum speed, and average speed.

## Other Activities and Apps

### Gaming

#### Using the Garmin GameOn™ App

When you pair your watch with your computer, you can record a gaming activity on your watch and view real-time performance metrics on your computer.

- 1 On your computer, go to [www.overwolf.com/app/Garmin-Garmin\\_GameOn](http://www.overwolf.com/app/Garmin-Garmin_GameOn) and download the Garmin GameOn app.
- 2 Follow the on-screen instructions to complete the installation.
- 3 Launch the Garmin GameOn app.
- 4 When the Garmin GameOn app prompts you to pair your watch, press **GPS**, and select **Gaming** on your watch.  
**NOTE:** While your watch is connected to the Garmin GameOn app, notifications and other Bluetooth® features are disabled on the watch.
- 5 Select **Pair Now**.
- 6 Select your watch from the list, and follow the on-screen instructions.  
**TIP:** You can click  > **Settings** to customize your settings, reread the tutorial, or remove a watch. The Garmin GameOn app remembers your watch and settings the next time you open the app. If necessary, you can pair your watch to another computer (*Pairing Your Wireless Sensors*, page 60).
- 7 Select an option:
  - On your computer, start a supported game to automatically start the gaming activity.
  - On your watch, start a manual gaming activity (*Recording a Manual Gaming Activity*, page 18).The Garmin GameOn app shows your real-time performance metrics. When you complete your activity, the Garmin GameOn app displays your gaming activity summary and match information.

#### Recording a Manual Gaming Activity

You can record a gaming activity on your watch and manually enter stats for each match.

- 1 From the watch face, press **GPS**.
- 2 Select **Gaming**.
- 3 Press **DOWN**, and select a game type.
- 4 Press **GPS** to start the activity timer.
- 5 Press **SET** at the end of the match to record your match result or placement.
- 6 Press **SET** to start a new match.
- 7 After you complete your activity, press **GPS**, and select **Save**.

### Workouts

You can create custom workouts that include goals for each workout step and for varied distances, times, and calories. During your activity, you can view workout-specific data screens that contain workout step information, such as the workout step distance or current pace.

**On your watch:** You can open the workouts app from the activity list to show all workouts currently loaded on your watch (*Activities and Apps*, page 2).

You can also view your workout history.

**On the app:** You can create and find more workouts, or select a training plan that has built-in workouts and transfer them to your watch (*Following a Workout From Garmin Connect*, page 19).

You can schedule workouts.

You can update and edit your current workouts.

## Starting a Workout

Your device can guide you through multiple steps in a workout.

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**, and select **Training**.
- 4 Select an option:
  - To start an interval workout or a workout with a training target, select **Quick Workout** (*Starting an Interval Workout, page 20, Setting a Training Target, page 21*).
  - To start a preloaded or saved workout, select **Workout Library** (*Following a Workout From Garmin Connect, page 19*).
  - To start a scheduled workout from your Garmin Connect training calendar, select **Training Calendar** (*About the Training Calendar, page 21*).

**NOTE:** Not all options are available for all activity types.

- 5 Select a workout.

**NOTE:** Only workouts that are compatible with the selected activity appear in the list.

- 6 If necessary, select **Do Workout**.
- 7 Press **GPS** to start the activity timer.

After you begin a workout, the device displays each step of the workout, step notes (optional), the target (optional), and the current workout data. For strength, yoga, cardio, or Pilates activities, an instructional animation appears.

## Following a Workout From Garmin Connect

Before you can download a workout from Garmin Connect, you must have a Garmin Connect account (*Garmin Connect, page 67*).

- 1 Select an option:
  - Open the Garmin Connect app, and select **•••**.
  - Go to [connect.garmin.com](https://connect.garmin.com).
- 2 Select **Training & Planning > Workouts**.
- 3 Find a workout, or create and save a new workout.
- 4 Select  or **Send to Device**.
- 5 Follow the on-screen instructions.

## Following a Daily Suggested Workout

Before the watch can suggest a daily workout, you must have a training status and VO2 max. estimate (*Training Status, page 42*).

- 1 From the watch face, press **GPS**.
- 2 Select **Run** or **Bike**.

The daily suggested workout appears.
- 3 Select **GPS**, and select an option:
  - To do the workout, select **Do Workout**.
  - To discard the workout, select **Dismiss**.
  - To preview the workout steps, select **Steps**.
  - To update the workout target setting, select **Target Type**.
  - To turn off future workout notifications, select **Disable Prompt**.

The suggested workout updates automatically to changes in training habits, recovery time, and VO2 max.

## Starting an Interval Workout

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**.
- 4 Select **Training > Quick Workout > Intervals**.
- 5 Select an option:
  - Select **Open Repeats** to mark your intervals and rest periods manually by pressing **SET**.
  - Select **Structured Repeats > Do Workout** to use an interval workout based on distance or time.
- 6 If necessary, select  to include a warm up before the workout.
- 7 Press **GPS** to start the activity timer.
- 8 When your interval workout has a warm up, press **SET** to begin the first interval.
- 9 Follow the on-screen instructions.
- 10 At any time, press **SET** to stop the current interval or rest period and transition to the next interval or rest period (optional).

After you complete all of the intervals, a message appears.

## Customizing an Interval Workout

- 1 From the watch face, press **GPS**.
- 2 Select **Activities**, and select an activity.
- 3 Press **DOWN**.
- 4 Select **Training > Quick Workout > Intervals > Structured Repeats**.
- 5 Press **GPS**, and select **Edit**.
- 6 Select one or more options:
  - To set the interval duration and type, select **Interval**.
  - To set the rest duration and type, select **Rest**.
  - To set the number of repetitions, select **Repeat**.
  - To add an open-ended warm up to your workout, select **Warm Up > On**.
- 7 Press **BACK**.

The watch saves your custom interval workout until you edit the workout again.

## Using Virtual Partner

Your Virtual Partner is a training tool designed to help you meet your goals. You can set a pace for the Virtual Partner and race against it.

**NOTE:** This feature is not available for all activities.

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select an activity.
- 4 Select the activity settings.
- 5 Select **Data Screens > Add > Virtual Partner**.
- 6 Enter a pace or speed value.
- 7 Press **UP** or **DOWN** to change the location of the Virtual Partner screen (optional).
- 8 Start your activity ([Starting an Activity, page 3](#)).
- 9 Press **UP** or **DOWN** to scroll to the Virtual Partner screen and see who is leading.

## Setting a Training Target

The training target feature works with the Virtual Partner feature so you can train toward a set distance, distance and time, distance and pace, or distance and speed goal. During your training activity, the watch gives you real-time feedback about how close you are to achieving your training target.

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**.
- 4 Select **Training > Set a Target**.
- 5 Select an option:
  - Select **Distance Only** to select a preset distance or enter a custom distance.
  - Select **Distance and Time** to select a distance and time target.
  - Select **Distance and Pace** or **Distance and Speed** to select a distance and pace or speed target.

The training target screen appears and displays your estimated finish time. The estimated finish time is based on your current performance and the time remaining.

- 6 Press **GPS** to start the activity timer.  
**TIP:** You can hold **MENU**, and select **Cancel Target > ✓** to cancel the training target.

## Racing a Previous Activity

You can race a previously recorded or downloaded activity. This feature works with the Virtual Partner feature so you can see how far ahead or behind you are during the activity.

**NOTE:** This feature is not available for all activities.

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**.
- 4 Select **Training > Race an Activity**.
- 5 Select an option:
  - Select **From History** to select a previously recorded activity from your device.
  - Select **Downloaded** to select an activity you downloaded from your Garmin Connect account.

- 6 Select the activity.  
The Virtual Partner screen appears indicating your estimated finish time.
- 7 Press **GPS** to start the activity timer.
- 8 After you complete your activity, press **GPS**, and select **Save**.

## About the Training Calendar

The training calendar on your watch is an extension of the training calendar or schedule you set up in your Garmin Connect account. After you have added a few workouts to the Garmin Connect calendar, you can send them to your device. All scheduled workouts sent to the device appear in the calendar glance. When you select a day in the calendar, you can view or do the workout. The scheduled workout stays on your watch whether you complete it or skip it. When you send scheduled workouts from Garmin Connect, they overwrite the existing training calendar.

## Using Garmin Connect Training Plans

Before you can download and use a training plan, you must have a Garmin Connect account ([Garmin Connect, page 67](#)), and you must pair the Instinct 3 watch with a compatible phone.

- 1 From the Garmin Connect app, select **•••**.
- 2 Select **Training & Planning > Training Plans**.
- 3 Select and schedule a training plan.
- 4 Follow the on-screen instructions.
- 5 Review the training plan in your calendar.

## Using the Saved App

You can use the saved app to view your saved locations, activity locations, and courses.

- 1 From the watch face, press **GPS**.
- 2 Select **Saved**.
- 3 Select a saved item.
- 4 Select an option:
  - To navigate to the location, select **Go To**.
  - To navigate the course, select **Do Course**.
  - To navigate the course in reverse, select **Do Course in Reverse**.
  - To navigate to the start of the activity, select **Back to Start**.
  - To view location details, select **Details**.
  - To edit the name of the location or course, select **Name**.
  - To edit the location icon, select **Icon**.
  - To edit the location icon color, select **Icon Color**.
  - To edit the coordinates of the location, select **Position**.
  - To edit the elevation of the location, select **Elevation**.
  - To view a graph of the elevation level, select **Elevation Plot**.
  - To edit the course, select **Edit**.
  - To show the course or activity location on the map, even when you are not navigating, select **Map**.
  - To delete the location or course, select **Delete**.

## Viewing Tide Information

### **WARNING**

Tide information is for information purposes only. It is your responsibility to heed all posted water-related guidance, to remain aware of your surroundings, and to use safe judgment in, on, and around the water at all times. Failure to heed this warning could result in serious personal injury or death.

When you pair your watch with a compatible phone, you can view information about a tide station, including the tide height and when the next high and low tides will occur.

- 1 From the watch face, press **GPS**.
- 2 Select **Tides**.

### 3 Select an option:

- Select a favorite or recently used tide station.
- To use your current location when you are near a tide station, select **Add > Current Location**.
- To select a saved location, select **Add > Saved**.
- To enter coordinates for a location, select **Add > Coordinates**.

A 24-hour tide chart appears for the current date with the current tide height ① and information about the next tide ②.

4 Press **DOWN** to see tide information for upcoming days.

5 Press **GPS**, and select **Set as Favorite** to set this location as your favorite tide station.

Your favorite tide station appears at the top of the list in the app and in the glance.

### Setting a Tide Alert

1 From the **Tides** app, select a saved tide station.

2 Press **GPS**, and select **Set Alerts**.

3 Select an option:

- To set an alarm to sound before the peak tide, select **Til High Tide**.
- To set an alarm to sound before the low tide, select **Til Low Tide**.

## Customizing Activities and Apps

You can customize the activities and apps list, data screens, data fields, and other settings.

### Adding or Removing a Favorite Activity

The list of your favorite activities appears when you press **GPS** from the watch face, and it provides quick access to the activities you use most frequently. The first time you press **GPS** to start an activity, the watch prompts you to select your favorite activities. You can add or remove favorite activities at any time.

1 Hold **MENU**.

2 Select **Activities & Apps**.

Your favorite activities appear at the top of the list.

3 Select an option:

- To add a favorite activity, select the activity, and select **Set as Favorite**.
- To remove a favorite activity, select the activity, and select **Remove from Favorites**.

## Changing the Order of an Activity in the Apps List

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select an activity.
- 4 Select **Reorder**.
- 5 Press **UP** or **DOWN** to adjust the position of the activity in the apps list.

## Customizing the Data Screens

You can show, hide, and change the layout and content of data screens for each activity.

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select the activity to customize.
- 4 Select the activity settings.
- 5 Select **Data Screens**.
- 6 Select a data screen to customize.
- 7 Select an option:
  - Select **Layout** to adjust the number of data fields on the data screen.
  - Select a field to change the data that appears in the field.
  - Select **Reorder** to change the location of the data screen in the loop.
  - Select **Remove** to remove the data screen from the loop.
- 8 If necessary, select **Add** to add a data screen to the loop.

You can add a custom data screen, or select one of the predefined data screens.

## Adding a Map to an Activity

You can add the map to the data screens loop for an activity.

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select the activity to customize.
- 4 Select the activity settings.
- 5 Select **Data Screens > Add > Map**.

## Creating a Custom Activity

- 1 From the watch face, press **GPS**.
- 2 Select **Add**.
- 3 Select an option:
  - Select **Copy Activity** to create your custom activity starting from one of your saved activities.
  - Select **Other > Other** to create a new custom activity.
- 4 If necessary, select an activity type.
- 5 Select a name or enter a custom name.

Duplicate activity names include a number, for example: Bike(2).
- 6 Select an option:
  - Select an option to customize specific activity settings. For example, you can customize the data screens or auto features.
  - Select **Done** to save and use the custom activity.
- 7 Select **✓** to add the activity to your list of favorites.

## Activities and App Settings

These settings allow you to customize each preloaded activity app based on your needs. For example, you can customize data screens and enable alerts and training features. Not all settings are available for all activity types.

From the watch face, hold **MENU**, select **Activities & Apps**, select an activity, and select the activity settings.

**3D Distance:** Calculates your distance traveled using your elevation change as well as your horizontal movement over ground.

**3D Speed:** Calculates your speed using your elevation change as well as your horizontal movement over ground.

**Accent Color:** Sets the accent color for the activity icon.

**Add Activity:** Adds an activity type to a multisport activity.

**Alerts:** Sets the training or navigation alerts for the activity ([Activity Alerts, page 27](#)).

**Auto Climb:** Detects elevation changes using the built-in altimeter and automatically displays relevant climb data ([Enabling Auto Climb, page 28](#)).

**Auto Lap:** Sets the options for the Auto Lap feature to automatically mark laps. The Auto Distance option marks laps at a specific distance. The Auto Position option marks laps at a location where you previously pressed SET. When you complete a lap, a customizable lap alert message appears. This feature is helpful for comparing your performance over different parts of an activity.

**Auto Pause:** Sets the options for the Auto Pause<sup>®</sup> feature to stop recording data when you stop moving or when you drop below a specified speed. This feature is helpful if your activity includes stop lights or other places where you must stop.

**Auto Rest:** Automatically creates a rest interval when you stop moving during a pool swim activity ([Auto Rest and Manual Rest, page 13](#)).

**Auto Run:** Automatically detects ski or windsurf runs automatically using the built-in accelerometer. For the windsurf activity, you can set speed and distance thresholds for automatically starting a run.

**Auto Set:** Automatically starts and stops exercise sets during a strength training activity.

**Auto Scroll:** Automatically scrolls through all of the activity data screens automatically while the activity timer is running.

**Auto Sport Change:** Automatically detects a transition to the next sport in a multisport activity, such as a triathlon.

**Auto Start:** Automatically starts a motocross or BMX activity when you start moving.

**Big Numbers:** Changes the size of the numbers on the activity data screens.

**Broadcast Heart Rate:** Automatically broadcasts heart rate data from your watch to paired devices when you start the activity ([Broadcasting Heart Rate Data, page 54](#)).

**Broadcast to GameOn:** Automatically broadcasts biometrics data to the Garmin GameOn app when you start a gaming activity ([Using the Garmin GameOn™ App, page 18](#)).

**Club Prompt:** Prompts you to enter which golf club you used after each detected shot to record your club statistics ([Recording Statistics, page 7](#)).

**Countdown Start:** Enables a countdown timer for pool swimming intervals.

**Data Screens:** Customizes data screens and adds new data screens for the activity ([Customizing the Data Screens, page 24](#)).

**Driver Distance:** Sets the average distance the ball travels from the tee box on your drive while playing golf.

**Edit Weight:** Prompts you to add the weight used for an exercise set during a strength training or cardio activity.

**Golf Distance:** Sets the unit of measure used for distance while playing golf.

**Grading System:** Sets the grading system for rating the route difficulty for a rock climbing activity.

**Lane Number:** Sets your lane number for track running.

**Lap Key:** Enables the SET button for recording a lap, set, or rest during the activity.

**Lock Device:** Locks the buttons during a multisport activity to prevent inadvertent button presses.

**Metronome:** Plays tones or vibrates at a steady rhythm to help you improve your performance by training at a faster, slower, or more consistent cadence. You can set the beats per minute (bpm) of the cadence you want to maintain, beat frequency, and sound settings.

**Mode Tracking:** Sets the ascent and descent mode tracking to automatic or manual for backcountry skiing and snowboarding.

**Obstacle Tracking:** Saves obstacle locations from your first loop of the course. On repeat loops of the course, the watch uses the saved locations to switch between obstacle and running intervals ([Recording an Obstacle Racing Activity, page 10](#)).

**Pool Size:** Sets the pool length for pool swimming.

**Power Averaging:** Controls whether the watch includes zero values for power data that occur when you are not pedaling.

**Power Mode:** Sets the default power mode for the activity.

**Power Save Timeout:** Sets the timeout limit for the watch to stay in activity mode while waiting for you to start the activity, for example, when you are waiting for a race to start. The Normal option sets the watch to enter low-power watch mode after 5 minutes of inactivity. The Extended option sets the watch to enter low-power watch mode after 25 minutes of inactivity. The extended mode can result in shorter battery life between charges.

**Record Activity:** Enables activity FIT file recording for golf activities. FIT files record fitness information that is tailored for the Garmin Connect website and app.

**Record After Sunset:** Sets the watch to record track points after sunset during an expedition.

**Record Temperature:** Records the ambient temperature around the watch during certain activities.

**Record VO2 Max.:** Enables VO2 max. recording for trail run activities.

**Recording Interval:** Sets the frequency for recording track points during an expedition. By default, GPS track points are recorded once an hour, and they are not recorded after sunset. Recording track points less frequently maximizes battery life.

**Rename:** Sets the activity name.

**Rep Counting:** Enables rep counting during a workout. The Workouts Only option enables rep counting during guided workouts only.

**Repeat:** Enables the Repeat option for multisport activities. For example, you can use this option for activities that include multiple transitions, such as a swimrun.

**Restore Defaults:** Resets the activity settings.

**Route Stats:** Enables route statistics tracking for indoor climbing activities.

**Running Power:** Records running power data and customize the settings ([Running Power Settings, page 62](#)).

**Satellites:** Sets the satellite system to use for the activity ([Satellite Settings, page 29](#)).

**Scoring:** Sets your golf scoring preferences, enables statistics tracking, and sets your handicap ([Scoring Settings, page 7](#)).

**SpeedPro:** Enables advanced speed metrics for windsurf activity runs.

**Stat Tracking:** Enables statistics tracking for the number of putts, greens in regulation, and fairways hit while playing golf ([Recording Statistics, page 7](#)).

**Strobe:** Sets the LED flashlight strobe mode, speed, and color during the activity.

**Stroke Detect.:** Automatically detects your stroke type for pool swimming.

**Transitions:** Enables transitions for multisport activities.

**Units:** Sets the units of measure for the activity.

**Vibration Alerts:** Notifies you to inhale or exhale during a breathwork activity.

**Workout Videos:** Plays instructive workout animations for a strength, cardio, yoga, or Pilates activity. Animations are available for pre-installed workouts and workouts downloaded from your Garmin Connect account.

## Activity Alerts

You can set alerts for each activity, which can help you to train toward specific goals, to increase your awareness of your environment, and to navigate to your destination. Some alerts are available only for specific activities. There are three types of alerts: event alerts, range alerts, and recurring alerts.

**Event alert:** An event alert notifies you one time. The event is a specific value. For example, you can set the watch to alert you when you burn a specified number of calories.

**Range alert:** A range alert notifies you each time the watch is above or below a specified range of values. For example, you can set the watch to alert you when your heart rate is below 60 beats per minute (bpm) and over 210 bpm.

**Recurring alert:** A recurring alert notifies you each time the watch records a specified value or interval. For example, you can set the watch to alert you every 30 minutes.

| Alert Name    | Alert Type       | Description   |
|---------------|------------------|---|
| Cadence       | Range            | You can set minimum and maximum cadence values.   |
| Calories      | Event, recurring | You can set the number of calories.   |
| Distance      | Event, recurring | You can set a distance interval.  |
| Elevation     | Range            | You can set minimum and maximum elevation values.   |
| Heart Rate    | Range            | You can set minimum and maximum heart rate values or select zone changes. See <a href="#">About Heart Rate Zones, page 72</a> and <a href="#">Heart Rate Zone Calculations, page 74</a> . |
| Pace          | Range            | You can set minimum and maximum pace values.  |
| Power         | Range            | You can set the high or low power level.  |
| Proximity     | Event            | You can set a radius from a saved location.   |
| Run/Walk      | Recurring        | You can set timed walking breaks at regular intervals.  |
| Running Power | Event, range     | You can set minimum and maximum power zone values.  |
| Speed         | Range            | You can set minimum and maximum speed values.   |
| Stroke Rate   | Range            | You can set high or low strokes per minute.   |
| Time          | Event, recurring | You can set a time interval.  |
| Track Timer   | Recurring        | You can set a track time interval in seconds.   |

## Setting an Alert

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select an activity.  
**NOTE:** This feature is not available for all activities.
- 4 Select the activity settings.
- 5 Select **Alerts**.
- 6 Select an option:
  - Select **Add New** to add a new alert for the activity.
  - Select the alert name to edit an existing alert.
- 7 If necessary, select the type of alert.
- 8 Select a zone, enter the minimum and maximum values, or enter a custom value for the alert.
- 9 If necessary, turn on the alert.

For event and recurring alerts, a message appears each time you reach the alert value. For range alerts, a message appears each time you exceed or drop below the specified range (minimum and maximum values).

## Enabling Auto Climb

You can use the auto climb feature to detect elevation changes automatically. You can use it during activities such as climbing, hiking, running, or biking.

- 1 Hold **MENU**.
- 2 Select **Activities & Apps**.
- 3 Select an activity.  
**NOTE:** This feature is not available for all activities.
- 4 Select the activity settings.
- 5 Select **Auto Climb > Status**.
- 6 Select **Always** or **When Not Navigating**.
- 7 Select an option:
  - Select **Run Screen** to identify which data screen appears while running.
  - Select **Climb Screen** to identify which data screen appears while climbing.
  - Select **Invert Colors** to reverse the display colors when changing modes.
  - Select **Vertical Speed** to set the rate of ascent over time.
  - Select **Mode Switch** to set how quickly the device changes modes.

**NOTE:** The Current Screen option allows you to automatically switch to the last screen you were viewing before the auto climb transition occurred.

## Satellite Settings

You can change the satellite settings to customize the satellite systems used for each activity. For more information about satellite systems, go to [garmin.com/aboutGPS](http://garmin.com/aboutGPS).

Hold **MENU**, select **Activities & Apps**, select an activity, select the activity settings, and select **Satellites**.

**NOTE:** This feature is not available for all activities.

**Off:** Disables satellite systems for the activity.

**Use Default:** Enables the watch to use the default system setting for satellites (*System Settings*, page 84).

**GPS Only:** Enables the GPS satellite system.

**All Systems:** Enables multiple satellite systems. Using multiple satellite systems together offers increased performance in challenging environments and faster position acquisition than using GPS only. However, using multiple systems can reduce battery life more quickly than using GPS only.

**All + Multi-Band:** Enables multiple satellite systems on multiple frequency bands. Multi-band systems use multiple frequency bands and allow for more consistent track logs, improved positioning, improved multi-path errors, and fewer atmospheric errors when using the watch in challenging environments.

**Auto Select:** Enables the watch to use SatIQ™ technology to dynamically select the best multi-band system based on your environment. The Auto Select setting offers the best positioning accuracy while still prioritizing battery life.

**UltraTrac:** Records track points and sensor data less frequently. Enabling the UltraTrac feature increases battery life but decreases the quality of recorded activities. You should use the UltraTrac feature for activities that demand longer battery life and for which frequent sensor data updates are less important.

# Clocks

## Setting an Alarm

You can set multiple alarms. You can set each alarm to sound once or to repeat regularly.

- 1 From any screen, hold **SET**.
- 2 Select **Alarms**.
- 3 Select an option:
  - To set and save an alarm for the first time, enter the alarm time.
  - To set and save additional alarms, select **Add Alarm**, and enter the alarm time.

## Editing an Alarm

- 1 From any screen, hold **SET**.
- 2 Select **Alarms > Edit**.
- 3 Select an alarm.
- 4 Select an option:
  - To turn on or off the alarm, select **Status**.
  - To change the alarm time, select **Time**.
  - To set the alarm to repeat regularly, select **Repeat**, and select when the alarm should repeat.
  - To select the type of alarm notification, select **Sound and Vibe**.
  - To select a description for the alarm, select **Label**.
  - To delete the alarm, select **Delete**.

## Using a Countdown Timer

- 1 From any screen, hold **SET**.
- 2 Select **Timers**.
- 3 Select an option:
  - To set a countdown timer for the first time, enter the time using the **UP** and **DOWN** buttons.
  - To set a saved countdown timer, select the saved timer.
  - To set a new countdown timer without saving it, select **Quick Timer**, and enter the time.
  - To set and save a new countdown timer, select **Add Timer**, and enter the time.
- 4 If necessary, select an option:
  - To save the timer, press **MENU**, and select **Save Timer**.
  - To automatically restart the timer after it expires, press **MENU**, and select **Restart**.
  - To customize the timer notification, press **MENU**, and select **Sound and Vibe**.
- 5 Press **GPS** to start the timer.
- 6 If necessary, select an option:
  - To stop the timer, press **GPS**.
  - To restart the timer, press **ABC**.

## Deleting a Countdown Timer

- 1 From any screen, hold **SET**.
- 2 Select **Timers**.
- 3 Select a timer.
- 4 Press **MENU**.
- 5 Select **Delete**.

## Using the Stopwatch

- 1 From any screen, hold **SET**.
- 2 Select **Stopwatch**.
- 3 Press **GPS** to start the timer.
- 4 Press **SET** to restart the lap timer ①.

The total stopwatch time ② continues running.

- 5 Press **GPS** to stop both timers.
- 6 Select an option:
  - To reset both timers, press **DOWN**.
  - To save the stopwatch time as an activity, press **MENU**, and select **Save Activity**.
  - To reset the timers and exit the stopwatch, press **MENU**, and select **Done**.
  - To review the lap timers, press **MENU**, and select **Review**.  
**NOTE:** The **Review** option only appears if there have been multiple laps.
  - To return to the watch face without resetting the timers, press **MENU**, and select **Go to Watchface**.
  - To enable or disable lap recording, press **MENU**, and select **Lap Key**.

## Adding Alternate Time Zones

You can display the current time of day in additional time zones. You can also view your alternate time zones in the glances list ([Customizing the Glance Loop](#), page 38).

- 1 From any screen, hold **SET**.
- 2 Select **Alt. Time Zones > Add Alt. Time Zone**.
- 3 Press **UP** or **DOWN** to highlight a region, and press **GPS** to select it.
- 4 Select a time zone.

## Editing an Alternate Time Zone

1 From any screen, hold **SET**.

**TIP:** You can also view your alternate time zones in the glances list ([Customizing the Glance Loop, page 38](#)).

2 Select **Alt. Time Zones**.

3 Select a time zone.

4 Press **GPS**.

5 Select an option:

- To set the time zone to display on the glances list, select **Set as Favorite**.
- To enter a custom name for the time zone, select **Rename**.
- To enter a custom abbreviation for the time zone, select **Abbreviate**.
- To change the time zone, select **Change Zone**.
- To delete the time zone, select **Delete**.

## History

History includes time, distance, calories, average pace or speed, lap data, and optional sensor information.

**NOTE:** When the device memory is full, your oldest data is overwritten.

### Using History

History contains saved activity data, records, and totals.

The watch has a history glance for quick access to your activity data ([Glances, page 35](#)).

1 Hold **MENU**.

2 Select **History**.

3 Select an option:

- To view your activity history, press **Activities**, and select an activity.
- To view your personal records by sport, select **Records** ([Personal Records, page 32](#)).
- To view your weekly or monthly totals, select **Totals** ([Viewing Data Totals, page 33](#)).
- To delete historical data, select **Options** ([Deleting History, page 32](#)).

### Multisport History

Your device stores the overall multisport summary of the activity, including overall distance, time, calories, and optional accessory data. Your device also separates the activity data for each sport segment and transition so you can compare similar training activities and track how quickly you move through the transitions. Transition history includes distance, time, average speed, and calories.

### Deleting History

1 From the watch face, hold **MENU**.

2 Select **History > Options**.

3 Select an option:

- Select **Delete All Activities** to delete all activities from the history.
- Select **Reset Totals** to reset all distance and time totals.

**NOTE:** This does not delete any saved activities.

### Personal Records

When you complete an activity, the watch displays any new personal records you achieved during that activity. Personal records include your fastest time over several typical race distances, highest strength activity weight for major movements, and longest run, ride, or swim.

**NOTE:** For cycling, personal records also include most ascent and best power (power meter required).

## Viewing Your Personal Records

- 1 From the watch face, hold **MENU**.
- 2 Select **History > Records**.
- 3 Select a sport.
- 4 Select a record.
- 5 Select **View Record**.

## Restoring a Personal Record

You can set each personal record back to the one previously recorded.

- 1 From the watch face, hold **MENU**.
- 2 Select **History > Records**.
- 3 Select a sport.
- 4 Select a record to restore.
- 5 Select **Previous > ✓**.

**NOTE:** This does not delete any saved activities.

## Clearing Personal Records

- 1 From the watch face, hold **MENU**.
- 2 Select **History > Records**.
- 3 Select a sport.
- 4 Select an option:
  - To delete one record, select a record, and select **Clear Record > ✓**.
  - To delete all records for the sport, select **Clear All Records > ✓**.

**NOTE:** This does not delete any saved activities.

## Viewing Data Totals

You can view the accumulated distance and time data saved to your watch.

- 1 From the watch face, hold **MENU**.
- 2 Select **History > Totals**.
- 3 Select an activity.
- 4 Select an option to view weekly or monthly totals.

## Using the Odometer

The odometer automatically records the total distance traveled, elevation gained, and time in activities.

- 1 From the watch face, hold **MENU**.
- 2 Select **History > Totals > Odometer**.
- 3 Press **UP** or **DOWN** to view odometer totals.

# Notifications and Alerts Settings

From the watch face, hold **MENU**, and select Notifications & Alerts.

**Smart Notifications:** Customizes the smart notifications that appear on your watch ([Enabling Bluetooth Notifications, page 65](#)).

**System Alerts:** Sets time ([Setting Time Alerts, page 85](#)), barometer ([Setting a Storm Alert, page 58](#)), phone connection ([Turning On and Off Phone Connection Alerts, page 66](#)), health and wellness ([Health and Wellness Settings, page 77](#)), abnormal heart rate ([Setting an Abnormal Heart Rate Alert, page 53](#)), and battery alerts ([Customizing the Battery Saver Feature, page 82](#)).

# Appearance

You can customize the appearance of the watch face and the quick access features in the glance loop and controls menu.

## Watch Face Settings

You can customize the appearance of the watch face by selecting the layout, colors, and additional data. You can also download custom watch faces from the Connect IQ store.

### Customizing the Watch Face

You can customize the watch face information and appearance.

- 1 From the watch face, hold **MENU**.
- 2 Select **Watch Face**.
- 3 Press **UP** or **DOWN** to preview the watch face options.
- 4 Select **Add New** to create a custom watch face.
- 5 Scroll to a watch face, and press **GPS**.
- 6 Select an option:
  - To activate the watch face, select **Apply**.
  - To customize the data that appears on the watch face, select **Data**.
  - To customize the color of the data that appears on the watch face, select **Data Color**.
  - To customize the accent color of the watch face, select **Accent Color**.
  - To change the sport for the gauges on the performance watch face, select **Select Sport**.
  - To change the style of the hands for the analog watch face, select **Hands**.
  - To change the style of the numbers for the digital watch face, select **Layout**.
  - To change the style of the seconds for the digital watch face, select **Seconds**.

## Glances

Your watch comes preloaded with glances that provide quick information ([Viewing the Glance Loop, page 38](#)). Some glances require a Bluetooth connection to a compatible phone.

Some glances are not visible by default. You can add them to the glances list manually ([Customizing the Glance Loop, page 38](#)).

| Name                               | Description  |
|------------------------------------|--|
| ABC                                | Displays combined altimeter, barometer, and compass information.   |
| Alternate time zones               | Displays the current time of day in additional time zones ( <a href="#">Adding Alternate Time Zones, page 31</a> ).  |
| Altitude acclimation               | At altitudes above 800 m (2625 ft.), displays graphs showing altitude-corrected values for your average pulse oximeter reading, respiration rate, and resting heart rate for the last seven days.  |
| Altimeter                          | Displays the approximate elevation based on pressure changes.  |
| Barometer                          | Displays the environmental pressure data based on elevation.   |
| Body Battery™                      | With all-day wear, displays your current Body Battery level and a graph of your level for the last several hours ( <a href="#">Body Battery, page 39</a> ).  |
| Calendar                           | Displays upcoming meetings from your phone calendar.   |
| Calories                           | Displays your calorie information for the current day.   |
| Compass                            | Displays an electronic compass.  |
| Device usage                       | Displays the current software version and device usage statistics.   |
| Dog tracking                       | Displays your dog's location information when you have a compatible dog tracking device paired with your Instinct 3 watch.   |
| Floors climbed                     | Tracks your floors climbed and progress toward your goal.  |
| Garmin® coach                      | Displays scheduled workouts when you select a Garmin coach adaptive training plan in your Garmin Connect account. The plan adjusts to your current level of fitness, coaching and schedule preferences, and race date.   |
| Health Snapshot                    | Starts a Health Snapshot session on your watch that records several key health metrics while you hold still for two minutes. It provides a glimpse of your overall cardiovascular status. The watch records metrics such as your average heart rate, stress level, and respiration rate.<br>Displays summaries of your saved Health Snapshot sessions. |
| Heart rate                         | Displays your current heart rate in beats per minute (bpm) and a graph of your average resting heart rate (RHR).   |
| History                            | Displays your activity history and a graph of your recorded activities.  |
| HRV Status                         | Displays your seven-day average of your overnight heart rate variability ( <a href="#">Heart Rate Variability Status, page 40</a> ).   |
| Intensity minutes                  | Tracks your time spent participating in moderate to vigorous activities, your weekly intensity minutes goal, and progress toward your goal.  |
| inReach® controls                  | Allows you to send messages on your paired inReach device ( <a href="#">Using the inReach Remote, page 62</a> ).   |
| Last activity                      | Displays a brief summary of your last recorded activity.   |
| Last ride<br>Last run<br>Last swim | Displays a brief summary of your last recorded activity and history of the specified sport.  |
| Messenger                          | Displays your Garmin Messenger™ app conversations and allows you to reply to messages from your watch ( <a href="#">Garmin Messenger App, page 70</a> ).   |

| Name               | Description   |
|--------------------|---|
| Moon phase         | Displays the moonrise and moonset times, along with the moon phase, based on your GPS position.   |
| Music              | Provides music player controls for your phone.  |
| Naps               | Displays total nap time and Body Battery level gains. You can start the nap timer and set an alarm to wake you up ( <a href="#">Customizing Sleep Mode, page 86</a> ).  |
| Notifications      | Alerts you to incoming calls, texts, social network updates, and more, based on your phone notification settings ( <a href="#">Enabling Bluetooth Notifications, page 65</a> ).   |
| Performance        | Displays performance measurements that help you track and understand your training activities and race performances ( <a href="#">Performance Measurements, page 39</a> ).  |
| Primary race       | Displays the race event you designate as the primary race in your Garmin Connect calendar ( <a href="#">Race Calendar and Primary Race, page 46</a> ).  |
| Pulse oximeter     | Allows you to take a manual pulse oximeter reading ( <a href="#">Getting Pulse Oximeter Readings, page 55</a> ). If you are too active for the watch to determine your pulse oximeter reading, the measurements are not recorded. |
| Race calendar      | Displays your upcoming race events set in your Garmin Connect calendar ( <a href="#">Race Calendar and Primary Race, page 46</a> ).   |
| Respiration        | Your current respiration rate in breaths per minute and seven-day average. You can do a breathing activity to help you relax.   |
| Sleep score        | Displays total sleep time, a sleep score, and sleep stage information for the previous night.   |
| Sleep coach        | Provides recommendations for your sleep need based on sleep and activity history, HRV status, and naps.   |
| Steps              | Tracks your daily step count, step goal, and data for previous days.  |
| Stress             | Displays your current stress level and a graph of your stress level. You can do a breathing activity to help you relax. If you are too active for the watch to determine your stress level, stress measurements are not recorded. |
| Sunrise and sunset | Displays sunrise, sunset, and civil twilight times.   |
| Temperature        | Displays temperature data from the internal temperature sensor.   |
| Tides              | Displays information about a tide station, such as the tide height and when the next high and low tides will occur ( <a href="#">Viewing Tide Information, page 22</a> ).   |
| Training readiness | Displays a score and a short message that helps you determine how ready you are for training each day ( <a href="#">Training Readiness, page 46</a> ).  |
| Training status    | Displays your current training status and training load, which shows you how your training affects your fitness level and performance ( <a href="#">Training Status, page 42</a> ).   |
| VIRB® controls     | Provides camera controls when you have a VIRB device paired with your Instinct 3 watch ( <a href="#">VIRB Remote, page 62</a> ).  |
| Weather            | Displays the current temperature and weather forecast.  |
| Xero® device       | Displays laser location information when you have a compatible Xero device paired with your Instinct 3 watch ( <a href="#">Xero Laser Location Settings, page 64</a> ).   |

## Viewing the Glance Loop

Glances provide quick access to health data, activity information, built-in sensors, and more. When you pair your watch, you can view data from your phone, such as notifications, weather, and calendar events.

### 1 Press **UP** or **DOWN**.

The watch scrolls through the glance loop and displays summary data for each glance.

### 2 Press **GPS** to view more information.

### 3 Select an option:

- Press **DOWN** to view details about a glance.
- Press **GPS** to view additional options and functions for a glance.

## Customizing the Glance Loop

### 1 Hold **MENU**.

### 2 Select **Appearance > Glances**.

### 3 Select an option:

- To change the location of a glance in the loop, select a glance, and press **UP** or **DOWN**.
- To remove a glance from the loop, select a glance, and select **✕**.
- To add a glance to the loop, select **Add**, and select a glance.

**TIP:** You can select **Create Folder** to create folders that contain multiple glances ([Creating Glance Folders](#), page 38).

## Creating Glance Folders

You can customize the glance loop to create folders of related glances.

### 1 Hold **MENU**.

### 2 Select **Appearance > Glances > Add > Create Folder**.

### 3 Select the glances to include in the folder, and select **Done**.

**NOTE:** If the glances are already in the glance loop, you can move or copy them into the folder.

### 4 Select or enter a name for the folder.

### 5 Select an icon for the folder.

### 6 If necessary, select an option:

- To edit the folder, scroll to the folder in the glance loop, and hold **MENU**.
- To edit the glances in the folder, open the folder and select **Edit** ([Customizing the Glance Loop](#), page 38).

## Body Battery

Your watch analyzes your heart rate variability, stress level, sleep quality, and activity data to determine your overall Body Battery level. Like a gas gauge on a car, it indicates your amount of available reserve energy. The Body Battery level range is from 5 to 100, where 5 to 25 is very low reserve energy, 26 to 50 is low reserve energy, 51 to 75 is medium reserve energy, and 76 to 100 is high reserve energy.

You can sync your watch with your Garmin Connect account to view your most up-to-date Body Battery level, long-term trends, and additional details (*Tips for Improved Body Battery Data*, page 39).

### Tips for Improved Body Battery Data

- For more accurate results, wear the watch while sleeping.
- Good sleep charges your Body Battery.
- Strenuous activity and high stress can cause your Body Battery to drain more quickly.
- Food intake, as well as stimulants like caffeine, has no impact on your Body Battery.

## Performance Measurements

These performance measurements are estimates that can help you track and understand your training activities and race performances. The measurements require a few activities using wrist-based heart rate or a compatible chest heart rate monitor. Cycling performance measurements require a heart rate monitor and a power meter.

These estimates are provided and supported by Firstbeat Analytics™. For more information, go to [garmin.com/performance-data/running](https://garmin.com/performance-data/running).

**NOTE:** The estimates may seem inaccurate at first. The watch requires you to complete a few activities to learn about your performance.

**VO2 max.:** VO2 max. is the maximum volume of oxygen (in milliliters) you can consume per minute per kilogram of body weight at your maximum performance (*About VO2 Max. Estimates*, page 39).

**Predicted race times:** The watch uses the VO2 max. estimate and your training history to provide a target race time based on your current state of fitness (*Viewing Your Predicted Race Times*, page 40).

**HRV status:** The watch analyzes your wrist heart rate readings while you are sleeping to determine your heart rate variability (HRV) status based on your personal, long-term HRV averages (*Heart Rate Variability Status*, page 40).

**Performance condition:** Your performance condition is a real-time assessment after 6 to 20 minutes of activity. It can be added as a data field so you can view your performance condition during the rest of your activity. It compares your real-time condition to your average fitness level (*Performance Condition*, page 41).

**Functional threshold power (FTP):** The watch uses your user profile information from the initial setup to estimate your FTP (*Getting Your FTP Estimate*, page 41).

**Lactate threshold:** Lactate threshold requires a chest heart rate monitor. Lactate threshold is the point where your muscles start to rapidly fatigue. Your watch measures your lactate threshold level using heart rate data and pace (*Lactate Threshold*, page 42).

### About VO2 Max. Estimates

VO2 max. is the maximum volume of oxygen (in milliliters) you can consume per minute per kilogram of body weight at your maximum performance. In simple terms, VO2 max. is an indication of cardiovascular strength and should increase as your level of fitness improves. The Instinct 3 watch requires wrist-based heart rate or a compatible chest heart rate monitor to display your VO2 max. estimate. The watch has separate VO2 max. estimates for running and cycling. You must run either outside with GPS or ride with a compatible power meter at a moderate level of intensity for several minutes to get an accurate VO2 max. estimate.

On the watch, your VO2 max. estimate appears as a number and description. On your Garmin Connect account, you can view additional details about your VO2 max. estimate.

VO2 max. data is provided by Firstbeat Analytics. VO2 max. analysis is provided with permission from The Cooper Institute®. For more information, see the appendix (*VO2 Max. Standard Ratings*, page 108), and go to [www.CooperInstitute.org](http://www.CooperInstitute.org).

## Getting Your VO2 Max. Estimate for Running

This feature requires wrist-based heart rate or a compatible chest heart rate monitor. If you are using a chest heart rate monitor, you must put it on and pair it with your watch ([Pairing Your Wireless Sensors, page 60](#)).

For the most accurate estimate, complete the user profile setup ([Setting Up Your User Profile, page 72](#)), and set your maximum heart rate ([Setting Your Heart Rate Zones, page 73](#)). The estimate may seem inaccurate at first. The watch requires a few runs to learn about your running performance. You can disable VO2 max. recording for ultra run and trail run activities if you do not want those run types to affect your VO2 max. estimate ([Activities and App Settings, page 25](#)).

- 1 Start a running activity.
- 2 Run for at least 10 minutes outdoors.
- 3 After your run, select **Save**.
- 4 Press **UP** or **DOWN** to scroll through the performance measurements.

## Getting Your VO2 Max. Estimate for Cycling

This feature requires a power meter and wrist-based heart rate or a compatible chest heart rate monitor. The power meter must be paired with your watch ([Pairing Your Wireless Sensors, page 60](#)). If you are using a chest heart rate monitor, you must put it on and pair it with your watch.

For the most accurate estimate, complete the user profile setup ([Setting Up Your User Profile, page 72](#)) and set your maximum heart rate ([Setting Your Heart Rate Zones, page 73](#)). The estimate may seem inaccurate at first. The watch requires a few rides to learn about your cycling performance.

- 1 Start a cycling activity.
- 2 Ride at a steady, high intensity for at least 20 minutes.
- 3 After your ride, select **Save**.
- 4 Press **UP** or **DOWN** to scroll through the performance measurements.

## Viewing Your Predicted Race Times

For the most accurate estimate, complete the user profile setup ([Setting Up Your User Profile, page 72](#)), and set your maximum heart rate ([Setting Your Heart Rate Zones, page 73](#)).

Your watch uses the VO2 max. estimate and your training history to provide a target race time ([About VO2 Max. Estimates, page 39](#)). The watch analyzes several weeks of your training data to refine the race time estimates.

- 1 From the watch face, press **UP** or **DOWN** to view the performance glance.
- 2 Press **GPS** to view glance details.
- 3 Press **UP** or **DOWN** to view a predicted race time.
- 4 Press **GPS** to view predictions for other distances.

**NOTE:** The predictions may seem inaccurate at first. The watch requires a few runs to learn about your running performance.

## Heart Rate Variability Status

Your watch analyzes your wrist heart rate readings while you are sleeping to determine your heart rate variability (HRV). Training, physical activity, sleep, nutrition, and healthy habits all impact your heart rate variability. HRV values can vary widely based on gender, age, and fitness level. A balanced HRV status may indicate positive signs of health such as good training and recovery balance, greater cardiovascular fitness, and resilience to stress. An unbalanced or poor status may be a sign of fatigue, greater recovery needs, or increased stress. For best results, you should wear the watch while sleeping. The watch requires three weeks of consistent sleep data to display your heart rate variability status.

| Color Zone   | Status            | Description   |
|--|-------------------|---|
|  Green  | Balanced          | Your seven-day average HRV is within your baseline range.   |
|  Orange | Unbalanced        | Your seven-day average HRV is above or below your baseline range.   |
|  Red    | Low               | Your seven-day average HRV is well below your baseline range.   |
| No color   | Poor<br>No status | Your HRV values are averaging well below the normal range for your age.<br>No status means that there is insufficient data to generate a seven-day average. |

You can sync your watch with your Garmin Connect account to view your current heart rate variability status, trends, and educational feedback.

## Performance Condition

As you complete your activity, such as running or cycling, the performance condition feature analyzes your pace, heart rate, and heart rate variability to make a real-time assessment of your ability to perform compared to your average fitness level. It is approximately your real-time percentage deviation from your baseline VO2 max. estimate.

Performance condition values range from -20 to +20. After the first 6 to 20 minutes of your activity, the device displays your performance condition score. For example, a score of +5 means that you are rested, fresh, and capable of a good run or ride. You can add performance condition as a data field to one of your training screens to monitor your ability throughout the activity. Performance condition can also be an indicator of fatigue level, especially at the end of a long training run or ride.

**NOTE:** The device requires a few runs or rides with a heart rate monitor to get an accurate VO2 max. estimate and learn about your running or riding ability ([About VO2 Max. Estimates, page 39](#)).

## Viewing Your Performance Condition

This feature requires wrist-based heart rate or a compatible chest heart rate monitor.

- 1 Add **Perform. Cond.** to a data screen ([Customizing the Data Screens, page 24](#)).
- 2 Go for a run or ride.  
After 6 to 20 minutes, your performance condition appears.
- 3 Scroll to the data screen to view your performance condition throughout the run or ride.

## Getting Your FTP Estimate

Before you can get your functional threshold power (FTP) estimate, you must pair a chest heart rate monitor and power meter with your watch ([Pairing Your Wireless Sensors, page 60](#)), and you must get your VO2 max. estimate ([Getting Your VO2 Max. Estimate for Cycling, page 40](#)).

The watch uses your user profile information from the initial setup and your VO2 max. estimate to estimate your FTP. The watch automatically detects your FTP during rides at a steady, high intensity with heart rate and power.

- 1 Press **UP** or **DOWN** to view the performance glance.
- 2 Press **GPS** to view the glance details.
- 3 Press **UP** or **DOWN** to view your FTP estimate.

Your FTP estimate appears as a value measured in watts per kilogram, your power output in watts, and a position on the gauge.

For more information, see the appendix ([FTP Ratings, page 108](#)).

**NOTE:** When a performance notification alerts you to a new FTP, you can select Accept to save the new FTP, or Decline to keep your current FTP.

## Lactate Threshold

Lactate threshold is the exercise intensity at which lactate (lactic acid) starts to accumulate in the bloodstream. In running, this intensity level is estimated in terms of pace, heart rate, or power. When a runner exceeds the threshold, fatigue starts to increase at an accelerating rate. For experienced runners, the threshold occurs at approximately 90% of their maximum heart rate and between 10 km and half-marathon race pace. For average runners, the lactate threshold often occurs well below 90% of maximum heart rate. Knowing your lactate threshold can help you determine how hard to train or when to push yourself during a race.

If you already know your lactate threshold heart rate value, you can enter it in your user profile settings ([Setting Your Heart Rate Zones, page 73](#)). You can turn on the **Auto Detection** feature to automatically record your lactate threshold during an activity.

## Training Status

These measurements are estimates that can help you track and understand your training activities. The measurements require you to complete activities for two weeks using wrist-based heart rate or a compatible chest heart rate monitor. Cycling performance measurements require a heart rate monitor and a power meter. The measurements may seem inaccurate at first when the watch is still learning about your performance.

These estimates are provided and supported by Firstbeat Analytics. For more information, go to [garmin.com/performance-data/running](https://garmin.com/performance-data/running).

**Training status:** Training status shows you how your training affects your fitness and performance. Your training status is based on changes to your VO2 max., acute load, and HRV status over an extended time period.

**VO2 max.:** VO2 max. is the maximum volume of oxygen (in milliliters) you can consume per minute per kilogram of body weight at your maximum performance ([About VO2 Max. Estimates, page 39](#)). Your watch displays heat and altitude corrected VO2 max. values when you are acclimating to high heat environments or high altitude ([Heat and Altitude Performance Acclimation, page 43](#)).

**HRV:** HRV is your heart rate variability status over the last seven days ([Heart Rate Variability Status, page 40](#)).

**Acute load:** Acute load is a weighted sum of your recent exercise load scores including exercise duration and intensity. ([Acute Load, page 44](#)).

**Recovery time:** The recovery time displays how much time remains before you are fully recovered and ready for the next hard workout ([Recovery Time, page 44](#)).

## Training Status Levels

Training status shows you how your training affects your fitness level and performance. Your training status is based on changes to your VO2 max., acute load, and HRV status over an extended time period. You can use your training status to help plan future training and continue improving your fitness level.

**No Status:** The watch needs you to record multiple activities over two weeks, with VO2 max. results from running or cycling, to determine your training status.

**Detraining:** You have a break in your training routine or you are training much less than usual for a week or more. Detraining means that you are unable to maintain your fitness level. You can try increasing your training load to see improvement.

**Recovery:** Your lighter training load is allowing your body to recover, which is essential during extended periods of hard training. You can return to a higher training load when you feel ready.

**Maintaining:** Your current training load is enough to maintain your fitness level. To see improvement, try adding more variety to your workouts or increasing your training volume.

**Productive:** Your current training load is moving your fitness level and performance in the right direction. You should plan recovery periods into your training to maintain your fitness level.

**Peaking:** You are in ideal race condition. Your recently reduced training load is allowing your body to recover and fully compensate for earlier training. You should plan ahead, since this peak state can only be maintained for a short time.

**Overreaching:** Your training load is very high and counterproductive. Your body needs a rest. You should give yourself time to recover by adding lighter training to your schedule.

**Unproductive:** Your training load is at a good level, but your fitness is decreasing. Try focusing on rest, nutrition, and stress management.

**Strained:** There is imbalance between your recovery and training load. It is a normal result after a hard training or major event. Your body may be struggling to recover, so you should pay attention to your overall health.

## Tips for Getting Your Training Status

The training status feature depends on updated assessments of your fitness level, including at least one VO2 max. measurement per week ([About VO2 Max. Estimates, page 39](#)). Indoor run activities do not generate a VO2 max. estimate in order to preserve the accuracy of your fitness level trend. You can disable VO2 max. recording for ultra run and trail run activities if you do not want those run types to affect your VO2 max. estimate ([Activities and App Settings, page 25](#)).

To get the most out of the training status feature, you can try these tips.

- At least one time per week, run or ride outdoors with a power meter, and reach a heart rate higher than 70% of your maximum heart rate for at least 10 minutes.  
After using the watch for one or two weeks, your training status should be available.
- Record all of your fitness activities on your primary training device, allowing your watch to learn about your performance ([Syncing Activities and Performance Measurements, page 68](#)).
- Wear the watch consistently while you sleep, to continue generating an up-to-date HRV status. Having a valid HRV status can help maintain a valid training status when you do not have as many activities with VO2 max. measurements.

## Heat and Altitude Performance Acclimation

Environmental factors such as high temperature and altitude impact your training and performance. For example, high altitude training can have a positive impact on your fitness, but you may notice a temporary VO2 max. decline while exposed to high altitudes. Your Instinct 3 watch provides acclimation notifications and corrections to your VO2 max. estimate and training status when the temperature is above 22°C (72°F) and when the altitude is above 800 m (2625 ft.). You can keep track of your heat and altitude acclimation in the training status glance.

**NOTE:** The heat acclimation feature is available only for GPS activities and requires weather data from your connected phone.

## Acute Load

Acute load is a weighted sum of your excess post-exercise oxygen consumption (EPOC) for the last several days. The gauge indicates whether your current load is low, optimal, high, or very high. The optimal range is based on your individual fitness level and training history. The range adjusts as your training time and intensity increase or decrease.

## About Training Effect

Training Effect measures the impact of an activity on your aerobic and anaerobic fitness. Training Effect accumulates during the activity. As the activity progresses, the Training Effect value increases. Training Effect is determined by your user profile information and training history, and heart rate, duration, and intensity of your activity. There are seven different Training Effect labels to describe the primary benefit of your activity. Each label is color coded and corresponds to your training load focus. Each feedback phrase, for example, "Highly Impacting VO2 Max." has a corresponding description in your Garmin Connect activity details.

Aerobic Training Effect uses your heart rate to measure how the accumulated intensity of an exercise affects your aerobic fitness and indicates if the workout had a maintaining or improving effect on your fitness level. Your excess post-exercise oxygen consumption (EPOC) accumulated during exercise is mapped to a range of values that account for your fitness level and training habits. Steady workouts at moderate effort or workouts involving longer intervals (>180 seconds) have a positive impact on your aerobic metabolism and result in an improved aerobic Training Effect.

Anaerobic Training Effect uses heart rate and speed (or power) to determine how a workout affects your ability to perform at very high intensity. You receive a value based on the anaerobic contribution to EPOC and the type of activity. Repeated high-intensity intervals of 10 to 120 seconds have a highly beneficial impact on your anaerobic capability and result in an improved anaerobic Training Effect.

You can add Aerobic TE and Anaerobic TE as data fields to one of your training screens to monitor your numbers throughout the activity.

| Training Effect | Aerobic Benefit  | Anaerobic Benefit  |
|-----------------|--|--|
| From 0.0 to 0.9 | No benefit.  | No benefit.  |
| From 1.0 to 1.9 | Minor benefit.   | Minor benefit.   |
| From 2.0 to 2.9 | Maintains your aerobic fitness.                                    | Maintains your anaerobic fitness.                                  |
| From 3.0 to 3.9 | Impacts your aerobic fitness.                                      | Impacts your anaerobic fitness.                                    |
| From 4.0 to 4.9 | Highly impacts your aerobic fitness.                               | Highly impacts your anaerobic fitness.                             |
| 5.0             | Overreaching and potentially harmful without enough recovery time. | Overreaching and potentially harmful without enough recovery time. |

Training Effect technology is provided and supported by Firstbeat Analytics. For more information, go to [firstbeat.com](https://firstbeat.com).

## Recovery Time

You can use your Garmin device with wrist-based heart rate or a compatible chest heart rate monitor to display how much time remains before you are fully recovered and ready for the next hard workout.

**NOTE:** The recovery time recommendation uses your VO2 max. estimate and may seem inaccurate at first. The device requires you to complete a few activities to learn about your performance.

The recovery time appears immediately following an activity. The time counts down until it is optimal for you to attempt another hard workout. The device updates your recovery time throughout the day based on changes in sleep, stress, relaxation, and physical activity.

## Recovery Heart Rate

If you are training with wrist-based heart rate or a compatible chest heart rate monitor, you can check your recovery heart rate value after each activity. Recovery heart rate is the difference between your exercising heart rate and your heart rate two minutes after the exercise has stopped. For example, after a typical training run, you stop the timer. Your heart rate is 140 bpm. After two minutes of no activity or cool down, your heart rate is 90 bpm. Your recovery heart rate is 50 bpm (140 minus 90). Some studies have linked recovery heart rate to cardiac health. Higher numbers generally indicate healthier hearts.

**TIP:** For best results, you should stop moving for two minutes while the device calculates your recovery heart rate value.

**NOTE:** Your recovery heart rate is not calculated for low-impact activities, such as yoga.

## Pausing and Resuming Your Training Status

If you are injured or sick, you can pause your training status. You can continue to record fitness activities, but your training status, training load focus, recovery feedback, and workout recommendations are temporarily disabled.

You can resume your training status when you are ready to start training again. For best results, you need at least one VO2 max. measurement each week ([About VO2 Max. Estimates, page 39](#)).

- 1 When you want to pause your training status, select an option:
  - From the training status glance, hold **MENU**, and select **Options > Pause Training Status**.
  - From your Garmin Connect settings, select **Performance Stats > Training Status > ⋮ > Pause Training Status**.
- 2 Sync your watch with your Garmin Connect account.
- 3 When you want to resume your training status, select an option:
  - From the training status glance, hold **MENU**, and select **Options > Resume Training Status**.
  - From your Garmin Connect settings, select **Performance Stats > Training Status > ⋮ > Resume Training Status**.
- 4 Sync your watch with your Garmin Connect account.

## Training Readiness

Your training readiness is a score and a short message that helps you determine how ready you are for training each day. The score is continuously calculated and updated throughout the day using these factors:

- Sleep score (last night)
- Recovery time
- HRV status
- Acute load
- Sleep history (last 3 nights)
- Stress history (last 3 days)

| Color Zone   | Score     | Description                   |
|--|-----------|-------------------------------|
|  Purple | 95 to 100 | Prime<br>Best possible        |
|  Blue   | 75 to 94  | High<br>Ready for challenges  |
|  Green  | 50 to 74  | Moderate<br>Good to go        |
|  Orange | 25 to 49  | Low<br>Time to slow down      |
|  Red    | 1 to 24   | Poor<br>Let your body recover |

To see your training readiness trends over time, go to your Garmin Connect account.

## Training for a Race Event

Your watch can suggest daily workouts to help you train for a running or cycling event, if you have a VO2 max. estimate ([About VO2 Max. Estimates, page 39](#)).

- 1 On your phone or computer, go to your Garmin Connect calendar.
- 2 Select the day of the event, and add the race event.  
You can search for an event in your area or create your own event.
- 3 Add details about the event, and add the course if it's available.
- 4 Sync your watch with your Garmin Connect account.
- 5 On your watch, scroll to the primary event glance to see a countdown to your primary race event.
- 6 From the watch face, press **GPS**, and select a running or cycling activity.

**NOTE:** If you have completed at least one outdoor run with heart rate data or one ride with heart rate and power data, daily suggested workouts appear on your watch.

## Race Calendar and Primary Race

When you add a race event to your Garmin Connect calendar, you can view the event on your watch by adding the primary race glance ([Glances, page 35](#)). The event date must be in the next 365 days. The watch displays a countdown to the event, your goal time or predicted finish time (running events only), and weather information.

**NOTE:** Historical weather information for the location and date is available right away. Local forecast data appears approximately 14 days before the event.

If you add more than one race event, you are prompted to choose a primary event.

Depending on the available course data for your event, you can view elevation data, the course map, and add a PacePro plan ([PacePro™ Training, page 10](#)).

## Controls

The controls menu lets you quickly access watch features and options. You can add, reorder, and remove the options in the controls menu ([Customizing the Controls Menu, page 50](#)).

From any screen, hold **CTRL**.

| Icon  | Name                 | Description   |
|---|----------------------|---|
|    | ABC                  | Select to open the altimeter, barometer, and compass app.   |
|    | Alarm Clock          | Select to add or edit an alarm ( <a href="#">Setting an Alarm, page 29</a> ).   |
|    | Altimeter            | Select to open the altimeter screen.  |
|    | Alt. Time Zones      | Select to view the current time of day in additional time zones ( <a href="#">Adding Alternate Time Zones, page 31</a> ).   |
|    | Assistance           | Select to send an assistance request ( <a href="#">Requesting Assistance, page 76</a> ).  |
|    | Barometer            | Select to open the barometer screen.  |
|    | Battery Saver        | Select to enable the battery saver feature ( <a href="#">Customizing the Battery Saver Feature, page 82</a> ).  |
|    | Brightness           | Select to adjust the screen brightness ( <a href="#">Changing the Screen Settings, page 85</a> ).   |
|    | Broadcast Heart Rate | Select to turn on heart rate broadcasting to a paired device ( <a href="#">Broadcasting Heart Rate Data, page 54</a> ).   |
|    | Calendar             | Select to view upcoming events from your phone calendar.  |
|  | Clocks               | Select to open the Clocks app to set an alarm, timer, stopwatch, or view alternate time zones ( <a href="#">Clocks, page 29</a> ).  |
|  | Compass              | Select to open the compass screen.  |
|  | Display              | Turns off the screen for alerts, gestures, and Always On Display mode ( <a href="#">Changing the Screen Settings, page 85</a> ).  |
|  | Do Not Disturb       | Select to enable do not disturb mode to dim the screen and disable alerts and notifications. For example, you can use this mode while watching a movie.   |
|  | Find My Phone        | Select to play an audible alert on your paired phone, if it is within Bluetooth range. The Bluetooth signal strength appears on the Instinct watch screen, and it increases as you move closer to your phone. |
|  | Garmin Share         | Select to open the Garmin Share app ( <a href="#">Garmin Share, page 71</a> ).  |
|   | History              | Select to view your activity history, records, and totals.  |
|  | Lock Device          | Select to lock the buttons to prevent inadvertent presses.  |
|  | Messenger            | Select to open the Messenger app ( <a href="#">Using the Messenger Feature, page 70</a> ).  |
|  | Moon Phase           | Select to view moonrise and moonset times, along with the moon phase, based on your GPS position.   |
|  | Music Controls       | Select to control music playback on your phone.   |

| Icon  | Name             | Description   |
|---|------------------|---|
|    | Notifications    | Select to view calls, texts, social network updates, and more, based on your phone notification settings ( <a href="#">Enabling Bluetooth Notifications, page 65</a> ). |
|    | Phone            | Select to disable Bluetooth technology and your connection to your paired phone.  |
|    | Power Off        | Select to turn off the watch.   |
|    | Pulse Ox         | Select to open the pulse oximeter app ( <a href="#">Pulse Oximeter, page 54</a> ).  |
|    | Red Shift        | Select to turn the screen to shades of red to use the watch in low light conditions.  |
|    | Reference Point  | Select to set a reference point for navigation ( <a href="#">Setting a Reference Point, page 78</a> ).  |
|    | Save Location    | Select to save your current location to navigate back to it later ( <a href="#">Using the Saved App, page 22</a> ).   |
|    | Settings         | Select to open the settings menu.   |
|    | Sleep Mode       | Select to enable or disable Sleep Mode ( <a href="#">Customizing Sleep Mode, page 86</a> ).   |
|   | Stopwatch        | Select to start the stopwatch ( <a href="#">Using the Stopwatch, page 31</a> ).   |
|  | Strobe           | Select to turn on the LED flashlight strobe. You can create a custom strobe mode ( <a href="#">Editing the Custom Flashlight Strobe, page 50</a> ).                     |
|  | Sunrise & Sunset | Select to view sunrise, sunset, and twilight times.   |
|  | Sync             | Select to sync your watch with your paired phone.   |
|  | Time Sync        | Select to sync your watch with the time on your phone or using satellites.  |
|  | Timers           | Select to set a countdown timer ( <a href="#">Using a Countdown Timer, page 30</a> ).   |
|  | Torch            | Select to turn on the LED flashlight ( <a href="#">Using the Torch, page 50</a> ).  |
|  | Wallet           | Select to open your Garmin Pay™ wallet and pay for purchases with your watch ( <a href="#">Garmin Pay, page 50</a> ).   |
|  | Weather          | Select to view the current weather forecast and current conditions.   |

## Customizing the Controls Menu

You can add, remove, and change the order of the shortcut menu options in the controls menu ([Controls](#), page 47).

- 1 Hold **MENU**.
- 2 Select **Appearance > Controls**.
- 3 Select a shortcut to customize.
- 4 Select an option:
  - Select **Reorder** to change the location of the shortcut in the controls menu.
  - Select **Remove** to remove the shortcut from the controls menu.
- 5 If necessary, select **Add New** to add an additional shortcut to the controls menu.

## Using the Torch

### **WARNING**

This device may have a flashlight that can be programmed to flash at various intervals. Consult your physician if you have epilepsy or are sensitive to bright or flashing lights.

Using the torch (flashlight) can reduce battery life. You can reduce the brightness to extend the life of the battery.

- 1 Hold **CTRL**.
- 2 Select .
- 3 If necessary, press **GPS** to turn on the torch.
- 4 Select an option:
  - To adjust the brightness or color of the torch, press **UP** or **DOWN**.  
**TIP:** From any screen, you can quickly press **CTRL** twice to turn on the torch. For the first three seconds, you can press **UP** or **DOWN** to adjust the brightness or color of the torch.
  - To program the torch to flash in a selected pattern, hold **MENU**, select **Strobe**, select a mode, and press **GPS**.
  - To display your emergency contact information and program the torch to flash in a distress pattern, hold **MENU**, select **Distress Pattern**, and press **GPS**.

### **CAUTION**

Programming the torch to flash in a distress pattern will not contact your emergency contacts or emergency services on your behalf. Your emergency contact information will only appear if it has been configured in the Garmin Connect app.

## Editing the Custom Flashlight Strobe

- 1 Hold **CTRL**.
- 2 Select  > **CUSTOM**.
- 3 Press **GPS** to turn on the flashlight strobe (optional).
- 4 Select .
- 5 Press **UP** or **DOWN** to scroll to a strobe setting.
- 6 Press **GPS** to scroll through the setting options.
- 7 Press **BACK** to save.

## Garmin Pay

The Garmin Pay feature allows you to use your watch to pay for purchases in participating locations using credit or debit cards from a participating financial institution.

## Setting Up Your Garmin Pay Wallet

You can add one or more participating credit or debit cards to your Garmin Pay wallet. Go to [garmin.com/garminpay/banks](https://garmin.com/garminpay/banks) to find participating financial institutions.

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Garmin Pay > Get Started**.
- 3 Follow the on-screen instructions.

## Paying for a Purchase Using Your Watch

Before you can use your watch to pay for purchases, you must set up at least one payment card.

You can use your watch to pay for purchases in a participating location.

- 1 Hold **CTRL**.
- 2 Select .
- 3 Enter your four-digit passcode.  
**NOTE:** If you enter your passcode incorrectly three times, your wallet locks, and you must reset your passcode in the Garmin Connect app.  
Your most recently used payment card appears.
- 4 If you have added multiple cards to your Garmin Pay wallet, select **DOWN** to change to another card (optional).
- 5 Within 60 seconds, hold your watch near the payment reader, with the watch facing the reader.  
The watch vibrates and displays a check mark when it is finished communicating with the reader.
- 6 If necessary, follow the instructions on the card reader to complete the transaction.

**TIP:** After you successfully enter your passcode, you can make payments without a passcode for 24 hours while you continue to wear your watch. If you remove the watch from your wrist or disable heart rate monitoring, you must enter the passcode again before making a payment.

## Adding a Card to Your Garmin Pay Wallet

You can add up to 10 credit or debit cards to your Garmin Pay wallet.

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Garmin Pay >  > Add Card**.
- 3 Follow the on-screen instructions.

After the card is added, you can select the card on your watch when you make a payment.

## Managing Your Garmin Pay Cards

You can temporarily suspend or delete a card.

**NOTE:** In some countries, participating financial institutions may restrict the Garmin Pay features.

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Garmin Pay**.
- 3 Select a card.
- 4 Select an option:
  - To temporarily suspend or unsuspend the card, select **Suspend Card**.  
The card must be active to make purchases using your Instinct 3 watch.
  - To delete the card, select .

## Changing Your Garmin Pay Passcode

You must know your current passcode to change it. If you forget your passcode, you must reset the Garmin Pay feature for your Instinct 3 watch, create a new passcode, and reenter your card information.

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Garmin Pay > Change Passcode**.
- 3 Follow the on-screen instructions.

The next time you pay using your Instinct 3 watch, you must enter the new passcode.

## Morning Report

Your watch displays a morning report based on your normal wake time. Press **DOWN** to view the report, which includes weather, sleep, overnight heart rate variability status, and more ([Customizing Your Morning Report, page 52](#)).

### Customizing Your Morning Report

**NOTE:** You can customize these settings on you watch or in your Garmin Connect account.

- 1 Hold **MENU**.
- 2 Select **Appearance > Morning Report**.
- 3 Select an option:
  - Select **Show Report** to enable or disable the morning report.
  - Select **Edit Report** to customize the order and type of data that appears in your morning report.

## Sensors and Accessories

The Instinct 3 watch has several internal sensors, and you can pair additional wireless sensors for your activities.

### Wrist Heart Rate

Your watch has a wrist-based heart rate monitor, and you can view your heart rate data on the heart rate glance ([Viewing the Glance Loop, page 38](#)).

The watch is also compatible with chest heart rate monitors. If both wrist-based heart rate and chest heart rate data are available when you start an activity, your watch uses the chest heart rate data.

### Wearing the Watch

#### ⚠ CAUTION

Some users may experience skin irritation after prolonged use of the watch, especially if the user has sensitive skin or allergies. If you notice any skin irritation, remove the watch and give your skin time to heal. To help prevent skin irritation, ensure the watch is clean and dry, and do not overtighten the watch on your wrist. For more information, go to [garmin.com/fitandcare](http://garmin.com/fitandcare).

- Wear the watch above your wrist bone.

**NOTE:** The watch should be snug but comfortable. For more accurate heart rate readings, the watch should not shift while running or exercising. For pulse oximeter readings, you should remain motionless.

**NOTE:** The optical sensor is located on the back of the watch.

- See [Tips for Erratic Heart Rate Data, page 53](#) for more information about wrist-based heart rate.
- See [Tips for Erratic Pulse Oximeter Data, page 55](#) for more information about the pulse oximeter sensor.
- For more information about accuracy, go to [garmin.com/ataccuracy](http://garmin.com/ataccuracy).
- For more information about watch wear and care, go to [garmin.com/fitandcare](http://garmin.com/fitandcare).

## Tips for Erratic Heart Rate Data

If the heart rate data is erratic or does not appear, you can try these tips.

- Clean and dry your arm before putting on the watch.
  - Avoid wearing sunscreen, lotion, and insect repellent under the watch.
  - Avoid scratching the heart rate sensor on the back of the watch.
  - Wear the watch above your wrist bone. The watch should be snug but comfortable.
  - Wait until the  icon is solid before starting your activity.
  - Warm up for 5 to 10 minutes and get a heart rate reading before starting your activity.
- NOTE:** In cold environments, warm up indoors.
- Rinse the watch with fresh water after each workout.

## Wrist Heart Rate Monitor Settings

Hold **MENU**, and select **Sensors & Accessories > Wrist Heart Rate**.

**Status:** Enables or disables the wrist heart rate monitor. The default value is Auto, which automatically uses the wrist heart rate monitor unless you pair an external heart rate monitor.

**NOTE:** Disabling the wrist heart rate monitor also disables the wrist-based pulse oximeter sensor. You can perform a manual reading from the pulse oximeter glance.

**While Swimming:** Enables or disables the wrist heart rate monitor during swimming activities.

**Abnormal Heart Rate Alerts:** Allows you to set the watch to alert you when your heart rate exceeds or drops below a target value ([Setting an Abnormal Heart Rate Alert, page 53](#)).

**Broadcast Heart Rate:** Allows you to begin broadcasting your heart rate data to a paired device ([Broadcasting Heart Rate Data, page 54](#)).

## Setting an Abnormal Heart Rate Alert

### CAUTION

This feature only alerts you when your heart rate exceeds or drops below a certain number of beats per minute, as selected by the user, after a period of inactivity. This feature does not notify you when your heart rate drops below the selected threshold during your chosen sleep window configured in the Garmin Connect app. This feature does not notify you of any potential heart condition and is not intended to treat or diagnose any medical condition or disease. Always defer to your health care provider for any heart-related issues.

You can set the heart rate threshold value.

- 1 Hold **MENU**.
- 2 Select **Sensors & Accessories > Wrist Heart Rate > Abnormal Heart Rate Alerts**.
- 3 Select **High Alert** or **Low Alert**.
- 4 Set the heart rate threshold value.

Each time your heart rate exceeds or drops below the threshold value, a message appears and the watch vibrates.

## Broadcasting Heart Rate Data

You can broadcast your heart rate data from your watch and view it on paired devices. Broadcasting heart rate data decreases battery life.

**TIP:** You can customize the activity settings to broadcast your heart rate data automatically when you begin an activity (*Activities and App Settings, page 25*). For example, you can broadcast your heart rate data to an Edge® device while cycling.

1 Select an option:

- Hold **MENU**, and select **Sensors & Accessories** > **Wrist Heart Rate** > **Broadcast Heart Rate**.
- Hold **CTRL** to open the controls menu, and select .

**NOTE:** You can add options to the controls menu (*Customizing the Controls Menu, page 50*).

2 Press **GPS**.

The watch starts broadcasting your heart rate data.

3 Pair your watch with your compatible device.

**NOTE:** The pairing instructions differ for each Garmin compatible device. See your owner's manual.

4 Press **GPS** to stop broadcasting your heart rate data.

## Pulse Oximeter

Your watch has a wrist-based pulse oximeter to gauge the peripheral saturation of oxygen in your blood (SpO<sub>2</sub>). As your altitude increases, the level of oxygen in your blood can decrease. Knowing your oxygen saturation can help you determine how your body is acclimating to high altitudes for alpine sport and expedition.

You can manually begin a pulse oximeter reading by viewing the pulse oximeter glance (*Getting Pulse Oximeter Readings, page 55*). You can also turn on all-day readings (*Setting the Pulse Oximeter Mode, page 55*). When you view the pulse oximeter glance while you are not moving, your watch analyzes your oxygen saturation and your elevation. The elevation profile helps indicate how your pulse oximeter readings are changing, relative to your to elevation.

On the watch, your pulse oximeter reading appears as an oxygen saturation percentage and color on the graph. On your Garmin Connect account, you can view additional details about your pulse oximeter readings, including trends over multiple days.

For more information about pulse oximeter accuracy, go to [garmin.com/ataccuracy](https://garmin.com/ataccuracy).

|   |   |
|---|---|
| ① | The elevation scale.  |
| ② | A graph of your average oxygen saturation readings for the last 24 hours. |
| ③ | Your most recent oxygen saturation reading.                               |
| ④ | The oxygen saturation percentage scale.                                   |
| ⑤ | A graph of your elevation readings for the last 24 hours.                 |

## Getting Pulse Oximeter Readings

You can manually begin a pulse oximeter reading by viewing the pulse oximeter glance. The glance displays your most recent blood oxygen saturation percentage, a graph of your hourly average readings for the last 24 hours, and a graph of your elevation for the last 24 hours.

**NOTE:** The first time you view the pulse oximeter glance, the watch must acquire satellite signals to determine your elevation. You should go outside, and wait while the watch locates satellites.

- 1 While you are sitting or inactive, press **UP** or **DOWN** from the watch face to view the pulse oximeter glance.
- 2 Press **GPS** to view glance details and begin a pulse oximeter reading.
- 3 Remain motionless for up to 30 seconds.

**NOTE:** If you are too active for the watch to get a pulse oximeter reading, a message appears instead of a percentage. You can check again after several minutes of inactivity. For best results, hold the arm wearing the watch at heart level while the watch reads your blood oxygen saturation.

- 4 Press **DOWN** to view a graph of your pulse oximeter readings for the last seven days.

## Setting the Pulse Oximeter Mode

- 1 Hold **MENU**.
- 2 Select **Sensors & Accessories > Pulse Oximeter > Pulse Ox Mode**.
- 3 Select an option:
  - To turn off automatic measurements, select **Manual Check**.
  - To turn on continuous measurements while you sleep, select **During Sleep**.  
**NOTE:** Unusual sleep positions can cause abnormally low sleep-time SpO2 readings.
  - To turn on measurements while you are inactive during the day, select **All Day**.  
**NOTE:** Turning on **All Day** mode decreases battery life.

## Tips for Erratic Pulse Oximeter Data

If the pulse oximeter data is erratic or does not appear, you can try these tips.

- Remain motionless while the watch reads your blood oxygen saturation.
- Wear the watch above your wrist bone. The watch should be snug but comfortable.
- Hold the arm wearing the watch at heart level while the watch reads your blood oxygen saturation.
- Use a silicone or nylon band.
- Clean and dry your arm before putting on the watch.
- Avoid wearing sunscreen, lotion, and insect repellent under the watch.
- Avoid scratching the optical sensor on the back of the watch.
- Rinse the watch with fresh water after each workout.

## Compass

The watch has a 3-axis compass with automatic calibration. The compass features and appearance change depending on your activity, whether GPS is enabled, and whether you are navigating to a destination. You can change the compass settings manually ([Compass Settings, page 56](#)).

### Setting the Compass Heading

- 1 From the compass glance, press **GPS**.
- 2 Select **Lock Heading**.
- 3 Point the top of the watch toward your heading, and press **GPS**.

When you deviate from the heading, the compass displays the direction from the heading and degree of deviation.

### Compass Settings

Hold **MENU**, and select **Sensors & Accessories > Compass**.

**Calibrate:** Allows you to manually calibrate the compass sensor ([Calibrating the Compass Manually, page 56](#)).

**Display:** Sets the directional heading on the compass to letters, degrees, or milliradians.

**North Ref.:** Sets the north reference of the compass ([Setting the North Reference, page 56](#)).

**Mode:** Sets the compass to use electronic-sensor data only (On), a combination of GPS and electronic-sensor data when moving (Auto), or GPS data only (Off).

### Calibrating the Compass Manually

#### NOTICE

Calibrate the electronic compass outdoors. To improve heading accuracy, do not stand near objects that influence magnetic fields, such as vehicles, buildings, and overhead power lines.

Your watch was already calibrated at the factory, and the watch uses automatic calibration by default. If you experience irregular compass behavior, for example, after moving long distances or after extreme temperature changes, you can manually calibrate the compass.

- 1 Hold **MENU**.
- 2 Select **Sensors & Accessories > Compass > Calibrate > Start**.
- 3 Follow the on-screen instructions.  
**TIP:** Move your wrist in a small figure eight motion until a message appears.

### Setting the North Reference

You can set the directional reference used in calculating heading information.

- 1 Hold **MENU**.
- 2 Select **Sensors & Accessories > Compass > North Ref.**
- 3 Select an option:
  - To set geographic north as the heading reference, select **True**.
  - To set the magnetic declination for your location automatically, select **Magnetic**.
  - To set grid north (000°) as the heading reference, select **Grid**.
  - To set the magnetic variation value manually, select **User > Mag. Variation**, enter the magnetic variation, and select **Done**.

## Altimeter and Barometer

The watch contains an internal altimeter and barometer. The watch collects elevation and pressure data continuously, even in low-power mode. The altimeter displays your approximate elevation based on pressure changes. The barometer displays environmental pressure data based on the fixed elevation where the altimeter was most recently calibrated ([Altimeter Settings, page 57](#)).

## Altimeter Settings

Hold **MENU**, and select **Sensors & Accessories > Altimeter**.

**Calibrate:** Allows you to manually calibrate the altimeter sensor.

**Auto Cal.:** Allows the altimeter to self-calibrate each time you use satellite systems.

**Sensor Mode:** Sets the mode for the sensor. The Auto option uses both the altimeter and barometer according to your movement. You can use the Altimeter Only option when your activity involves changes in altitude, or the Barometer Only option when your activity does not involve changes in altitude.

**Elevation:** Sets the units of measure for elevation.

### Calibrating the Barometric Altimeter

Your watch was already calibrated at the factory, and the watch uses automatic calibration at your GPS starting point by default. You can manually calibrate the barometric altimeter if you know the correct elevation.

1 Hold **MENU**.

2 Select **Sensors & Accessories > Altimeter**.

3 Select an option:

- To calibrate automatically from your GPS starting point, select **Auto Cal.**
- To enter the current elevation manually, select **Calibrate > Enter Manually**.
- To enter the current elevation from the digital elevation model, select **Calibrate > Use DEM**.  
**NOTE:** Some watches require a phone connection to use DEM for calibration.
- To enter the current elevation from your GPS location, select **Calibrate > Use GPS**.

## Barometer Settings

Hold **MENU**, and select **Sensors & Accessories > Barometer**.

**Calibrate:** Allows you to manually calibrate the barometer sensor.

**Plot:** Sets the time scale for the chart in the barometer glance.

**Storm Alert:** Sets the rate of barometric pressure change that triggers a storm alert.

**Sensor Mode:** Sets the mode for the sensor. The Auto option uses both the altimeter and barometer according to your movement. You can use the Altimeter Only option when your activity involves changes in altitude, or the Barometer Only option when your activity does not involve changes in altitude.

**Pressure:** Sets how the watch displays pressure data.

### Calibrating the Barometer

Your watch was already calibrated at the factory, and the watch uses automatic calibration at your GPS starting point by default. You can manually calibrate the barometer if you know the correct elevation or the correct sea level pressure.

1 Hold **MENU**.

2 Select **Sensors & Accessories > Barometer > Calibrate**.

3 Select an option:

- To enter the current elevation and sea level pressure (optional), select **Enter Manually**.
- To calibrate automatically from the digital elevation model, select **Use DEM**.  
**NOTE:** Some watches require a phone connection to use DEM for calibration.
- To calibrate automatically from your GPS starting point, select **Use GPS**.

## Setting a Storm Alert

### WARNING

This alert is an informational feature and is not intended to be the primary source for tracking changes in the weather. It is your responsibility to review weather reports and conditions, to remain aware of your surroundings, and to use safe judgment, especially during times of severe weather. Failure to heed this warning could result in serious personal injury or death.

---

- 1 Hold **MENU**.
- 2 Select **Notifications & Alerts > System Alerts > Barometer > Storm Alert**.
- 3 Select an option:
  - Select **Status** to turn the alert on or off.
  - Select **Rate** to update the rate of barometric pressure change that triggers a storm alert.

## Wireless Sensors

Your watch can be paired and used with wireless sensors using ANT+ or Bluetooth technology (*Pairing Your Wireless Sensors*, page 60). After the devices are paired, you can customize the optional data fields (*Customizing the Data Screens*, page 24). If your watch was packaged with a sensor, they are already paired. For information about specific Garmin sensor compatibility, purchasing, or to view the owner's manual, go to [buy.garmin.com](http://buy.garmin.com) for that sensor.

| Sensor Type          | Description   |
|----------------------|---|
| Club Sensors         | You can use Approach CT10 golf club sensors to automatically track your golf shots, including location, distance, and club type.  |
| DogTrack             | Allows you to receive data from a compatible handheld dog tracking device.  |
| eBike                | You can use your watch with your eBike and view bike data, such as battery and range information, during your rides.  |
| Extended Display     | You can use the Extended Display mode to display data screens from your watch on a compatible Edge bike computer during a ride or triathlon.  |
| External Heart Rate  | You can use an external sensor, such as the HRM-Pro™ series or HRM-Fit™ heart rate monitor, to view heart rate data during your activities.   |
| Foot Pod             | You can use a foot pod to record pace and distance instead of using GPS when you are training indoors or when your GPS signal is weak.  |
| inReach              | The inReach remote function allows you to control your inReach satellite communicator using your Instinct watch ( <a href="#">Using the inReach Remote, page 62</a> ).  |
| Lights               | You can use Varia™ smart bike lights to improve situational awareness.  |
| PC                   | You can play video games on your computer and see real-time statistics on your device ( <a href="#">Using the Garmin GameOn™ App, page 18</a> ).  |
| Power                | You can use the Rally™ or Vector™ power meter bike pedals to view your power data on your watch. You can adjust your power zones to match your goals and abilities ( <a href="#">Setting Your Power Zones, page 74</a> ), or use range alerts to be notified when you reach a specified power zone ( <a href="#">Setting an Alert, page 28</a> ). |
| Radar                | You can use a Varia rearview bike radar to improve situational awareness and send alerts about approaching vehicles.  |
| RD Pod               | You can use a Running Dynamics Pod to record running dynamics data and view it on your watch ( <a href="#">Running Dynamics, page 60</a> ).   |
| Smart Trainer        | You can use your watch with an indoor bike smart trainer to simulate resistance while following a course, ride, or workout ( <a href="#">Using an Indoor Trainer, page 13</a> ).  |
| Speed/ Cadence       | You can attach speed or cadence sensors to your bike and view the data during your ride. If necessary, you can manually enter your wheel circumference ( <a href="#">Wheel Size and Circumference, page 109</a> ).  |
| Tempe                | You can attach the tempe™ temperature sensor to a secure strap or loop where it is exposed to ambient air, so it provides a consistent source of accurate temperature data.   |
| VIRB                 | The VIRB remote function allows you to control your VIRB action camera using your watch ( <a href="#">VIRB Remote, page 62</a> ).   |
| XERO Laser Locations | You can view and share laser location information from a Xero device ( <a href="#">Xero Laser Location Settings, page 64</a> ).   |

## Pairing Your Wireless Sensors

Before you can pair, you must put on the heart rate monitor or install the sensor.

The first time you connect a wireless sensor to your watch using ANT+ or Bluetooth technology, you must pair the watch and sensor. If the sensor has both ANT+ and Bluetooth technology, Garmin recommends that you pair using ANT+ technology. After they are paired, the watch connects to the sensor automatically when you start an activity and the sensor is active and within range.

- 1 Bring the watch within 3 m (10 ft.) of the sensor.

**NOTE:** Stay 10 m (33 ft.) away from other wireless sensors while pairing.

- 2 Hold **MENU**.

- 3 Select **Sensors & Accessories > Add New**.

**TIP:** When you start an activity with the Auto Discover option enabled, the watch automatically searches for nearby sensors and asks if you want to pair them.

- 4 Select an option:

- Select **Search All**.
- Select your sensor type.

After the sensor is paired with your watch, the sensor status changes from Searching to Connected. Sensor data appears in the data screen loop or a custom data field. You can customize the optional data fields ([Customizing the Data Screens, page 24](#)).

## Heart Rate Accessory Running Pace and Distance

The HRM-Fit and HRM-Pro series accessories calculate your running pace and distance based on your user profile and the motion measured by the sensor on every stride. The heart rate monitor provides running pace and distance when GPS is not available, such as during treadmill running. You can view your running pace and distance on your compatible Instinct 3 watch when connected using ANT+ technology. You can also view it on compatible third-party training apps when connected using Bluetooth technology.

The pace and distance accuracy improves with calibration.

**Automatic calibration:** The default setting for your watch is **Auto Calibrate**. The heart rate accessory calibrates each time you run outside with it connected to your compatible Instinct 3 watch.

**NOTE:** Automatic calibration does not work for indoor, trail, or ultra run activity profiles ([Tips for Recording Running Pace and Distance, page 60](#)).

**Manual calibration:** You can select **Calibrate & Save** after a treadmill run with your connected heart rate accessory ([Calibrating the Treadmill Distance, page 10](#)).

### Tips for Recording Running Pace and Distance

- Update your Instinct 3 watch software ([Product Updates, page 90](#)).
- Complete several outdoor runs with GPS and your connected HRM-Fit or HRM-Pro series accessory. It's important that your outdoor range of paces matches your range of paces on the treadmill.
- If your run includes sand or deep snow, go to the sensor settings, and turn off **Auto Calibrate**.
- If you previously connected a compatible foot pod using ANT+ technology, set the foot pod status to **Off**, or remove it from the list of connected sensors.
- Complete a treadmill run with manual calibration ([Calibrating the Treadmill Distance, page 10](#)).
- If automatic and manual calibrations don't seem accurate, go to the sensor settings, and select **HRM Pace & Distance > Reset Calibration Data**.

**NOTE:** You can try turning off **Auto Calibrate**, and then manually calibrate again ([Calibrating the Treadmill Distance, page 10](#)).

## Running Dynamics

Running dynamics is real-time feedback about your running form. Your Instinct 3 watch has an accelerometer to calculate five running form metrics. For all six running form metrics, you must pair your Instinct 3 watch with the HRM-Fit, HRM-Pro series accessory, or other running dynamics accessory that measures torso movement. For more information, go to [garmin.com/performance-data/running](http://garmin.com/performance-data/running).

| Metric                             | Sensor Type                   | Description   |
|------------------------------------|-------------------------------|---|
| <b>Cadence</b>                     | Watch or compatible accessory | Cadence is the number of steps per minute. It displays the total steps (right and left combined).   |
| <b>Vertical oscillation</b>        | Watch or compatible accessory | Vertical oscillation is your bounce while running. It displays the vertical motion of your torso, measured in centimeters.  |
| <b>Ground contact time</b>         | Watch or compatible accessory | Ground contact time is the amount of time in each step that you spend on the ground while running. It is measured in milliseconds.<br><b>NOTE:</b> Ground contact time and balance are not available while walking. |
| <b>Ground contact time balance</b> | Compatible accessory only     | Ground contact time balance displays the left/right balance of your ground contact time while running. It displays a percentage. For example, 53.2 with an arrow pointing left or right.                            |
| <b>Stride length</b>               | Watch or compatible accessory | Stride length is the length of your stride from one footfall to the next. It is measured in meters.   |
| <b>Vertical ratio</b>              | Watch or compatible accessory | Vertical ratio is the ratio of vertical oscillation to stride length. It displays a percentage. A lower number typically indicates better running form.   |

### Tips for Missing Running Dynamics Data

This topic provides tips for using a compatible running dynamics accessory. If the accessory is not connected to your watch, the watch automatically switches to wrist-based running dynamics.

- Make sure you have a running dynamics accessory, such as the HRM-Fit or HRM-Pro series accessory.
- Pair the running dynamics accessory with your watch again, according to the instructions.
- If you are using an HRM-Fit or HRM-Pro series accessory, pair it with your watch using ANT+ technology, rather than Bluetooth technology.
- If the running dynamics data display shows only zeros, make sure the accessory is worn right-side up.

**NOTE:** Ground contact time and balance appears only while running. It is not calculated while walking.

**REMEMBER:** Ground contact time balance is not calculated with wrist-based running dynamics.

### Running Power

Garmin running power is calculated using measured running dynamics information, user mass, environmental data, and other sensor data. The power measurement estimates the amount of power a runner applies to the road surface, and it is displayed in watts. Using running power as a gauge of effort may suit some runners better than using either pace or heart rate. Running power can be more responsive than heart rate for indicating the level of effort, and it can account for the uphill, downhill, and wind, which a pace measurement does not do. For more information, go to [garmin.com/performance-data/running](https://www.garmin.com/performance-data/running).

Running power can be measured using a compatible running dynamics accessory or the watch sensors. You can customize the running power data fields to view your power output and make adjustments to your training ([Data Fields, page 94](#)). You can set up power alerts to be notified when you reach a specified power zone ([Activity Alerts, page 27](#)).

Running power zones are similar to cycling power zones. The values for the zones are default values based on gender, weight, and average ability, and may not match your personal abilities. You can manually adjust your zones on the watch or using your Garmin Connect account ([Setting Your Power Zones, page 74](#)).

## Running Power Settings

Hold **MENU**, select **Activities & Apps**, select a running activity, select the activity settings, and select **Running Power**.

**Status:** Enables or disables recording Garmin running power data. You can use this setting if you prefer to use third-party running power data.

**Source:** Allows you to select which device to use to record running power data. The Smart Mode option automatically detects and uses the running dynamics accessory, when available. The watch uses wrist-based running power data when an accessory is not connected.

**Account for Wind:** Enables or disables using wind data when calculating your running power. Wind data is a combination of the speed, heading, and barometer data from your watch and the available wind data from your phone.

## inReach Remote

The inReach remote function allows you to control your inReach satellite communicator using your Instinct watch. Go to [buy.garmin.com](http://buy.garmin.com) for more information about compatible devices.

### Using the inReach Remote

Before you can use the inReach remote function, you must add the inReach glance to the glance loop (*Customizing the Glance Loop*, page 38).

- 1 Turn on the inReach satellite communicator.
- 2 On your Instinct watch, press **UP** or **DOWN** from the watch face to view the inReach glance.
- 3 Press **GPS** to search for your inReach satellite communicator.
- 4 Press **GPS** to pair your inReach satellite communicator.
- 5 Press **GPS**, and select an option:
  - To send an SOS message, select **Initiate SOS**.  
**NOTE:** You should only use the SOS function in a real emergency situation.
  - To send a text message, select **Messages > New Message**, select the message contacts, and enter the message text or select a quick text option.
  - To send a preset message, select **Send Preset**, and select a message from the list.
  - To view the timer and distance traveled during an activity, select **Tracking**.

## VIRB Remote

The VIRB remote function allows you to control your VIRB action camera using your device.

## Controlling a VIRB Action Camera

Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the *VIRB Series Owner's Manual* for more information.

- 1 Turn on your VIRB camera.
- 2 Pair your VIRB camera with your Instinct watch ([Pairing Your Wireless Sensors, page 60](#)).  
The VIRB glance is automatically added to the glance loop.
- 3 Press **UP** or **DOWN** from the watch face to view the VIRB glance.
- 4 If necessary, wait while your watch connects to your camera.
- 5 Select an option:
  - To record video, select **Start Recording**.  
The video counter appears on the Instinct screen.
  - To take a photo while recording video, press **DOWN**.
  - To stop recording video, press **GPS**.
  - To take a photo, select **Take Photo**.
  - To take multiple photos in burst mode, select **Take Burst**.
  - To send the camera to sleep mode, select **Sleep Camera**.
  - To wake the camera from sleep mode, select **Wake Camera**.
  - To change video and photo settings, select **Settings**.

## Controlling a VIRB Action Camera During an Activity

Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the *VIRB Series Owner's Manual* for more information.

- 1 Turn on your VIRB camera.
- 2 Pair your VIRB camera with your Instinct watch ([Pairing Your Wireless Sensors, page 60](#)).  
When the camera is paired, a VIRB data screen is automatically added to activities.
- 3 During an activity, press **UP** or **DOWN** to view the VIRB data screen.
- 4 If necessary, wait while your watch connects to your camera.
- 5 Hold **MENU**.
- 6 Select **VIRB**.
- 7 Select an option:
  - To control the camera using the activity timer, select **Settings > Recording Mode > Timer Start/Stop**.  
**NOTE:** Video recording automatically starts and stops when you start and stop an activity.
  - To control the camera using the menu options, select **Settings > Recording Mode > Manual**.
  - To manually record video, select **Start Recording**.  
The video counter appears on the Instinct screen.
  - To take a photo while recording video, press **DOWN**.
  - To manually stop recording video, press **GPS**.
  - To take multiple photos in burst mode, select **Take Burst**.
  - To send the camera to sleep mode, select **Sleep Camera**.
  - To wake the camera from sleep mode, select **Wake Camera**.

## Xero Laser Location Settings

Before you can customize laser location settings, you must pair a compatible Xero device ([Pairing Your Wireless Sensors, page 60](#)).

Hold **MENU**, and select **Sensors & Accessories > XERO Laser Locations > Laser Locations**.

**During Activity:** Enables the display of laser location information from a compatible, paired Xero device during an activity.

**Share Mode:** Allows you to share laser location information publicly or broadcast it privately.

## Map

▲ represents your location on the map. Location names and symbols appear on the map. When you are navigating to a destination, your route is marked with a line on the map.

- Map navigation ([Panning and Zooming the Map, page 64](#))
- Map settings ([Map Settings, page 64](#))

## Panning and Zooming the Map

- 1 While navigating, press **UP** or **DOWN** to view the map.
- 2 Hold **MENU**.
- 3 Select **Pan/Zoom**.
- 4 Select an option:
  - To toggle between panning up and down, panning left and right, or zooming, press **GPS**.
  - To pan or zoom the map, press **UP** and **DOWN**.
  - To quit, press **BACK**.

## Map Settings

You can customize how the map appears in the map app and data screens.

From the watch face, hold **MENU**, and select **Map**.

**Orientation:** Sets the orientation of the map. The North Up option shows north at the top of the screen. The Track Up option shows your current direction of travel at the top of the screen.

**User Locations:** Shows saved locations on the map.

**Cities:** Shows city names on the map.

**Grid Lines:** Shows grid lines on the map.

**Auto Zoom:** Automatically selects the zoom level for optimal use of your map. When disabled, you must zoom in or out manually.

## Phone Connectivity Features

Phone connectivity features are available for your Instinct watch when you pair it using the Garmin Connect app ([Pairing Your Phone, page 65](#)).

- App features from the Garmin Connect app, the Connect IQ app, and more ([Phone Apps and Computer Applications, page 66](#))
- Glances ([Glances, page 35](#))
- Controls menu features ([Controls, page 47](#))
- Safety and tracking features ([Safety and Tracking Features, page 75](#))
- Phone interactions, such as notifications ([Enabling Bluetooth Notifications, page 65](#))

## Pairing Your Phone

To use the connected features on your watch, you must pair it directly through the Garmin Connect app, instead of from the Bluetooth settings on your phone.

- 1 During the initial setup on your watch, select **✓** when you are prompted to pair with your phone.  
**NOTE:** If you previously skipped the pairing process, you can hold **MENU**, and select **Phone > Pair Phone**.
- 2 Scan the QR code with your phone, and follow the on-screen instructions to complete the pairing and setup process.

## Enabling Bluetooth Notifications

Before you can enable notifications, you must pair the watch with a compatible phone ([Pairing Your Phone](#), page 65).

- 1 Hold **MENU**.
- 2 Select **Phone > Smart Notifications > Status > On**.
- 3 Select **General Use** or **During Activity**.
- 4 Select a notification type.
- 5 Select status, tone, and vibration preferences.
- 6 Press **BACK**.
- 7 Select privacy and timeout preferences.
- 8 Press **BACK**.
- 9 Select **Signature** to add a signature to your text message replies.

## Viewing Notifications

- 1 From the watch face, press **UP** or **DOWN** to view the notifications glance.
- 2 Press **GPS**.
- 3 Select a notification.
- 4 Press **GPS** for more options.
- 5 Press **BACK** to return to the previous screen.

## Receiving an Incoming Phone Call

When you receive a phone call on your connected phone, the Instinct watch displays the name or phone number of the caller.

- To accept the call, select **Accept**.  
**NOTE:** To talk to the caller, you must use your connected phone.
- To decline the call, select **Decline**.
- To decline the call and immediately send a text message reply, select **Reply**, and select a message from the list.  
**NOTE:** To send a text message reply, you must be connected to a compatible Android™ phone using Bluetooth technology.

## Replying to a Text Message

**NOTE:** This feature is available only for compatible Android phones.

When you receive a text message notification on your watch, you can send a quick reply by selecting from a list of messages. You can customize messages in the Garmin Connect app.

**NOTE:** This feature sends text messages using your phone. Regular text message limits and charges from your carrier and phone plan may apply. Contact your mobile carrier for more information about text message charges or limits.

- 1 From the watch face, press **UP** or **DOWN** to view the notifications glance.
- 2 Select a text message notification.
- 3 Press **GPS**.
- 4 Select **Reply**.
- 5 Select a message from the list.  
Your phone sends the selected message as an SMS text message.

## Managing Notifications

You can use your compatible phone to manage notifications that appear on your Instinct 3 watch.

Select an option:

- If you are using an iPhone®, go to the iOS® notifications settings, and select the notifications to show on your phone and watch.  
**NOTE:** All notifications that you enable on your iPhone also appear on your watch.
- If you are using an Android phone, from the Garmin Connect app, select **••• > Settings > Notifications > App Notifications**, and select the notifications that you want to appear on your watch.

## Turning On and Off Phone Connection Alerts

You can set the Instinct 3 watch to alert you when your paired phone connects and disconnects using Bluetooth technology.

**NOTE:** Phone connection alerts are turned off by default.

- 1 Hold **MENU**.
- 2 Select **System > Phone > Alerts**.

## Turning Off the Bluetooth Phone Connection

You can turn off the Bluetooth phone connection from the controls menu.

**NOTE:** You can add options to the controls menu ([Customizing the Controls Menu, page 50](#)).

- 1 Hold **CTRL** to view the controls menu.
- 2 Select  to turn off the Bluetooth phone connection on your Instinct watch.  
Refer to the owner's manual for your phone to turn off Bluetooth technology on your phone.

## Phone Apps and Computer Applications

You can connect your watch to multiple Garmin phone apps and computer applications using the same Garmin account.

## Garmin Connect

You can connect with your friends on Garmin Connect. Garmin Connect gives you the tools to track, analyze, share, and encourage each other. Record the events of your active lifestyle including runs, walks, rides, swims, hikes, triathlons, and more. To sign up for a free account, you can download the app from the app store on your phone ([garmin.com/connectapp](https://garmin.com/connectapp)), or go to [connect.garmin.com](https://connect.garmin.com).

**Store your activities:** After you complete and save an activity with your watch, you can upload that activity to your Garmin Connect account and keep it as long as you want.

**Analyze your data:** You can view more detailed information about your activity, including time, distance, elevation, heart rate, calories burned, cadence, running dynamics, an overhead map view, pace and speed charts, and customizable reports.

**NOTE:** Some data requires an optional accessory such as a heart rate monitor.

**Plan your training:** You can choose a fitness goal and load one of the day-by-day training plans.

**Track your progress:** You can track your daily steps, join a friendly competition with your connections, and meet your goals.

**Share your activities:** You can connect with friends to follow each other's activities or share links to your activities.

**Manage your settings:** You can customize your watch and user settings on your Garmin Connect account.

### Using the Garmin Connect App

After you pair your watch with your phone ([Pairing Your Phone, page 65](#)), you can use the Garmin Connect app to upload all of your activity data to your Garmin Connect account.

- 1 Verify the Garmin Connect app is running on your phone.
- 2 Bring your watch within 10 m (30 ft.) of your phone.

Your watch automatically syncs your data with the Garmin Connect app and your Garmin Connect account.

### Updating the Software Using the Garmin Connect App

Before you can update your watch software using the Garmin Connect app, you must have a Garmin Connect account, and you must pair the watch with a compatible phone ([Pairing Your Phone, page 65](#)).

Sync your watch with the Garmin Connect app ([Using the Garmin Connect App, page 67](#)).

When new software is available, the Garmin Connect app automatically sends the update to your watch.

The update is applied when you are not actively using the watch. When the update is complete, your watch restarts.

## Unified Training Status

When you use more than one Garmin device with your Garmin Connect account, you can choose which device is the primary data source for everyday use and for training purposes.

From the Garmin Connect app, select **•••** > **Settings**.

**Primary Training Device:** Sets the priority data source for training metrics like your training status and load focus.

**Primary Wearable:** Sets the priority data source for daily health metrics like steps and sleep. This should be the watch you wear most often.

**TIP:** For the most accurate results, Garmin recommends that you sync often with your Garmin Connect account.

### *Syncing Activities and Performance Measurements*

You can sync activities and performance measurements from other Garmin devices to your Instinct 3 watch using your Garmin Connect account. This allows your watch to more accurately reflect your training and fitness. For example, you can record a ride with an Edge bike computer, and view your activity details and recovery time on your Instinct 3 watch.

Sync your Instinct 3 watch and other Garmin devices to your Garmin Connect account.

**TIP:** You can set a primary training device and primary wearable in the Garmin Connect app ([Unified Training Status](#), page 68).

Recent activities and performance measurements from your other Garmin devices appear on your Instinct 3 watch.

## Using Garmin Connect on Your Computer

The Garmin Express™ application connects your watch to your Garmin Connect account using a computer. You can use the Garmin Express application to upload your activity data to your Garmin Connect account and to send data, such as workouts or training plans, from the Garmin Connect website to your watch. You can also install software updates and manage your Connect IQ apps.

- 1 Connect the watch to your computer using the USB cable.
- 2 Go to [garmin.com/express](http://garmin.com/express).
- 3 Download and install the Garmin Express application.
- 4 Open the Garmin Express application, and select **Add Device**.
- 5 Follow the on-screen instructions.

## Updating the Software Using Garmin Express

Before you can update your device software, you must have a Garmin Connect account, and you must download the Garmin Express application.

- 1 Connect the device to your computer using the USB cable.  
When new software is available, Garmin Express sends it to your device.
- 2 Follow the on-screen instructions.
- 3 Do not disconnect your device from the computer during the update process.

## Manually Syncing Data with Garmin Connect

**NOTE:** You can add options to the controls menu ([Customizing the Controls Menu](#), page 50).

- 1 Hold **CTRL** to view the controls menu.
- 2 Select **Sync**.

## Connect IQ Features

You can add Connect IQ apps, data fields, glances, and watch faces to your watch using the Connect IQ store on your watch or phone ([garmin.com/connectiqapp](https://garmin.com/connectiqapp)).

**Watch Faces:** Customize the appearance of the clock.

**Device Apps:** Add interactive features to your watch, such as glances and new outdoor and fitness activity types.

**Data Fields:** Download new data fields that present sensor, activity, and history data in new ways. You can add Connect IQ data fields to built-in features and pages.

### Downloading Connect IQ Features

Before you can download features from the Connect IQ app, you must pair your Instinct 3 watch with your phone ([Pairing Your Phone, page 65](#)).

- 1 From the app store on your phone, install and open the Connect IQ app.
- 2 If necessary, select your watch.
- 3 Select a Connect IQ feature.
- 4 Follow the on-screen instructions.

### Downloading Connect IQ Features Using Your Computer

- 1 Connect the watch to your computer using a USB cable.
- 2 Go to [apps.garmin.com](https://apps.garmin.com), and sign in.
- 3 Select a Connect IQ feature, and download it.
- 4 Follow the on-screen instructions.

## Garmin Explore™

The Garmin Explore website and app allow you to create courses, waypoints, and collections, plan trips, sync tracks, upload activities, and use cloud storage. They offer advanced planning both online and offline, allowing you to share and sync data with your compatible Garmin device. You can use the app to download maps for offline access, and then navigate anywhere without using your cellular service.

You can download the Garmin Explore app from the app store on your phone ([garmin.com/exploreapp](https://garmin.com/exploreapp)), or you can go to [explore.garmin.com](https://explore.garmin.com).

## Garmin Messenger App

### ⚠ WARNING

The inReach features of the Garmin Messenger app, including SOS, tracking, and inReach Weather, are not available without a connected inReach satellite communicator and an active satellite subscription. Always test the app outdoors before using it on a trip.

### ⚠ CAUTION

The non-satellite messaging features of the Garmin Messenger app alone should not be relied on as a primary method to obtain emergency assistance.

### NOTICE

The app works over both the internet (using a wireless connection or cellular data on your phone) and the Iridium® satellite network. If you are using cellular data, your paired phone must be equipped with a data plan and be in an area of network coverage where data is available. If you are in an area without network coverage, you must have an active satellite subscription for your inReach satellite communicator to use the Iridium satellite network.

You can use the app to message other Garmin Messenger app users, including friends and family without Garmin devices. Anyone can download the app and connect their phone, allowing them to communicate with other app users over the internet (no login is required). App users can also create group messaging threads with other SMS phone numbers. New members added to the group message can download the app to see what others are saying.

Messages sent using a wireless connection or cellular data on your phone do not incur data charges or additional charges on your satellite subscription. Messages received may incur charges if message delivery is attempted over both the Iridium satellite network and the internet. Standard text messaging rates for your cellular data plan apply.

You can download the Garmin Messenger app from the app store on your phone ([garmin.com/messengerapp](http://garmin.com/messengerapp)).

## Using the Messenger Feature

### ⚠ CAUTION

The non-satellite messaging features of the Garmin Messenger app alone should not be relied on as a primary method to obtain emergency assistance.

### NOTICE

To use the Messenger feature, your Instinct 3 watch must be connected to the Garmin Messenger app on your compatible phone using Bluetooth technology.

The Messenger feature on your watch allows you to view, compose, and reply to messages from the Garmin Messenger phone app.

1 From the watch face, press **UP** or **DOWN** to view the **Messenger** glance.

**TIP:** The Messenger feature is available as a glance, app, or controls menu option on your watch.

2 Press **GPS** to open the glance.

3 If this is your first time using the **Messenger** feature, scan the QR code with your phone, and follow the on-screen instructions to complete the pairing and setup process.

4 On your watch, select an option:

- To compose a new message, select **New Message**, select a recipient, and either select a pre-defined message or compose your own.
- To view a conversation, press **UP** or **DOWN**, and select a conversation.
- To reply to a message, select a conversation, select **Reply**, and either select a pre-defined message or compose your own.

## Garmin Golf™ App

The Garmin Golf app allows you to upload scorecards from your Instinct 3 device to view detailed statistics and shot analyses. Golfers can compete with each other at different courses using the Garmin Golf app. More than 43,000 courses have leaderboards that anyone can join. You can set up a tournament event and invite players to compete. With a Garmin Golf membership, you can view green contour data on your phone.

The Garmin Golf app syncs your data with your Garmin Connect account. You can download the Garmin Golf app from the app store on your phone ([garmin.com/golfapp](https://garmin.com/golfapp)).

## Garmin Share

### NOTICE

It is your responsibility to use discretion when sharing information with others. Always ensure you are aware of and comfortable with the individual with whom you share information.

The Garmin Share feature allows you to use Bluetooth technology to wirelessly share your data with other compatible Garmin devices. With Garmin Share enabled and compatible Garmin devices in range of each other, you can select saved locations, courses, and workouts to transfer to another device through a direct, secured device-to-device connection, without the need for a phone or Wi-Fi® connectivity.

### Sharing Data with Garmin Share

Before you can use this feature, you must have Bluetooth technology enabled on both compatible devices, and they must be within 3 m (10 ft.) of each other. When prompted, you must also consent to share your data with other Garmin devices using Garmin Share.

Your Instinct watch can send and receive data when connected to another compatible Garmin device ([Receiving Data with Garmin Share, page 71](#)). You can also transfer your data between different devices. For example, you can share a favorite course from your Edge bike computer to your compatible Garmin watch.

- 1 From the watch face, press **GPS**.
- 2 Select **Garmin Share** > **Share**.
- 3 Select a category, and select one item.
- 4 Select an option:
  - Select **Share**.
  - Select **Add More** > **Share** to select more than one item to share.
- 5 Wait while the device locates compatible devices.
- 6 Select a device.
- 7 Confirm the six-digit PIN matches on both devices, and select .
- 8 Wait while the devices transfer the data.
- 9 Select **Share Again** to share the same items with another user (optional).
- 10 Select **Done**.

### Receiving Data with Garmin Share

Before you can use this feature, you must have Bluetooth technology enabled on both compatible devices, and they must be within 3 m (10 ft.) of each other. When prompted, you must also consent to share your data with other Garmin devices using Garmin Share.

- 1 From the watch face, press **GPS**.
- 2 Select **Garmin Share**.
- 3 Wait while the device locates compatible devices in range.
- 4 Select .
- 5 Confirm the six-digit PIN matches on both devices, and select .
- 6 Wait while the devices transfer the data.
- 7 Select **Done**.

# User Profile

You can update your user profile on your watch or on the Garmin Connect app.

## Setting Up Your User Profile

You can update your sex, date of birth, height, weight, wrist, heart rate zone, and power zone. The watch uses this information to calculate accurate training data.

- 1 Hold **MENU**.
- 2 Select **User Profile**.
- 3 Select an option.

## Gender Settings

When you first set up the watch, you must choose a sex. Most fitness and training algorithms are binary. For the most accurate results, Garmin recommends selecting your sex assigned at birth. After the initial setup, you can customize the profile settings in your Garmin Connect account.

**Profile & Privacy:** Enables you to customize the data on your public profile.

**User Settings:** Sets your sex. If you select Not Specified, the algorithms that require a binary input will use the sex you specified when you first set up the watch.

## Viewing Your Fitness Age

Your fitness age gives you an idea of how your fitness compares with a person of the same sex. Your watch uses information, such as your age, body mass index (BMI), resting heart rate data, and vigorous activity history to provide a fitness age. If you have an Index™ scale, your watch uses the body fat percentage metric instead of BMI to determine your fitness age. Exercise and lifestyle changes can impact your fitness age.

**NOTE:** For the most accurate fitness age, complete the user profile setup ([Setting Up Your User Profile, page 72](#)).

- 1 Hold **MENU**.
- 2 Select **User Profile > Fitness Age**.

## About Heart Rate Zones

Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

## Fitness Goals

Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.

- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.

If you know your maximum heart rate, you can use the table ([Heart Rate Zone Calculations, page 74](#)) to determine the best heart rate zone for your fitness objectives.

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate. The default maximum heart rate is 220 minus your age.

## Setting Your Heart Rate Zones

The watch uses your user profile information from the initial setup to determine your default heart rate zones. You can set separate heart rate zones for sport profiles, such as running, cycling, and swimming. For the most accurate calorie data during your activity, set your maximum heart rate. You can also set each heart rate zone and enter your resting heart rate manually. You can manually adjust your zones on the watch or using your Garmin Connect account.

- 1 Hold **MENU**.
- 2 Select **User Profile > Heart Rate & Power Zones > Heart Rate**.
- 3 Select **Max. HR**, and enter your maximum heart rate.  
You can use the Auto Detection feature to automatically record your maximum heart rate during an activity ([Detecting Performance Measurements Automatically, page 74](#)).
- 4 Select **LTHR**, and enter your lactate threshold heart rate.  
You can use the Auto Detection feature to automatically record your lactate threshold during an activity ([Detecting Performance Measurements Automatically, page 74](#)).
- 5 Select **Resting HR > Set Custom**, and enter your resting heart rate.  
You can use the average resting heart rate measured by your watch, or you can set a custom resting heart rate.
- 6 Select **Zones > Based On**.
- 7 Select an option:
  - Select **%Max. HR** to view and edit the zones as a percentage of your maximum heart rate.
  - Select **%HRR** to view and edit the zones as a percentage of your heart rate reserve (maximum heart rate minus resting heart rate).
  - Select **%LTHR** to view and edit the zones as a percentage of your lactate threshold heart rate.
- 8 Select a zone, and enter a value for each zone.
- 9 Select **Sport Heart Rate**, and select a sport profile to add separate heart rate zones (optional).
- 10 Repeat the steps to add sport heart rate zones (optional).

## Letting the Watch Set Your Heart Rate Zones

The default settings allow the watch to detect your maximum heart rate and set your heart rate zones as a percentage of your maximum heart rate.

- Verify that your user profile settings are accurate ([Setting Up Your User Profile, page 72](#)).
- Run often with the wrist or chest heart rate monitor.
- Try a few heart rate training plans, available from your Garmin Connect account.
- View your heart rate trends and time in zones using your Garmin Connect account.

## Heart Rate Zone Calculations

| Zone | % of Maximum Heart Rate | Perceived Exertion   | Benefits   |
|------|-------------------------|--|--|
| 1    | 50–60%                  | Relaxed, easy pace, rhythmic breathing                                   | Beginning-level aerobic training, reduces stress           |
| 2    | 60–70%                  | Comfortable pace, slightly deeper breathing, conversation possible       | Basic cardiovascular training, good recovery pace          |
| 3    | 70–80%                  | Moderate pace, more difficult to hold conversation                       | Improved aerobic capacity, optimal cardiovascular training |
| 4    | 80–90%                  | Fast pace and a bit uncomfortable, breathing forceful                    | Improved anaerobic capacity and threshold, improved speed  |
| 5    | 90–100%                 | Sprinting pace, unsustainable for long period of time, labored breathing | Anaerobic and muscular endurance, increased power          |

## Setting Your Power Zones

The power zones use default values based on gender, weight, and average ability, and may not match your personal abilities. If you know your functional threshold power (FTP) or threshold power (TP) value, you can enter it and allow the software to calculate your power zones automatically. You can manually adjust your zones on the watch or using your Garmin Connect account.

- 1 Hold **MENU**.
- 2 Select **User Profile > Heart Rate & Power Zones > Power**.
- 3 Select an activity.
- 4 Select **Based On**.
- 5 Select an option:
  - Select **Watts** to view and edit the zones in watts.
  - Select **% FTP** or **% TP** to view and edit the zones as a percentage of your threshold power.
- 6 Select **FTP** or **Threshold Power**, and enter your value.  
You can use the Auto Detection feature to automatically record your threshold power during an activity ([Detecting Performance Measurements Automatically, page 74](#)).
- 7 Select a zone, and enter a value for each zone.
- 8 If necessary, select **Minimum**, and enter a minimum power value.

## Detecting Performance Measurements Automatically

The Auto Detection feature is turned on by default. The watch can automatically detect your maximum heart rate and lactate threshold during an activity. When paired with a compatible power meter, the watch can automatically detect your functional threshold power (FTP) during an activity.

- 1 Hold **MENU**.
- 2 Select **User Profile > Heart Rate & Power Zones > Auto Detection**.
- 3 Select an option.

# Safety and Tracking Features

## ⚠ CAUTION

The safety and tracking features are supplemental features and should not be relied on as a primary method to obtain emergency assistance. The Garmin Connect app does not contact emergency services on your behalf.

## NOTICE

To use the safety and tracking features, the Instinct 3 watch must be connected to the Garmin Connect app using Bluetooth technology. Your paired phone must be equipped with a data plan and be in an area of network coverage where data is available. You can enter emergency contacts in your Garmin Connect account.

For more information about safety and tracking features, go to [garmin.com/safety](https://garmin.com/safety).

**Assistance:** Allows you to send a message with your name, LiveTrack link, and GPS location (if available) to your emergency contacts.

**Incident detection:** When the Instinct 3 watch detects an incident during certain outdoor activities, the watch sends an automated message, LiveTrack link, and GPS location (if available) to your emergency contacts.

**LiveTrack:** Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a web page.

**Live Event Sharing:** Allows you to send messages to friends and family during an event, providing real-time updates.

**NOTE:** This feature is available only if your watch is connected to a compatible Android phone.

## Adding Emergency Contacts

Emergency contact phone numbers are used for the safety and tracking features.

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Safety & Tracking > Safety Features > Emergency Contacts > Add Emergency Contacts**.
- 3 Follow the on-screen instructions.

Your emergency contacts receive a notification when you add them as an emergency contact, and can accept or decline your request. If a contact declines, you must choose another emergency contact.

## Adding Contacts

You can add up to 50 contacts to the Garmin Connect app. Contact emails can be used with the LiveTrack feature. Three of these contacts can be used as emergency contacts ([Adding Emergency Contacts, page 75](#)).

- 1 From the Garmin Connect app, select ●●●.
- 2 Select **Contacts**.
- 3 Follow the on-screen instructions.

After you add contacts, you must sync your data to apply the changes to your Instinct 3 device ([Using the Garmin Connect App, page 67](#)).

## Turning Incident Detection On and Off

### CAUTION

Incident detection is a supplemental feature available only for certain outdoor activities. Incident detection should not be relied on as a primary method to obtain emergency assistance. The Garmin Connect app does not contact emergency services on your behalf.

### NOTICE

Before you can enable incident detection on your watch, you must set up emergency contacts in the Garmin Connect app ([Adding Emergency Contacts, page 75](#)). Your paired phone must be equipped with a data plan and be in an area of network coverage where data is available. Your emergency contacts must be able to receive emails or text messages (standard text messaging rates may apply).

- 1 Hold **MENU**.
- 2 Select **Safety > Incident Detection**.
- 3 Select a GPS activity.

**NOTE:** Incident detection is available only for certain outdoor activities.

When an incident is detected by your Instinct 3 watch and your phone is connected, the Garmin Connect app can send an automated text message and email with your name and GPS location (if available) to your emergency contacts. A message appears on your device and paired phone indicating your contacts will be informed after 15 seconds have elapsed. If assistance is not needed, you can cancel the automated emergency message.

## Requesting Assistance

### CAUTION

Assistance is a supplemental feature and should not be relied upon as a primary method to obtain emergency assistance. The Garmin Connect app does not contact emergency services on your behalf.

### NOTICE

Before you can request assistance, you must set up emergency contacts in the Garmin Connect app ([Adding Emergency Contacts, page 75](#)). Your paired phone must be equipped with a data plan and be in an area of network coverage where data is available. Your emergency contacts must be able to receive emails or text messages (standard text messaging rates may apply).

- 1 Hold **CTRL**.
- 2 When you feel three vibrations, release the button to activate the assistance feature.  
The countdown screen appears.  
**TIP:** You can select **Cancel** before the countdown is complete to cancel the message.

# Health and Wellness Settings

Hold **MENU**, and select **Health & Wellness**.

**Heart Rate:** Allows you to customize the wrist heart rate monitor settings (*Wrist Heart Rate Monitor Settings*, page 53).

**Pulse Ox Mode:** Allows you to select a pulse oximeter mode (*Setting the Pulse Oximeter Mode*, page 55).

**Daily Summary:** Enables the Body Battery daily summary that appears a few hours before the start of your sleep window. The daily summary provides insight on how your daily stress and activity history impacted your Body Battery level (*Body Battery*, page 39).

**Stress Alerts:** Notifies you when periods of stress have drained your Body Battery level.

**Rest Alerts:** Notifies you after you have a restful period and its impact on your Body Battery level.

**Move Alert:** Enables or disables the Move Alert feature (*Using the Move Alert*, page 77).

**Goal Alerts:** Allows you to turn on and off goal alerts, or turn them off only during activities. Goal alerts appear for your daily steps goal, daily floors climbed goal, and weekly intensity minutes goal.

**Move IQ:** Allows you to turn on and off Move IQ® events. When your movements match familiar exercise patterns, the Move IQ feature automatically detects the event and displays it in your timeline. The Move IQ events show activity type and duration, but they do not appear in your activities list or newsfeed. For more detail and accuracy, you can record a timed activity on your device.

## Auto Goal

Your device creates a daily step goal automatically, based on your previous activity levels. As you move during the day, the device shows your progress toward your daily goal.

If you choose not to use the auto goal feature, you can set a personalized step goal on your Garmin Connect account.

## Using the Move Alert

Sitting for prolonged periods of time can trigger undesirable metabolic state changes. The move alert reminds you to keep moving. After one hour of inactivity, Move! and the move bar appear. Additional segments appear after every 15 minutes of inactivity. The device also beeps or vibrates if audible tones are turned on (*System Settings*, page 84).

Go for a short walk (at least a couple of minutes) to reset the move alert.

## Intensity Minutes

To improve your health, organizations such as the World Health Organization recommend at least 150 minutes per week of moderate intensity activity, such as brisk walking, or 75 minutes per week of vigorous intensity activity, such as running.

The watch monitors your activity intensity and tracks your time spent participating in moderate to vigorous intensity activities (heart rate data is required to quantify vigorous intensity). The watch adds the amount of moderate activity minutes with the amount of vigorous activity minutes. Your total vigorous intensity minutes are doubled when added.

## Earning Intensity Minutes

Your Instinct 3 watch calculates intensity minutes by comparing your heart rate data to your average resting heart rate. If heart rate is turned off, the watch calculates moderate intensity minutes by analyzing your steps per minute.

- Start a timed activity for the most accurate calculation of intensity minutes.
- Wear your watch all day and night for the most accurate resting heart rate.

## Sleep Tracking

While you are sleeping, the watch automatically detects your sleep and monitors your movement during your normal sleep hours. You can set your normal sleep hours in the Garmin Connect app or in the watch settings (*Customizing Sleep Mode, page 86*). Sleep statistics include total hours of sleep, sleep stages, sleep movement, and sleep score. Your sleep coach provides sleep need recommendations based on your sleep and activity history, HRV status, and naps (*Glances, page 35*). Naps are added to your sleep statistics, and can also impact your recovery. You can view detailed sleep statistics on your Garmin Connect account.

**NOTE:** You can use do not disturb mode to turn off notifications and alerts, with the exception of alarms (*Controls, page 47*).

### Using Automated Sleep Tracking

- 1 Wear your watch while sleeping.
- 2 Upload your sleep tracking data to your Garmin Connect account (*Using the Garmin Connect App, page 67*).  
You can view your sleep statistics on your Garmin Connect account.  
You can view sleep information, including naps, on your Instinct 3 watch (*Glances, page 35*).

## Navigation

### Viewing and Editing Your Saved Locations

**TIP:** You can save a location from the controls menu (*Controls, page 47*).

- 1 From the watch face, press **GPS**.
- 2 Select **Navigate > Saved Locations**.
- 3 Select a saved location.
- 4 Select an option to view or edit the location details.

### Saving a Dual Grid Location

You can save your current location using dual grid coordinates to navigate back to the same location later.

- 1 From any screen, hold **GPS**.
- 2 Press **GPS**.
- 3 If necessary, press **DOWN** to edit location information.

### Setting a Reference Point

You can set a reference point to provide the heading and distance to a location or bearing.

- 1 Select an option:
  - Hold **CTRL**.  
**TIP:** You can set a reference point while you are recording an activity.
  - From the watch face, press **GPS**.
- 2 Select **Reference Point**.
- 3 Wait while the watch locates satellites.
- 4 Press **GPS**, and select **Add Point**.
- 5 Select a location or bearing to use as a reference point for navigation.  
The compass arrow and distance to your destination appear.
- 6 Point the top of the watch toward your heading.  
When you deviate from the heading, the compass displays the direction from the heading and degree of deviation.
- 7 If necessary, press **GPS**, and select **Change Point** to set a different reference point.

## Navigating to a Destination

You can use your watch to navigate to a destination or follow a course.

- 1 From the watch face, press **GPS**.
- 2 Select an option:
  - Select **Navigate**.
  - Select an activity, hold **MENU**, and select **Navigation**.
- 3 Select a category.
- 4 Respond to the on-screen prompts to choose a destination.
- 5 Select **Go To**.
- 6 Press **GPS** to begin navigation.

## Navigating to Your Starting Point During an Activity

You can navigate back to the starting point of your current activity in a straight line or along the path you traveled. This feature is available only for activities that use GPS.

- 1 During an activity, press **GPS**.
- 2 Select **Back to Start**, and select an option:
  - To navigate back to the starting point of your activity along the path you traveled, select **TracBack**.
  - To navigate back to the starting point of your activity in a straight line, select **Straight Line**.Your current location, the track to follow, and your destination appear on the map.

## Navigating with Sight 'N Go

You can point the watch at an object in the distance, such as a water tower, lock in the direction, and then navigate to the object.

- 1 From the watch face, press **GPS**.
- 2 Select an option:
  - Select **Navigate > Sight 'N Go**.
  - Select an activity, hold **MENU**, and select **Navigation > Sight 'N Go**.
- 3 Point the top of the watch at an object, and press **GPS**.  
Navigation information appears.
- 4 Press **GPS** to begin navigation.

## Marking and Starting Navigation to a Man Overboard Location

You can save a man overboard (MOB) location, and automatically start navigation back to it.

**TIP:** You can customize the hold function of the keys to access the MOB function ([Customizing the Hot Keys, page 86](#)).

- 1 From the watch face, press **GPS**.
- 2 Select an option:
  - Select **Navigate > Last MOB**.
  - Select an activity, hold **MENU**, and select **Navigation > Last MOB**.Navigation information appears.

## Stopping Navigation

- 1 During an activity, hold **MENU**.
- 2 Select **Stop Navigation**.

## Courses

### WARNING

This feature allows users to download courses created by other users. Garmin makes no representations about the safety, accuracy, reliability, completeness, or timeliness of courses created by third parties. Any use or reliance on courses created by third parties is at your own risk.

You can send a course from your Garmin Connect account to your device. After it is saved to your device, you can navigate the course on your device.

You can follow a saved course simply because it is a good route. For example, you can save and follow a bike friendly commute to work.

You can also follow a saved course, trying to match or exceed previously set performance goals. For example, if the original course was completed in 30 minutes, you can race against a Virtual Partner trying to complete the course in under 30 minutes.

### Creating and Following a Course on Your Device

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**.
- 4 Select **Navigation > Courses > Create New**.
- 5 Enter a name for the course, and select .
- 6 Select **Add Location**.
- 7 Select an option.
- 8 If necessary, repeat steps 6 and 7.
- 9 Select **Done > Do Course**.  
Navigation information appears.
- 10 Press **GPS** to begin navigation.

### Creating a Course on Garmin Connect

Before you can create a course on the Garmin Connect app, you must have a Garmin Connect account ([Garmin Connect](#), page 67).

- 1 From the Garmin Connect app, select **•••**.
- 2 Select **Training & Planning > Courses > Create Course**.
- 3 Select a course type.
- 4 Follow the on-screen instructions.
- 5 Select **Done**.

**NOTE:** You can send this course to your device ([Sending a Course to Your Device](#), page 80).

### Sending a Course to Your Device

You can send a course you created using the Garmin Connect app to your device ([Creating a Course on Garmin Connect](#), page 80).

- 1 From the Garmin Connect app, select **•••**.
- 2 Select **Training & Planning > Courses**.
- 3 Select a course.
- 4 Select .
- 5 Select your compatible device.
- 6 Follow the on-screen instructions.

## Viewing or Editing Course Details

You can view or edit course details before you navigate a course.

- 1 From the watch face, press **GPS**.
- 2 Select an activity.
- 3 Hold **MENU**.
- 4 Select **Navigation > Courses**.
- 5 Press **GPS** to select a course.
- 6 Select an option:
  - To begin navigation, select **Do Course**.
  - To create a custom pace band, select **PacePro**.
  - To view the course on the map and pan or zoom the map, select **Map**.
  - To begin the course in reverse, select **Do Course in Reverse**.
  - To view an elevation plot of the course, select **Elevation Plot**.
  - To change the course name, select **Name**.
  - To edit the course path, select **Edit**.
  - To delete the course, select **Delete**.

## Projecting a Waypoint

You can create a new location by projecting the distance and bearing from your current location to a new location.

**NOTE:** You may need to add the Project Wpt. app to the activities and apps list.

- 1 From the watch face, press **GPS**.
- 2 Select **Project Wpt.**
- 3 Press **UP** or **DOWN** to set the heading.
- 4 Press **GPS**.
- 5 Press **DOWN** to select a unit of measure.
- 6 Press **UP** to enter the distance.
- 7 Press **GPS** to save.

The projected waypoint is saved with a default name.

## Navigation Settings

You can customize the map features and appearance when navigating to a destination.

### Customizing Navigation Data Screens

- 1 From the watch face, press **GPS**.
- 2 Select **Navigation > Data Screens**.
- 3 Select an option:
  - Select **Map > Status** to turn on or off the map.
  - Select **Map > Data Field** to turn on or off a data field that shows routing information on the map.
  - Select **Up Ahead** to turn on or off information about upcoming course points.
  - Select **Guide** to turn on or off the guide screen that displays the compass bearing or course to follow while navigating.
  - Select **Elevation Plot** to turn on or off the elevation plot.
  - Select a screen to add, remove, or customize.

## Heading Settings

You can set the behavior of the pointer that appears when navigating.

Hold **MENU**, and select **Navigation > Type**.

**Bearing:** Points in the direction of your destination.

**Course:** Shows your relationship to the course line leading to the destination.

## Setting Navigation Alerts

You can set alerts to help you navigate to your destination.

- 1 Hold **MENU**.
- 2 Select **Navigation > Alerts**.
- 3 Select an option:
  - To set an alert for a specified distance from your final destination, select **Final Distance**.
  - To set an alert for the estimated time remaining until you reach your final destination, select **Final ETE**.
  - To set an alert when you stray from the course, select **Off Course**.
  - To enable turn-by-turn navigation prompts, select **Turn Prompts**.
- 4 If necessary, select **Status** to turn on the alert.
- 5 If necessary, enter a distance or time value, and select **✓**.

## Power Manager Settings

Hold **MENU**, and select **Power Manager**.

**Battery Saver:** Allows you to customize system settings to extend battery life in watch mode (*Customizing the Battery Saver Feature, page 82*).

**Power Modes:** Allows you to customize system settings, activity settings, and GPS settings to extend battery life during an activity (*Customizing Power Modes, page 83*).

**Battery Percentage:** Displays remaining battery life as a percentage.

**Battery Estimates:** Displays remaining battery life as an estimated number of days or hours.

## Customizing the Battery Saver Feature

The battery saver feature allows you to quickly adjust system settings to extend battery life in watch mode.

You can turn on the battery saver feature from the controls menu (*Controls, page 47*).

- 1 Hold **MENU**.
- 2 Select **Power Manager > Battery Saver**.
- 3 Select **Status** to turn on the battery saver feature.
- 4 Select **Edit**, and select an option:
  - Select **Watch Face** to enable a low-power watch face that updates once per minute.
  - Select **Phone** to disconnect your paired phone.
  - Select **Wrist Heart Rate** to turn off the wrist heart rate monitor.
  - Select **Pulse Oximeter** to turn off the pulse oximeter sensor.
  - Select **Always On Display** to turn off the screen when not in use.
  - Select **Brightness** to reduce the screen brightness.

The watch displays the hours of battery life gained with each setting change.

- 5 Select **Low Battery Alert** to receive an alert when the battery power is low.

## Changing the Power Mode

You can change the power mode to extend battery life during an activity.

- 1 During an activity, hold **MENU**.
- 2 Select **Power Mode**.
- 3 Select an option.

The watch displays the hours of battery life available with the selected power mode.

## Customizing Power Modes

Your device comes preloaded with several power modes, allowing you to quickly adjust system settings, activity settings, and GPS settings to extend battery life during an activity. You can customize existing power modes and create new custom power modes.

- 1 Hold **MENU**.
- 2 Select **Power Manager > Power Modes**.
- 3 Select an option:
  - Select a power mode to customize.
  - Select **Add** to create a custom power mode.
- 4 If necessary, enter a custom name.
- 5 Select an option to customize specific power mode settings.  
For example, you can change the GPS setting or disconnect your paired phone.  
The watch displays the hours of battery life gained with each setting change.
- 6 If necessary, select **Done** to save and use the custom power mode.

## Restoring a Power Mode

You can reset a preloaded power mode to the factory default settings.

- 1 Hold **MENU**.
- 2 Select **Power Manager > Power Modes**.
- 3 Select a preloaded power mode.
- 4 Select **Restore > ✓**.

# System Settings

Hold **MENU**, and select **System**.

**Language:** Sets the language displayed on the watch.

**Time:** Adjusts the time settings ([Time Settings, page 84](#)).

**Display:** Adjusts the screen settings ([Changing the Screen Settings, page 85](#)).

**Satellites:** Sets the default satellite system to use for activities. If necessary, you can customize the satellite setting for each activity ([Satellite Settings, page 29](#)).

**Sound and Vibe:** Sets the watch sounds, such as button tones, alerts, and vibrations.

**Sleep Mode:** Sets your sleep hours and sleep mode preferences ([Customizing Sleep Mode, page 86](#)).

**Do Not Disturb:** Enables the Do Not Disturb mode. You can edit your preferences for the screen, notifications, alerts, and wrist gestures.

**Hot Keys:** Assigns shortcuts to buttons ([Customizing the Hot Keys, page 86](#)).

**Auto Lock:** Locks the buttons automatically to prevent accidental button presses. Use the During Activity option to lock the buttons during a timed activity. Use the General Use option to lock the buttons when you are not recording a timed activity.

**Format:** Sets general format preferences, such as the units of measure, pace and speed shown during activities, the start of the week, and geographical position format and datum options ([Changing the Units of Measure, page 86](#)).

**Perf. Condition:** Enables the performance condition feature during an activity ([Performance Condition, page 41](#)).

**Data Recording:** Sets how the watch records activity data. The Smart recording option (default) allows for longer activity recordings. The Every Second recording option provides more detailed activity recordings, but may not record entire activities that last for longer periods of time.

**USB Mode:** Sets the watch to use MTP (media transfer protocol) or Garmin mode when connected to a computer.

**Reset:** Allows you to reset user data and settings ([Resetting All Default Settings, page 91](#)).

**Software Update:** Installs downloaded software updates or enable automatic updates ([Product Updates, page 90](#)). You can select to view a list of new features from the last software update you installed.

**About:** Displays device, software, license, and regulatory information.

## Time Settings

Hold **MENU**, and select **System > Time**.

**Time Format:** Sets the watch to show time in a 12-hour, 24-hour, or military format.

**Date Format:** Sets the display order for the day, month, and year for dates.

**Set Time:** Sets the time zone for the watch. The Auto option sets the time zone automatically based on your GPS position.

**Time:** Allows you to adjust the time if the Set Time option is set to Manual.

**Alerts:** Allows you to set hourly alerts, as well as sunrise and sunset alerts that sound a specific number of minutes or hours before the actual sunrise or sunset occurs ([Setting Time Alerts, page 85](#)).

**Time Sync:** Allows you to manually sync the time when you change time zones, and to update for daylight saving time ([Syncing the Time, page 85](#)).

## Setting Time Alerts

- 1 Hold **MENU**.
- 2 Select **System > Time > Alerts**.
- 3 Select an option:
  - To set an alert to sound a specific number of minutes or hours before the actual sunset occurs, select **Til Sunset > Status > On**, select **Time**, and enter the time.
  - To set an alert to sound a specific number of minutes or hours before the actual sunrise occurs, select **Til Sunrise > Status > On**, select **Time**, and enter the time.
  - To set an alert to sound every hour, select **Hourly > On**.

## Syncing the Time

Each time you turn on the watch and acquire satellites or open the Garmin Connect app on your paired phone, the watch automatically detects your time zone and the current time of day. You can also manually sync the time when you change time zones, and to update for daylight saving time.

- 1 Hold **MENU**.
- 2 Select **System > Time > Time Sync**.
- 3 Wait while the watch connects to your paired phone or locates satellites ([Acquiring Satellite Signals, page 92](#)).

**TIP:** You can press **DOWN** to switch the source.

## Changing the Screen Settings

- 1 Hold **MENU**.
- 2 Select **System > Display**.
- 3 Select **Large Fonts** to increase the size of the text on the screen.
- 4 Select an option:
  - Select **During Activity**.
  - Select **General Use**.
  - Select **During Sleep**.
- 5 Select an option:
  - Select **Always On Display** to keep the watch face data visible and turn down the brightness and background. This option impacts the battery and display life ([About the AMOLED Display, page 86](#)).
  - Select **Brightness** to set the brightness level of the screen.
  - Select **Red Shift** to turn the screen to shades of red, green, or orange so that you can use the watch in low light conditions and help preserve your night vision.
  - Select **Alerts** to turn on the screen for alerts.
  - Select **Wrist Gesture** to turn on the screen by raising and turning your arm to look at your wrist.
  - Select **Timeout** to set the length of time before the screen turns off.

## Customizing Sleep Mode

- 1 Hold **MENU**.
- 2 Select **System > Sleep Mode**.
- 3 Select an option:
  - Select **Schedule**, select a day, and enter your normal sleep hours.
  - Select **Watch Face** to use the sleep watch face.
  - Select **Display** to configure the screen settings.
  - Select **Nap Alarm** to set nap alarms to play as a tone, vibration, or both.
  - Select **Do Not Disturb** to enable or disable do not disturb mode.
  - Select **Battery Saver** to enable or disable battery saver mode ([Customizing the Battery Saver Feature, page 82](#)).

## Customizing the Hot Keys

You can customize the hold function of individual buttons and combinations of buttons.

- 1 Hold **MENU**.
- 2 Select **System > Hot Keys**.
- 3 Select a button or combination of buttons to customize.
- 4 Select a function.

## Changing the Units of Measure

You can customize units of measure for distance, pace and speed, elevation, and more.

- 1 Hold **MENU**.
- 2 Select **System > Format > Units**.
- 3 Select a measurement type.
- 4 Select a unit of measure.

## Viewing Device Information

You can view device information, such as the unit ID, software version, regulatory information, and license agreement.

- 1 Hold **MENU**.
- 2 Select **System > About**.

## Viewing E-label Regulatory and Compliance Information

The label for this device is provided electronically. The e-label may provide regulatory information, such as identification numbers provided by the FCC or regional compliance markings, as well as applicable product and licensing information.

- 1 Hold **MENU**.
- 2 From the system menu, select **About**.

# Device Information

## About the AMOLED Display

By default, the watch settings are optimized for battery life and performance ([Tips for Maximizing the Battery Life, page 92](#)).

Image persistence, or pixel "burn-in," is normal behavior for AMOLED devices. To extend the display life, you should avoid displaying static images at high brightness levels for long time periods. To minimize burn-in, the Instinct 3 display turns off after the selected timeout ([Changing the Screen Settings, page 85](#)). You can turn your wrist toward your body, tap the touchscreen, or press a button to wake the watch.

## Charging the Watch

### ⚠ WARNING

This device contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

### NOTICE

To prevent corrosion, thoroughly clean and dry the contacts and the surrounding area before charging or connecting to a computer. Refer to the cleaning instructions (*Device Care*, page 88).

Your watch comes with a proprietary charging cable. For optional accessories and replacement parts, go to [buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer.

- 1 Plug the cable (▲ end) into the charging port on your watch.

- 2 Plug the other end of the cable into a USB-C® computer port or AC adapter (15 W minimum output power). The watch displays the current battery charge level.
- 3 Disconnect the watch after the battery charge level reaches 100%.

## Specifications

|  |  |
|--|--|
| Battery type                               | Rechargeable, built-in lithium-ion battery   |
| Water rating                               | 10 ATM <sup>1</sup>  |
| Operating and storage temperature range    | From -20° to 60°C (from -4° to 140°F)  |
| USB charging temperature range             | From 0° to 45°C (from 32° to 113°F)  |
| EU wireless frequencies and transmit power | Instinct 3 AMOLED - 45mm: 2.4 GHz @ 5.65 dBm maximum; Instinct 3 AMOLED - 50mm: 2.4 GHz @ 1.85 dBm maximum |

<sup>1</sup> The device withstands pressure equivalent to a depth of 100 m. For more information, go to [www.garmin.com/waterrating](http://www.garmin.com/waterrating).

## Battery Life Information

The actual battery life depends on the features enabled on your watch, such as activity tracking, wrist-based heart rate, phone notifications, GPS, internal sensors, and connected sensors (*Tips for Maximizing the Battery Life*, page 92).

| Mode                                       | Instinct 3 AMOLED - 45mm Battery Life                                   | Instinct 3 AMOLED - 50mm Battery Life                                   |

| Smartwatch mode                            | Up to 18 days with Wrist Gesture<br>Up to 7 days with Always On Display | Up to 24 days with Wrist Gesture<br>Up to 9 days with Always On Display |
| Battery saver watch mode                   | Up to 24 days   | Up to 30 days   |
| GPS only mode                              | Up to 32 hours  | Up to 40 hours  |
| All satellite systems mode                 | Up to 25 hours  | Up to 32 hours  |
| All satellite systems plus multi-band mode | Up to 23 hours <sup>2</sup>   | Up to 30 hours <sup>2</sup>   |
| Max. battery GPS mode                      | Up to 68 hours  | Up to 86 hours  |
| Expedition GPS activity mode               | Up to 16 days   | Up to 20 days   |

## Device Care

### NOTICE

Do not use a sharp object to clean the device.

Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes.

Thoroughly rinse the device with fresh water after exposure to chlorine, salt water, sunscreen, cosmetics, alcohol, or other harsh chemicals. Prolonged exposure to these substances can damage the case.

Avoid pressing the buttons under water.

Avoid extreme shock and harsh treatment, because it can degrade the life of the product.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

## Cleaning the Watch

### ⚠ CAUTION

Some users may experience skin irritation after prolonged use of the watch, especially if the user has sensitive skin or allergies. If you notice any skin irritation, remove the watch and give your skin time to heal. To help prevent skin irritation, ensure the watch is clean and dry, and do not overtighten the watch on your wrist.

### NOTICE

Even small amounts of sweat or moisture can cause corrosion of the electrical contacts when connected to a charger. Corrosion can prevent charging and data transfer.

**TIP:** For more information, go to [garmin.com/fitandcare](https://garmin.com/fitandcare).

- 1 Rinse with water, or use a damp lint-free cloth.
- 2 Allow the watch to dry completely.

<sup>2</sup> Assuming typical use with SatIQ technology

## Changing the Spring Bar Bands

You can replace the bands with new Instinct 3 watch bands or compatible QuickFit® bands. For information about compatible watch bands and sizes, go to your Instinct 3 watch product page at [buy.garmin.com](http://buy.garmin.com).

- 1 Push in the watch pin, and remove the band from the watch.

- 2 Select an option:

- To install Instinct 3 bands, align the new band with the holes on the watch, push in the watch pin, and press the band into place.

**NOTE:** Make sure the band is secure. The watch pin should align with the holes on the watch.

- To install compatible QuickFit bands, install a compatible watch pin on the watch, and press the new band into place.

**NOTE:** Make sure the band is secure. The latch should close over the watch pin.

- 3 Repeat the steps to change the other band.

# Troubleshooting

## Product Updates

Your device automatically checks for updates when connected to Bluetooth. You can manually check for updates from the system settings (*System Settings*, page 84). On your computer, install Garmin Express ([garmin.com/express](http://garmin.com/express)). On your phone, install the Garmin Connect app.

This provides easy access to these services for Garmin devices:

- Software updates
- Course updates
- Data uploads to Garmin Connect
- Product registration

## Getting More Information

You can find more information about this product on the Garmin website.

- Go to [support.garmin.com](http://support.garmin.com) for additional manuals, articles, and software updates.
- Go to [buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer for information about optional accessories and replacement parts.
- Go to [www.garmin.com/ataccuracy](http://www.garmin.com/ataccuracy) for information about feature accuracy.

This is not a medical device.

## My device is in the wrong language

You can change the device language selection if you have accidentally selected the wrong language on the device.

- 1 Hold **MENU**.
- 2 Scroll down to the last item in the list, and press **GPS**.
- 3 Press **GPS**.
- 4 Select your language.
- 5 Press **GPS**.

## Is my phone compatible with my watch?

The Instinct 3 watch is compatible with phones using Bluetooth technology.

Go to [garmin.com/ble](http://garmin.com/ble) for Bluetooth compatibility information.

## My phone will not connect to the watch

If your phone will not connect to the watch, you can try these tips.

- Turn off your phone and your watch, and turn them back on again.
- Enable Bluetooth technology on your phone.
- Update the Garmin Connect app to the latest version.
- Remove your watch from the Garmin Connect app and the Bluetooth settings on your phone to retry the pairing process.
- If you bought a new phone, remove your watch from the Garmin Connect app on the phone you intend to stop using.
- Bring your phone within 10 m (33 ft.) of the watch.
- On your phone, open the Garmin Connect app, and select **••• > Garmin Devices > Add Device** to enter pairing mode.
- From the watch face, hold **MENU**, and select **Phone > Pair Phone**.

## My watch does not display the correct time

The watch updates the time and date when you sync it. You should sync your watch to receive the correct time when you change time zones, and to update for daylight saving time.

- 1 Confirm that the time is set to automatic (*Time Settings, page 84*).
- 2 Confirm that your computer or phone displays the correct local time.
- 3 Select an option:
  - Sync your watch to a computer (*Using Garmin Connect on Your Computer, page 68*).
  - Sync your watch to a phone (*Using the Garmin Connect App, page 67*).
  - Sync your watch with GPS (*Syncing the Time, page 85*).

The time and date are updated automatically.

## Can I use my Bluetooth sensor with my watch?

The watch is compatible with some Bluetooth sensors. The first time you connect a sensor to your Garmin watch, you must pair the watch and sensor. After they are paired, the watch connects to the sensor automatically when you start an activity and the sensor is active and within range.

- 1 Hold **MENU**.
- 2 Select **Sensors & Accessories > Add New**.
- 3 Select an option:
  - Select **Search All**.
  - Select your sensor type.

You can customize the optional data fields (*Customizing the Data Screens, page 24*).

## Restarting Your Watch

- 1 Hold **CTRL** until the watch turns off.
- 2 Hold **CTRL** to turn on the watch.

## Resetting All Default Settings

Before you reset all default settings, you should sync the watch with the Garmin Connect app to upload your activity data.

You can reset all of the watch settings to the factory default values.

- 1 From the watch face, hold **MENU**.
- 2 Select **System > Reset**.
- 3 Select an option:
  - To reset all of the watch settings to the factory default values and save all user-entered information and activity history, select **Reset Default Settings**.
  - To delete all activities from the history, select **Delete All Activities**.
  - To reset all distance and time totals, select **Reset Totals**.
  - To reset all of the watch settings to the factory default values and delete all user-entered information and activity history, select **Delete Data and Reset Settings**.

**NOTE:** If you have set up a Garmin Pay wallet, this option deletes the wallet from your watch.

## Tips for Maximizing the Battery Life

To extend the life of the battery, you can try these tips.

- Change the power mode during an activity (*Changing the Power Mode, page 83*).
  - Turn on the battery saver feature from the controls menu (*Controls, page 47*).
  - Reduce the screen timeout (*Changing the Screen Settings, page 85*).
  - Stop using the **Always On Display** screen timeout option, and select a shorter timeout (*Changing the Screen Settings, page 85*).
  - Reduce the screen brightness (*Changing the Screen Settings, page 85*).
  - Use UltraTrac satellite mode for your activity (*Satellite Settings, page 29*).
  - Turn off Bluetooth technology when you are not using connected features (*Controls, page 47*).
  - When pausing your activity for a longer period of time, use the **Resume Later** option (*Stopping an Activity, page 4*).
  - Use a watch face that is not updated every second.  
For example, use a watch face without a second hand (*Customizing the Watch Face, page 34*).
  - Limit the phone notifications the watch displays (*Managing Notifications, page 66*).
  - Stop broadcasting heart rate data to paired devices (*Broadcasting Heart Rate Data, page 54*).
  - Turn off wrist-based heart rate monitoring (*Wrist Heart Rate Monitor Settings, page 53*).
- NOTE:** Wrist-based heart rate monitoring is used to calculate vigorous intensity minutes and calories burned.
- Turn on manual pulse oximeter readings (*Setting the Pulse Oximeter Mode, page 55*).

## Acquiring Satellite Signals

The device may need a clear view of the sky to acquire satellite signals. The time and date are set automatically based on the GPS position.

**TIP:** For more information about GPS, go to [garmin.com/aboutGPS](http://garmin.com/aboutGPS).

- 1 Go outdoors to an open area.  
The front of the device should be oriented toward the sky.
- 2 Wait while the device locates satellites.  
It may take 30–60 seconds to locate satellite signals.

## Improving GPS Satellite Reception

- Frequently sync the watch to your Garmin account:
  - Connect your watch to a computer using the USB cable and the Garmin Express application.
  - Sync your watch to the Garmin Connect app using your Bluetooth enabled phone.

While connected to your Garmin account, the watch downloads several days of satellite data, allowing it to quickly locate satellite signals.

- Take your watch outside to an open area away from tall buildings and trees.
- Remain stationary for a few minutes.

## The activity temperature reading is not accurate

Your body temperature affects the temperature reading for the internal temperature sensor. To get the most accurate temperature reading, you should remove the watch from your wrist and wait 20 to 30 minutes.

You can also use an optional external temperature sensor to view accurate ambient temperature readings while wearing the watch.

## Activity Tracking

For more information about activity tracking accuracy, go to [garmin.com/ataccuracy](http://garmin.com/ataccuracy).

## My daily step count does not appear

The daily step count is reset every night at midnight.

If dashes appear instead of your step count, allow the device to acquire satellite signals and set the time automatically.

## My step count does not seem accurate

If your step count does not seem accurate, you can try these tips.

- Wear the watch on your non-dominant wrist.
- Carry the watch in your pocket when pushing a stroller or lawn mower.
- Carry the watch in your pocket when actively using your hands or arms only.

**NOTE:** The watch may interpret some repetitive motions, such as washing dishes, folding laundry, or clapping your hands, as steps.

## The step counts on my watch and my Garmin Connect account don't match

The step count on your Garmin Connect account updates when you sync your watch.

1 Select an option:

- Sync your step count with the Garmin Express application ([Using Garmin Connect on Your Computer, page 68](#)).
- Sync your step count with the Garmin Connect app ([Using the Garmin Connect App, page 67](#)).

2 Wait while your data syncs.

Syncing can take several minutes.

**NOTE:** Refreshing the Garmin Connect app or the Garmin Express application does not sync your data or update your step count.

## The floors climbed amount does not seem accurate

Your watch uses an internal barometer to measure elevation changes as you climb floors. A floor climbed is equal to 3 m (10 ft.).

- Avoid holding handrails or skipping steps while climbing stairs.
- In windy environments, cover the watch with your sleeve or jacket as strong gusts can cause erratic readings.

# Appendix

## Data Fields

**NOTE:** Not all data fields are available for all activity types. Some data fields require ANT+ or Bluetooth accessories to display data. Some data fields appear in more than one category on the watch.

**TIP:** You can also customize the data fields from the watch settings in the Garmin Connect app.

### Cadence Fields

| Name          | Description  |
|---------------|--|
| Avg. Cadence  | Cycling. The average cadence for the current activity.   |
| Avg. Cadence  | Running. The average cadence for the current activity.   |
| Cadence       | Cycling. The number of revolutions of the crank arm. Your device must be connected to a cadence accessory for this data to appear. |
| Cadence       | Running. The steps per minute (right and left).  |
| Cadence Gauge | Running. A color gauge showing your current cadence range.   |
| Lap Cadence   | Cycling. The average cadence for the current lap.  |
| Lap Cadence   | Running. The average cadence for the current lap.  |
| Last Lap Cad. | Cycling. The average cadence for the last completed lap.   |
| Last Lap Cad. | Running. The average cadence for the last completed lap.   |

### Compass Fields

| Name          | Description  |
|---------------|--|
| Compass Gauge | The direction you are moving based on the compass. |
| Compass Hdg.  | The direction you are moving based on the compass. |
| GPS Heading   | The direction you are moving based on GPS.         |
| Heading       | The direction you are moving.                      |

### Distance Fields

| Name               | Description  |
|--------------------|--|
| Distance           | The distance traveled for the current track or activity. |
| Int. Distance      | The distance traveled for the current interval.          |
| Lap Distance       | The distance traveled for the current lap.               |
| Last Lap Dist.     | The distance traveled for the last completed lap.        |
| Last Move Distance | The distance traveled for the last completed move.       |
| Move Distance      | The distance traveled for the current move.              |

## Elevation Fields

| Name                       | Description   |
|----------------------------|---|
| Avg. Ascent                | The average vertical distance of ascent since the last reset.   |
| Avg. Descent               | The average vertical distance of descent since the last reset.  |
| Elevation                  | The altitude of your current location above or below sea level.   |
| Elevation Chart            | A chart showing the elevation over time.  |
| Glide Ratio                | The ratio of horizontal distance traveled to the change in vertical distance.   |
| GPS Elevation              | The altitude of your current location using GPS.  |
| Grade                      | The calculation of rise (elevation) over run (distance). For example, if for every 3 m (10 ft.) you climb you travel 60 m (200 ft.), the grade is 5%. |
| Lap Ascent                 | The vertical distance of ascent for the current lap.  |
| Lap Descent                | The vertical distance of descent for the current lap.   |
| Last Lap Ascent            | The vertical distance of ascent for the last completed lap.   |
| Last Lap Descent           | The vertical distance of descent for the last completed lap.  |
| Last Move Ascent           | The vertical distance of ascent for the last completed move.  |
| Last Move Descent          | The vertical distance of descent for the last completed move.   |
| Max. Ascent                | The maximum rate of ascent in feet per minute or meters per minute since the last reset.  |
| Max. Descent               | The maximum rate of descent in meters per minute or feet per minute since the last reset.   |
| Max. Elevation             | The highest elevation reached since the last reset.   |
| Min. Elevation             | The lowest elevation reached since the last reset.  |
| Move Ascent                | The vertical distance of ascent for the current move.   |
| Move Descent               | The vertical distance of descent for the current move.  |
| Total Ascent               | The total elevation distance ascended since the last reset.   |
| Total Descent              | The total elevation distance descended since the last reset.  |
| Total Ascent/Descent Gauge | The total elevation distances ascended and descended during the activity or since the last reset.   |

## Floors Fields

| Name              | Description  |
|-------------------|--|
| Floors Climbed    | The total number of floors climbed up for the day.   |
| Floors Descended  | The total number of floors climbed down for the day. |
| Floors per Minute | The number of floors climbed up per minute.          |

## Heart Rate Fields

| Name                       | Description  |
|----------------------------|--|
| %HRR                       | The percentage of heart rate reserve (maximum heart rate minus resting heart rate).  |
| Aerobic TE                 | The impact of the current activity on your aerobic fitness level.  |
| Anaerobic TE               | The impact of the current activity on your anaerobic fitness level.  |
| Avg. %HRR                  | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current activity.                         |
| Average HR                 | The average heart rate for the current activity.   |
| Avg HR %Max.               | The average percentage of maximum heart rate for the current activity.   |
| Heart Rate                 | Your heart rate in beats per minute (bpm). Your device must have wrist-based heart rate or be connected to a compatible heart rate monitor.  |
| Heart Rate Chart           | A chart showing your heart rate throughout the activity.   |
| Heart Rate Gauge           | A color gauge showing your current heart rate zone.  |
| HR %Max.                   | The percentage of maximum heart rate.  |
| HR Zone                    | The current range of your heart rate (1 to 5). The default zones are based on your user profile and maximum heart rate (220 minus your age). |
| Int. Avg. %HRR             | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current swim interval.                    |
| Int. Avg. %Max.            | The average percentage of maximum heart rate for the current swim interval.  |
| Int. Avg. HR               | The average heart rate for the current swim interval.  |
| Int. Max. %HRR             | The maximum percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current swim interval.                    |
| Int. Max. %Max.            | The maximum percentage of maximum heart rate for the current swim interval.  |
| Int. Max. HR               | The maximum heart rate for the current swim interval.  |
| Lap %HRR                   | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current lap.                              |
| Lap HR                     | The average heart rate for the current lap.  |
| Lap HR %Max.               | The average percentage of maximum heart rate for the current lap.  |
| Last Lap %HRR              | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the last completed lap.                       |
| Last Lap HR                | The average heart rate for the last completed lap.   |
| L. Lap HR %Max.            | The average percentage of maximum heart rate for the last completed lap.   |
| Last Move %HRR             | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the last move.                                |
| Last Move Heart Rate       | The average heart rate for the last completed move.  |
| Last Move Heart Rate %Max. | The average percentage of maximum heart rate for the last move.  |

| Name                      | Description  |
|---------------------------|--|
| Move % Heart Rate Reserve | The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current move. |
| Move Heart Rate           | The average heart rate in the current move.  |
| Move Heart Rate %Max.     | The average percentage of maximum heart rate for the current move.   |
| Time in Zone              | The time elapsed in each heart rate zone.  |
| Training Effect Gauge     | The impact of the current activity on your aerobic and anaerobic fitness levels.                                 |

### Lengths Fields

| Name             | Description   |
|------------------|---|
| Interval Lengths | The number of pool lengths completed during the current interval. |
| Lengths          | The number of pool lengths completed during the current activity. |

### Navigation Fields

| Name                     | Description  |
|--------------------------|--|
| Bearing                  | The direction from your current location to a destination. You must be navigating for this data to appear.   |
| Course                   | The direction from your starting location to a destination. Course can be viewed as a planned or set route. You must be navigating for this data to appear.                |
| Destination Location     | The position of your final destination.  |
| Dest. Wpt                | The last point on the route to the destination. You must be navigating for this data to appear.  |
| Dist. Remaining          | The remaining distance to the final destination. You must be navigating for this data to appear.   |
| Distance To Next         | The remaining distance to the next waypoint on the route. You must be navigating for this data to appear.  |
| Estimated Total Distance | The estimated distance from the start to the final destination. You must be navigating for this data to appear.  |
| ETA                      | The estimated time of day when you will reach the final destination (adjusted to the local time of the destination). You must be navigating for this data to appear.       |
| ETA at Next              | The estimated time of day when you will reach the next waypoint on the route (adjusted to the local time of the waypoint). You must be navigating for this data to appear. |
| ETE                      | The estimated time remaining until you reach the final destination. You must be navigating for this data to appear.  |
| Glide Ratio Dest.        | The glide ratio required to descend from your current position to the destination elevation. You must be navigating for this data to appear.                               |
| Lat/Lon                  | The current position in latitude and longitude regardless of the selected position format setting.   |
| Location                 | The current position using the selected position format setting.   |

| Name            | Description   |
|-----------------|---|
| Next Waypoint   | The next point on the route. You must be navigating for this data to appear.  |
| Off Course      | The distance to the left or right by which you have strayed from the original path of travel. You must be navigating for this data to appear. |
| Time to Next    | The estimated time remaining before you reach the next waypoint in the route. You must be navigating for this data to appear.                 |
| VMG             | The speed at which you are closing on a destination along a route. You must be navigating for this data to appear.                            |
| V Dist to Dest  | The elevation distance between your current position and the final destination. You must be navigating for this data to appear.               |
| Vert Spd to Tgt | The rate of ascent or descent to a predetermined altitude. You must be navigating for this data to appear.                                    |

### Other Fields

| Name             | Description   |
|------------------|---|
| Active Calories  | The calories burned during the activity.  |
| Ambient Press.   | The uncalibrated environmental pressure.  |
| Barometer Chart  | A chart showing the barometric pressure over time.  |
| Baro. Pressure   | The current calibrated environmental pressure.  |
| Battery Hours    | The number of hours remaining before the battery power is depleted.   |
| Battery Level    | The watch battery level.  |
| Calories         | The calories burned throughout the day.   |
| GPS              | The strength of the GPS satellite signal.   |
| Laps             | The number of laps completed for the current activity.  |
| Load             | The training load for the current activity. Training load is the amount of excess post-exercise oxygen consumption (EPOC), which indicates the strenuousness of your workout. |
| Moves            | The number of moves completed for the current activity.   |
| Perform. Cond.   | The performance condition score is a real-time assessment of your ability to perform.   |
| Reps             | During a strength training activity, the number of repetitions in a workout set.  |
| Respiration Rate | Your respiration rate in breaths per minute (brpm).   |
| Set Timer        | During a strength training activity, the amount of time spent in the current workout set.   |
| Steps            | The number of steps taken during the current activity.  |
| Stress           | Your current stress level.  |
| Sunrise          | The time of sunrise based on your GPS position.   |
| Sunset           | The time of sunset based on your GPS position.  |
| Time of Day      | The time of day based on your current location and time settings (format, time zone, daylight saving time).   |

**Pace Fields**

| Name                | Description  |
|---------------------|--|
| 500m Pace           | The current rowing pace per 500 meters.                          |
| Avg. 500m Pace      | The average rowing pace per 500 meters for the current activity. |
| Average Pace        | The average pace for the current activity.                       |
| Grade Adjusted Pace | The average pace adjusted by the steepness of the terrain.       |
| Int. Pace           | The average pace for the current interval.                       |
| Lap 500m Pace       | The average rowing pace per 500 meters for the current lap.      |
| Lap Pace            | The average pace for the current lap.                            |
| LL 500m Pace        | The average rowing pace per 500 meters for the last lap.         |
| Last Lap Pace       | The average pace for the last completed lap.                     |
| Last Len. Pace      | The average pace for your last completed pool length.            |
| Last Move Pace      | The average pace for the last completed move.                    |
| Move Pace           | The average pace for the current move.                           |
| Pace                | The current pace.  |
| Pace Chart          | A chart showing your pace throughout the activity.               |

**PacePro Fields**

| Name                     | Description   |
|--------------------------|---|
| Next Split Distance      | Running. The total distance of the next split.                |
| Next Split Target Pace   | Running. The target pace for the next split.                  |
| Overall Ahead/Behind     | Running. The overall time ahead or behind of the target pace. |
| PacePro Gauge            | Running. Your current split pace and your target split pace.  |
| Split Distance           | Running. The total distance of the current split.             |
| Split Distance Remaining | Running. The remaining distance of the current split.         |
| Split Pace               | Running. The pace for the current split.                      |
| Split Target Pace        | Running. The target pace for the current split.               |

## Power Fields

| Name             | Description   |
|------------------|---|
| % FTP            | The current power output as a percentage of functional threshold power.   |
| 3s Avg. Balance  | The 3-second moving average of the left/right power balance.  |
| 3s Avg. Power    | The 3-second moving average of power output.  |
| 10s Avg Balance  | The 10-second moving average of the left/right power balance.   |
| 10s Avg. Power   | The 10-second moving average of power output.   |
| 30s Avg Balance  | The 30-second moving average of the left/right power balance.   |
| 30s Avg. Power   | The 30-second moving average of power output.   |
| Avg. Balance     | The average left/right power balance for the current activity.  |
| Avg. L. PP       | The average power phase angle for the left leg for the current activity.  |
| Average Power    | The average power output for the current activity.  |
| Avg. R. PP       | The average power phase angle for the right leg for the current activity.   |
| Avg. L. PPP      | The average power phase peak angle for the left leg for the current activity.   |
| Avg. PCO         | The average platform center offset for the current activity.  |
| Avg. R. PPP      | The average power phase peak angle for the right leg for the current activity.  |
| Balance          | The current left/right power balance.   |
| Intensity Factor | The Intensity Factor™ for the current activity.   |
| Lap Balance      | The average left/right power balance for the current lap.   |
| Lap L. PPP       | The average power phase peak angle for the left leg for the current lap.  |
| Lap L. PP        | The average power phase angle for the left leg for the current lap.   |
| Lap NP           | The average Normalized Power™ for the current lap.  |
| Lap PCO          | The average platform center offset for the current lap.   |
| Lap Power        | The average power output for the current lap.   |
| Lap R. PPP       | The average power phase peak angle for the right leg for the current lap.   |
| Lap R. PP        | The average power phase angle for the right leg for the current lap.  |
| Last Lap NP      | The average Normalized Power for the last completed lap.  |
| Last Lap Power   | The average power output for the last completed lap.  |
| Left PPP         | The current power phase peak angle for the left leg. Power phase peak is the angle range over which the rider produces the peak portion of the driving force. |
| Left PP          | The current power phase angle for the left leg. Power phase is the pedal stroke region where positive power is produced.                                      |
| L. Lap Max. PWR  | The top power output for the last completed lap.  |
| Max. Lap Power   | The top power output for the current lap.   |

| Name            | Description  |
|-----------------|--|
| Max Power       | The top power output for the current activity.   |
| NP              | The Normalized Power for the current activity.   |
| Pedal Smooth.   | The measurement of how evenly a rider is applying force to the pedals throughout each pedal stroke.  |
| PCO             | The platform center offset. Platform center offset is the location on the pedal platform where force is applied.   |
| Power           | The current power output in watts.   |
| Power Chart     | A chart showing your power throughout the activity.  |
| Power Gauge     | A color gauge showing your current power zone.   |
| Power to Weight | The current power measured in watts per kilogram.  |
| Power Zone      | The current range of power output based on your FTP or custom settings.  |
| Right PPP       | The current power phase peak angle for the right leg. Power phase peak is the angle range over which the rider produces the peak portion of the driving force. |
| Right PP        | The current power phase angle for the right leg. Power phase is the pedal stroke region where positive power is produced.                                      |
| Time in Zone    | The time elapsed in each power zone.   |
| Time Seat.      | The time spent seated while pedaling for the current activity.   |
| Time Seat. Lap  | The time spent seated while pedaling for the current lap.  |
| Time Stand.     | The time spent standing while pedaling for the current activity.   |
| Time Stand. Lap | The time spent standing while pedaling for the current lap.  |
| TSS             | The Training Stress Score™ for the current activity.   |
| Torque Eff.     | The measurement of how efficiently a rider is pedaling.  |
| Work            | The accumulated work performed (power output) in kilojoules.   |

#### Rest Fields

| Name       | Description  |
|------------|--|
| Repeat On  | The timer for the last interval plus the current rest (pool swimming). |
| Rest Timer | The timer for the current rest (pool swimming).                        |

## Run Dynamics

| Name                       | Description  |
|----------------------------|--|
| Avg. GCT Bal.              | The average ground contact time balance for the current session.   |
| Avg GCT                    | The average amount of ground contact time for the current activity.  |
| Avg. Stride Len.           | The average stride length for the current session.   |
| Avg. Vert. Osc.            | The average amount of vertical oscillation for the current activity.   |
| Avg. Vert. Ratio           | The average ratio of vertical oscillation to stride length for the current session.  |
| GCT Balance                | The left/right balance of ground contact time while running.   |
| GCT Balance Gauge          | A color gauge showing the left/right balance of ground contact time while running.   |
| GCT                        | The amount of time in each step that you spend on the ground while running, measured in milliseconds. Ground contact time is not calculated while walking. |
| Ground Contact Time Gauge  | A color gauge showing the amount of time in each step that you spend on the ground while running, measured in milliseconds.                                |
| Lap GCT Bal.               | The average ground contact time balance for the current lap.   |
| Lap GCT                    | The average amount of ground contact time for the current lap.   |
| Lap Stride Len.            | The average stride length for the current lap.   |
| Lap Vert. Osc.             | The average amount of vertical oscillation for the current lap.  |
| Lap Vert. Ratio            | The average ratio of vertical oscillation to stride length for the current lap.  |
| Stride Length              | The length of your stride from one footfall to the next, measured in meters.   |
| Vertical Osc.              | The amount of bounce while you are running. The vertical motion of your torso, measured in centimeters for each step.                                      |
| Vertical Oscillation Gauge | A color gauge showing the amount of bounce while you are running.  |
| Vertical Ratio             | The ratio of vertical oscillation to stride length.  |
| Vertical Ratio Gauge       | A color gauge showing the ratio of vertical oscillation to stride length.  |

## Speed Fields

| Name               | Description  |
|--------------------|--|
| Avg. Moving Speed  | The average speed when moving for the current activity.  |
| Avg. Overall Speed | The average speed for the current activity, including both moving and stopped speeds.  |
| Avg. Speed         | The average speed for the current activity.  |
| Avg. Nautical SOG  | The average speed of travel in knots for the current activity, regardless of the course steered and temporary variations in heading. |
| Lap SOG            | The average speed of travel for the current lap, regardless of the course steered and temporary variations in heading.               |
| Lap Speed          | The average speed for the current lap.   |
| Last Lap SOG       | The average speed of travel for the last completed lap, regardless of the course steered and temporary variations in heading.        |
| Last Lap Speed     | The average speed for the last completed lap.  |
| Last Move Speed    | The average speed for the last completed move.   |
| Maximum SOG        | The maximum speed of travel for the current activity, regardless of the course steered and temporary variations in heading.          |
| Maximum Speed      | The top speed for the current activity.  |
| Move Speed         | The average speed for the current move.  |
| Speed              | The current rate of travel.  |
| Speed Chart        | A chart showing your speed throughout the activity.  |
| SOG                | The actual speed of travel, regardless of the course steered and temporary variations in heading.                                    |
| Vert. Spd.         | The rate of ascent or descent over time.   |

## Stroke Fields

| Name              | Description  |
|-------------------|--|
| Avg Dist Per Stk  | Swimming. The average distance traveled per stroke during the current activity.              |
| Avg Dist Per Stk  | Paddle sports. The average distance traveled per stroke during the current activity.         |
| Avg. Strk Rate    | Paddle sports. The average number of strokes per minute (spm) during the current activity.   |
| Avg. Strk/Len     | The average number of strokes per pool length during the current activity.                   |
| Dist. Per Stroke  | Paddle sports. The distance traveled per stroke.   |
| Int Strk Rate     | The average number of strokes per minute (spm) during the current interval.                  |
| Int Strk/Len      | The average number of strokes per pool length during the current interval.                   |
| Int Strk Type     | The current stroke type for the interval.  |
| Lap Dist Per Stk  | Swimming. The average distance traveled per stroke during the current lap.                   |
| Lap Dist Per Stk  | Paddle sports. The average distance traveled per stroke during the current lap.              |
| Lap Strk Rate     | Swimming. The average number of strokes per minute (spm) during the current lap.             |
| Lap Strk Rate     | Paddle sports. The average number of strokes per minute (spm) during the current lap.        |
| Lap Strokes       | Swimming. The total number of strokes for the current lap.                                   |
| Lap Strokes       | Paddle sports. The total number of strokes for the current lap.                              |
| L Lap Dist P Stk  | Swimming. The average distance traveled per stroke during the last completed lap.            |
| L Lap Dist P Stk  | Paddle sports. The average distance traveled per stroke during the last completed lap.       |
| L. Lap Stk. Rate  | Swimming. The average number of strokes per minute (spm) during the last completed lap.      |
| L. Lap Stk. Rate  | Paddle sports. The average number of strokes per minute (spm) during the last completed lap. |
| L. Lap Strokes    | Swimming. The total number of strokes for the last completed lap.                            |
| L. Lap Strokes    | Paddle sports. The total number of strokes for the last completed lap.                       |
| L. Len. Stk. Rate | The average number strokes per minute (spm) during the last completed pool length.           |
| L. Len. Strokes   | The total number of strokes for the last completed pool length.                              |
| L. Len. Stk. Type | The stroke type used during the last completed pool length.                                  |
| Stroke Rate       | Swimming. The number of strokes per minute (spm).  |
| Stroke Rate       | Paddle sports. The number of strokes per minute (spm).                                       |
| Strokes           | Swimming. The total number of strokes for the current activity.                              |
| Strokes           | Paddle sports. The total number of strokes for the current activity.                         |

## Swolf Fields

| Name            | Description   |
|-----------------|---|
| Average Swolf   | The average swolf score for the current activity. Your swolf score is the sum of the time for one length plus the number of strokes for that length ( <a href="#">Swim Terminology, page 12</a> ). In open water swimming, 25 meters is used to calculate your swolf score. |
| Int. Swolf      | The average swolf score for the current interval.   |
| Lap Swolf       | The swolf score for the current lap.  |
| L. Lap Swolf    | The swolf score for the last completed lap.   |
| Last Len. Swolf | The swolf score for the last completed pool length.   |

## Temperature Fields

| Name         | Description  |
|--------------|--|
| 24-Hour Max. | The maximum temperature recorded in the last 24 hours from a compatible temperature sensor.  |
| 24-Hour Min. | The minimum temperature recorded in the last 24 hours from a compatible temperature sensor.  |
| Temperature  | The environmental temperature during the activity. Your body temperature affects the temperature sensor. You can pair a temperature sensor with your device to provide a consistent source of accurate temperature data. |

## Timer Fields

| Name                 | Description  |
|----------------------|--|
| Avg. Lap Time        | The average lap time for the current activity.   |
| Elapsed Time         | The total time recorded. For example, if you start the activity timer and run for 10 minutes, then stop the timer for 5 minutes, then start the timer and run for 20 minutes, your elapsed time is 35 minutes. |
| Interval Time        | The stopwatch time for the current interval.   |
| Lap Time             | The stopwatch time for the current lap.  |
| Last Lap Time        | The stopwatch time for the last completed lap.   |
| Last Move Time       | The stopwatch time for the last completed move.  |
| Move Time            | The stopwatch time for the current move.   |
| Moving Time          | The total time moving for the current activity.  |
| Multisport Time      | The total time for all sports in a multisport activity, including transitions.   |
| Overall Ahead/Behind | Running. The overall time ahead of or behind the target pace.  |
| Stopped Time         | The total time stopped for the current activity.   |
| Swim Time            | The swimming time for the current activity, not including rest time.   |
| Timer                | The current time of the countdown timer.   |

## Workout Fields

| Name          | Description  |
|---------------|--|
| Reps          | During a workout, the remaining repetitions.         |
| Step Distance | The time or distance remaining for the workout step. |
| Step Pace     | The current pace during the workout step.            |
| Step Speed    | The current speed during the workout step.           |
| Step Time     | The time elapsed for the workout step.               |

## Color Gauges and Running Dynamics Data

The running dynamics screens display a color gauge for the primary metric. You can display cadence, vertical oscillation, ground contact time, ground contact time balance, or vertical ratio as the primary metric. The color gauge shows you how your running dynamics data compare to those of other runners. The color zones are based on percentiles.

Garmin has researched many runners of all different levels. The data values in the red or orange zones are typical for less experienced or slower runners. The data values in the green, blue, or purple zones are typical for more experienced or faster runners. More experienced runners tend to exhibit shorter ground contact times, lower vertical oscillation, lower vertical ratio, and higher cadence than less experienced runners. However, taller runners typically have slightly slower cadences, longer strides, and slightly higher vertical oscillation. Vertical ratio is your vertical oscillation divided by stride length. It is not correlated with height.

Go to [garmin.com/runningdynamics](https://garmin.com/runningdynamics) for more information on running dynamics. For additional theories and interpretations of running dynamics data, you can search reputable running publications and websites.

| Color Zone   | Percentile in Zone | Cadence Range | Ground Contact Time Range |
|--|--------------------|---------------|---------------------------|
|  Purple | >95                | >183 spm      | <218 ms                   |
|  Blue   | 70–95              | 174–183 spm   | 218–248 ms                |
|  Green  | 30–69              | 164–173 spm   | 249–277 ms                |
|  Orange | 5–29               | 153–163 spm   | 278–308 ms                |
|  Red    | <5                 | <153 spm      | >308 ms                   |

## Ground Contact Time Balance Data

Ground contact time balance measures your running symmetry and appears as a percentage of your total ground contact time. For example, 51.3% with an arrow pointing left indicates the runner is spending more time on the ground when on the left foot. If your data screen displays both numbers, for example 48–52, 48% is the left foot and 52% is the right foot.

| Color Zone                  |  Red |  Orange |  Green |  Orange |  Red |
|-----------------------------|---|--|---|--|---|
| Symmetry                    | Poor  | Fair   | Good  | Fair   | Poor  |
| Percent of Other Runners    | 5%  | 25%  | 40%   | 25%  | 5%  |
| Ground Contact Time Balance | >52.2% L  | 50.8–52.2% L   | 50.7% L–50.7% R   | 50.8–52.2% R   | >52.2% R  |

While developing and testing running dynamics, the Garmin team found correlations between injuries and greater imbalances with certain runners. For many runners, ground contact time balance tends to deviate further from 50–50 when running up or down hills. Most running coaches agree that a symmetrical running form is good. Elite runners tend to have quick and balanced strides.

You can watch the gauge or data field during your run or view the summary on your Garmin Connect account after your run. As with the other running dynamics data, ground contact time balance is a quantitative measurement to help you learn about your running form.

## Vertical Oscillation and Vertical Ratio Data

The data ranges for vertical oscillation and vertical ratio are slightly different depending on the sensor and whether it is positioned at the chest (HRM-Fit or HRM-Pro series accessories) or at the waist (Running Dynamics Pod accessory).

| Color Zone   | Percentile in Zone | Vertical Oscillation Range at Chest | Vertical Oscillation Range at Waist | Vertical Ratio at Chest | Vertical Ratio at Waist |
|--|--------------------|-------------------------------------|-------------------------------------|-------------------------|-------------------------|
|  Purple | >95                | <6.4 cm                             | <6.8 cm                             | <6.1%                   | <6.5%                   |
|  Blue   | 70–95              | 6.4–8.1 cm                          | 6.8–8.9 cm                          | 6.1–7.4%                | 6.5–8.3%                |
|  Green  | 30–69              | 8.2–9.7 cm                          | 9.0–10.9 cm                         | 7.5–8.6%                | 8.4–10.0%               |
|  Orange | 5–29               | 9.8–11.5 cm                         | 11.0–13.0 cm                        | 8.7–10.1%               | 10.1–11.9%              |
|  Red    | <5                 | >11.5 cm                            | >13.0 cm                            | >10.1%                  | >11.9%                  |

## VO2 Max. Standard Ratings

These tables include standardized classifications for VO2 max. estimates by age and sex.

| Males     | Percentile | 20–29 | 30–39 | 40–49 | 50–59 | 60–69 | 70–79 |
|-----------|------------|-------|-------|-------|-------|-------|-------|
| Superior  | 95         | 55.4  | 54    | 52.5  | 48.9  | 45.7  | 42.1  |
| Excellent | 80         | 51.1  | 48.3  | 46.4  | 43.4  | 39.5  | 36.7  |
| Good      | 60         | 45.4  | 44    | 42.4  | 39.2  | 35.5  | 32.3  |
| Fair      | 40         | 41.7  | 40.5  | 38.5  | 35.6  | 32.3  | 29.4  |
| Poor      | 0–40       | <41.7 | <40.5 | <38.5 | <35.6 | <32.3 | <29.4 |

| Females   | Percentile | 20–29 | 30–39 | 40–49 | 50–59 | 60–69 | 70–79 |
|-----------|------------|-------|-------|-------|-------|-------|-------|
| Superior  | 95         | 49.6  | 47.4  | 45.3  | 41.1  | 37.8  | 36.7  |
| Excellent | 80         | 43.9  | 42.4  | 39.7  | 36.7  | 33    | 30.9  |
| Good      | 60         | 39.5  | 37.8  | 36.3  | 33    | 30    | 28.1  |
| Fair      | 40         | 36.1  | 34.4  | 33    | 30.1  | 27.5  | 25.9  |
| Poor      | 0–40       | <36.1 | <34.4 | <33   | <30.1 | <27.5 | <25.9 |

Data reprinted with permission from The Cooper Institute. For more information, go to [www.CooperInstitute.org](http://www.CooperInstitute.org).

## FTP Ratings

These tables include classifications for functional threshold power (FTP) estimates by sex.

| Males     | Watts per Kilogram (W/kg) |
|-----------|---------------------------|
| Superior  | 5.05 and greater          |
| Excellent | From 3.93 to 5.04         |
| Good      | From 2.79 to 3.92         |
| Fair      | From 2.23 to 2.78         |
| Untrained | Less than 2.23            |

| Females   | Watts per Kilogram (W/kg) |
|-----------|---------------------------|
| Superior  | 4.30 and greater          |
| Excellent | From 3.33 to 4.29         |
| Good      | From 2.36 to 3.32         |
| Fair      | From 1.90 to 2.35         |
| Untrained | Less than 1.90            |

FTP ratings are based on research by Hunter Allen and Andrew Coggan, PhD, *Training and Racing with a Power Meter* (Boulder, CO: VeloPress, 2010).

## Wheel Size and Circumference

Your speed sensor automatically detects your wheel size. If necessary, you can manually enter your wheel circumference in the speed sensor settings.

The tire size is marked on both sides of the tire. You can measure the circumference of your wheel or use one of the calculators available on the internet.

## Symbol Definitions

These symbols may appear on the device or accessory labels.

WEEE disposal and recycling symbol. The WEEE symbol is attached to the product in compliance with the EU directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). It is intended to deter the improper disposal of this product and to promote reuse and recycling.
